CONTRIBUTORS TO VOLUME II. v

PREFACE. vii

Cathode Ray Tube Progress in the Past Decade with Special Reference to Manufacture and Design

By HILARY MOSS, *Division of Engineering and Research, Electronic Tubes Ltd.,
Reading, England*

Introduction	2
I. Trends in Production Methods	3
II. Developments in the Finished Product.	13
III. Progress in Design Methods and Theory	26
References	43

Electron Lenses

By P. GRIVET, *University of Paris, Paris*

I. Electrostatic Lenses	48
II. Magnetic Lenses.	66
III. Relativistic Lenses.	77
IV. Image Defects—Limits of the Gaussian Approximation.	78
V. Third Order Aberrations	79
VI. Mechanical Defects	85
VII. Some Typical Lenses.	90
Bibliography	98
References	98

Field Plotting and Ray Tracing in Electron Optics A Review of Numerical Methods

By G. LIEBMANN, *Research Laboratory, Associated Electrical Industries Limited,
Aldermaston, Berkshire, England*

I. Introduction	102
II. Field Plotting.	102
III. Ray Tracing	127
IV. Automatic Trajectory Tracing	141
V. Conclusion	145
References	146

Cathodoluminescence

By G. F. J. GARLICK, *Physics Department, University of Birmingham, England*

I. Introduction	152
II. Experimental Studies of Cathodoluminescence.	157
III. Theoretical Studies of Cathodoluminescence	167

IV. Present Trends of Practical and Fundamental Research	179
V. Conclusion	182
References	183

Intrinsic Dielectric Breakdown in Solids

By H. FRÖHLICH AND J. H. SIMPSON, *University of Liverpool, Liverpool, England, and National Research Council of Canada, Ottawa, Canada*

I. Introduction	185
II. Electrons in Solids.	188
III. The Mechanism of Breakdown	196
IV. Results of the Theory	200
V. Experimental Results—Comparison with Theory	206
References	216

The Microwave Magnetron

By GUNNAR HOK, *University of Michigan, Ann Arbor, Michigan*

I. Introduction	220
II. The Magnetron Space-Charge Mechanism	223
III. The Resonant System	230
IV. Cathodes.	239
V. Magnetron Characteristics	241
VI. Modulation.	243
VII. The Magnetron Amplifier.	247
VIII. Trends in Magnetron Development	248
References	249

Ferromagnetic Phenomena at Microwave Frequencies

By GEORGE T. RADO, *Naval Research Laboratory, Washington, D. C.*

I. Scope of the Present Article.	251
II. Summary of Principal Developments.	252
III. On the Concept of Ferromagnetic Permeability	256
IV. Investigations Prior to 1945.	264
V. Recent Advances	275
References	296

Microwave Spectroscopy

By DONALD K. COLES, *Westinghouse Research Laboratories, East Pittsburgh, Pennsylvania*

I. Introduction	300
II. The Beginning of Microwave Spectroscopy.	306
III. Applications of Microwave Spectroscopy.	315
IV. The Width and Intensity of Absorption Lines.	329
V. Apparatus	341
References	360
