## Seismicity Induced By Mining

SLAWOMIR J. GIBOWICZ

1. Introduction .....	1
2. Seismicity Induced by Surface Mining .....	3
3. Seismicity in Underground Mines .....	6
4. Principal Types of Mine Tremors .....	14
5. Focal Mechanism .....	23
6. Seismic Source Modeling .....	37
7. Seismic Spectra and Source Parameters.....	39
8. Scaling Relations .....	51
9. Prediction and Prevention .....	55
10. Research Perspectives .....	58
11. Summary .....	60
References .....	62

## Modeling the Pleistocene Ice Ages

D. V. CHALIKOV AND M. YA. VERBITSKY

1. Introduction .....	75
2. Model of the World Ocean's Climate.....	78
3. One-Dimensional Atmospheric Climate Model .....	85
4. Time-Dependent Model for Continental Ice Cover .....	87
5. Interaction among Glaciers, Oceans, and Atmosphere .....	89
6. Simulation of the Present Climate .....	91
7. Nonuniqueness of Climate .....	94
8. Sensitivity of the System to Changes in Solar Heat Flux.....	100
9. The Ice Ages.....	108
10. The Effect of Positions of the Continents on Climate .....	120
11. Conclusions .....	127
References .....	129

## Performance of a High-Resolution Mesoscale Tropical Prediction Model

T. N. KRISHNAMURTI, ARUN KUMAR, K. S. YAP, ASHU P. DASTOOR, NOEL DAVIDSON,  
AND JIAN SHENG

1. Introduction .....	133
2. Dynamical Aspects of the Regional Model .....	141

3. Physical Processes .....	167
4. The Landfall of a Tropical Storm .....	205
5. Sensitivity to Data Sets .....	227
6. Sensitivity to Lateral Boundary Conditions .....	235
7. Sensitivity to Horizontal Resolution .....	246
8. Simulation of a Middle-Latitude Rainfall Event .....	264
9. Concluding Remarks .....	278
References .....	281

**Symmetries, Conservation Laws, and Hamiltonian Structure  
in Geophysical Fluid Dynamics**

THEODORE G. SHEPHERD

1. Introduction .....	287
2. Finite-Dimensional Dynamical Systems .....	288
3. Infinite-Dimensional (Continuous) Systems and Noether's Theorem .....	292
4. Fluid-Dynamical Examples .....	296
5. Wave-Activity Conservation Laws .....	312
6. Nonlinear-Stability Theory .....	320
7. Approximation of Equations .....	326
8. Energy-Extremization Algorithms .....	332
Appendix: Direct Derivation of the Eulerian Bracket (4.9) .....	333
References .....	336
INDEX .....	339
