

CONTENTS

CONTRIBUTORS TO VOLUME V.	v
PREFACE.	vii

Performance of Detectors for Visible and Infrared Radiation

BY R. CLARK JONES, *Research Laboratory, Polaroid Corporation,
Cambridge, Massachusetts*

I. Introduction and Summary	2
II. Noise in Radiation Detectors	6
III. Classification of Detectors	27
IV. Thermal Detectors	38
V. Photoemissive Detectors	53
VI. Photoconductive Cells	63
VII. Photographic Materials	75
VIII. Radio Antennas	79
IX. The Human Eye	80
References	87

Beta-Ray Spectrometers

BY R. W. HAYWARD, *National Bureau of Standards, Washington, D. C.*

I. Introduction	97
II. Prismatic Beta-Ray Spectrometers	99
III. Lens Beta-Ray Spectrometers	112
IV. Miscellaneous Topics	127
References	135

Solid-State Luminescence

BY FERD E. WILLIAMS, *General Electric Research Laboratory,
Schenectady, New York*

I. Introduction	137
II. Thallium-Activated Potassium Chloride	139
III. Manganese-Activated Luminescent Solids	148
IV. Sulfide Phosphors	153
V. Electroluminescence	156
VI. Cathode Ray Tube Screens	162
References	167

Thorium Oxide and Electronics

BY W. E. DANFORTH, *The Bartol Research Foundation of the Franklin Institute,
Swarthmore, Pennsylvania*

I. Introduction	170
II. Thorium Oxide and Practical Electronics	170

III. The Practical Problems with Thorium Oxide	180
IV. The Physics of Thorium Oxide Behavior	192
References	210

A Review of Modern Vacuum Pumps in Electronics Manufacturing

BY H. C. WEINGARTNER AND S. W. KENNEDY, *National Research Corporation,
Cambridge, Massachusetts*

I. Introduction	213
II. Mechanical Pumps	214
III. Vapor Pumps	221
IV. Matching Vapor and Mechanical Pumps	230
V. Other Pumps	233
VI. Receiving-Tube Exhaust	234
VII. Cathode-Ray-Tube Exhaust	239
VIII. Other Cathode-Ray Exhausting Systems	242
IX. Power Tubes	244
References	245

On the Steady-State Theory of the Magnetron

BY R. Q. TWISS, *Services Electronics Research Laboratory,
Baldock, Herts, England*

I. Introduction	247
II. The Fundamental Equations for the Steady State	249
III. The Linear Magnetron with Zero Tangential Emission Velocities	251
IV. The Linear Magnetron with Non-Zero Tangential Emission Velocities	263
V. The Cylindrical Magnetron	277
VI. Alternative Theories	279
VII. Experimental Evidence	281
VIII. Summary and Discussion	283
References	289

A Review of Recent Work in Color Television

BY CHARLES J. HIRSCH, *Research Division, Hazeltine Corporation,
Little Neck, New York*

I. Scope	293
II. General Considerations	296
III. Acuity of the Eye	296
IV. Methods of Transmitting Color Television Pictures	303
V. Frequency Interleaving	309
VI. Color Information to Be Transmitted	312
VII. Transmission of the Video Information	316
VIII. NTSC Color Television Signal	316
IX. Problems and Their Solution in the NTSC Signal	333
X. Conclusion and Summary	346
References	362

Junction Transistor Applications

By J. S. SCHAFFNER, *General Electric Company Electronics Laboratory,
Syracuse, New York*

I. Introduction	367
II. Practical Representation of Junction Transistors	375
III. Linear Amplifiers	381
IV. Oscillators	394
V. Conclusions	397
References	397
Author Index	399
Subject Index	405
Cumulative Index, Volumes I-V	417
