

CONTENTS

Chaotic Mixing in the Earth's Mantle

LOUISE H. KELLOGG

1. Introduction	1
2. Isotopic Observations and Systematics.....	2
3. Models of Mantle Convection	10
4. Viscosity and Density Variations in the Mantle.....	12
5. Convective Mixing.....	14
6. Chaotic Mixing in the Mantle	18
7. Future Directions.....	26
8. Conclusions	27
References.....	28

Seismology and Space-Based Geodesy

DAVID M. TRALLI AND FUMIKO TAJIMA

1. Introduction	35
2. Seismological Measurements of Displacement	37
3. Fault Models and Surface Deformation	44
4. Spectrum of Crustal Strain Rates	52
5. Simultaneous Inversion of Seismic and Geodetic Data	60
6. Space-Based Geodetic Techniques	63
7. Geodetic Constraints on Large-Scale Seismological Problems	68
8. Continuously Operating GPS Networks.....	72
9. Conclusions	82
References.....	83

Observational Aspects of the Low-Frequency Intraseasonal Variability of the Atmosphere in Middle Latitudes

LIONEL PANDOLFO

1. Introduction	93
2. Spatial and Temporal Scales of Atmospheric Variability.....	95
3. Observational Characterization of Seasonal Quasi-Stationary Disturbances in the Atmosphere	100
4. Generation and Maintenance of the Seasonal Quasi-Stationary Disturbances.....	115

5. Low-Frequency Intraseasonal Variability in Middle Latitudes:	
Introduction	122
6. The Grosswetterlagen Approach to LFV	128
7. The General Circulation Approach to LFV	143
8. Diagnostic Evidence of LFV in Atmospheric General Circulation Models	155
9. Discussion.....	158
10. Theories of Low-Frequency Intraseasonal Variability	160
References	167

Inverse Problems Related to Light Scattering in the Atmosphere and Ocean

K. S. SHIFRIN AND G. TONNA

1. Introduction	175
2. General Formulation of the Problem	177
3. The Restricted Problem	187
4. Method of Small Angles	203
5. Spectral Transparency Method	216
6. Method of the Total Scattering Function.....	232
7. Conclusions	237
References	243
INDEX	253
