

## CONTENTS

CONTRIBUTORS TO VOLUME VI . . . . .	v
PREFACE . . . . .	vii

### **Metallic Conduction at High Frequencies and Low Temperatures**

BY A. B. PIPPARD, *Royal Society Mond Laboratory, Cambridge, England*

I. Introduction . . . . .	1
II. Experimental Methods . . . . .	5
III. The Anomalous Skin Effect . . . . .	11
IV. Microwave Behavior of Superconductors . . . . .	35
References . . . . .	44

### **Relaxation Processes in Ferromagnetism**

BY ELIHU ABRAHAMS, *Physics Department, University of Illinois, Urbana, Illinois*

I. Introduction . . . . .	47
II. Magnetic Spectra . . . . .	49
III. Ferromagnetic Resonance . . . . .	56
IV. Theory of Ferromagnetic Relaxation Processes . . . . .	58
References . . . . .	66

### **Physical Properties of Ferrites**

BY J. SMIT AND H. P. J. WIJN, *Philips Research Laboratories, N. V. Philips' Gloeilampenfabrieken, Eindhoven-Netherlands*

I. Introduction . . . . .	70
II. The Ideal Material . . . . .	71
III. Sintered Ferrites . . . . .	95
IV. Ferrites in Electronics . . . . .	122
References . . . . .	133

### **Space Charge Limited Currents**

BY HENRY F. IVEY, *Research Department, Lamp Division, Westinghouse Electric Corporation, Bloomfield, N. J.*

I. Introduction . . . . .	138
II. Complete Space Charge . . . . .	140
III. Space Charge Limited Currents at Relativistic Velocities . . . . .	158
IV. Effect of Filament Voltage Drop . . . . .	160
V. Effect of Magnetic Field of Heating Current . . . . .	163
VI. Partial Space Charge—Emitter Field . . . . .	166
VII. Effect of Initial Velocities . . . . .	170
VIII. Space Charge in Gases . . . . .	194

IX. Space Charge in Beams . . . . .	209
X. Space Charge in "Double Diodes" and Cavities. . . . .	234
XI. Space Charge in Solids. . . . .	243
References . . . . .	251

### A Comparison of Analogous Semiconductor and Gaseous Electronics Devices

By W. M. WEBSTER, *RCA Laboratories, Princeton, N. J.*

I. Introduction . . . . .	257
II. Fundamental Aspects . . . . .	259
III. Existing Gas Tubes and Junction Devices . . . . .	274
IV. Theoretical Limitations of Semiconductor Devices. . . . .	283
References . . . . .	293

### The Electron Microscope—A Review

By M. E. HAINE, *Associated Electrical Industries, Ltd., Research Laboratories, Aldermaston Court, Aldermaston, Berks., England*

I. Introduction . . . . .	296
II. Resolving Power . . . . .	297
III. Image Contrast. . . . .	301
IV. The Magnetic Objective Lens. . . . .	309
V. Electrostatic Lenses. . . . .	320
VI. Possible Methods for the Correction of Spherical Aberration . . . . .	323
VII. Astigmatism . . . . .	331
VIII. The Projector Lens . . . . .	342
IX. The Electron Gun. . . . .	344
X. The Object Stage . . . . .	349
XI. Alignment and Focusing. . . . .	352
XII. Vacuum . . . . .	355
XIII. Special Features Incorporated in Some Practical Designs. . . . .	357
XIV. Other Forms and Modifications of the Electron Microscope. . . . .	363
XV. Conclusions. . . . .	366
References . . . . .	367

### Traveling-Wave Tubes

By RUDOLF G. E. HUTTER, *Research Laboratories, Sylvania Electric Products Inc., Bayside, New York*

I. Introduction . . . . .	372
II. Description of Traveling-Wave Tubes . . . . .	373
III. Theory of Traveling-Wave Tubes. . . . .	379
IV. Performance and Application of Traveling-Wave Tubes . . . . .	454
References . . . . .	459

### Paramagnetism

By J. VAN DEN HANDEL, *Kamerlingh Onnes Laboratory, University of Leiden, Leiden, The Netherlands*

I. Introduction . . . . .	463
II. Atomic Theoretical Basis for the Magnetic Moments . . . . .	465
III. Experimental Methods for Susceptibility Measurements . . . . .	470

IV. Some Experimental Results. . . . .	474
V. Theoretical Treatment of the Magnetic Phenomena . . . . .	477
VI. Behavior of the Magnetic Ions in Crystals . . . . .	480
VII. Magnetorotation . . . . .	486
VIII. Magnetic Properties of Metals Like Sodium and Silver. . . . .	489
IX. Paramagnetic Relaxation. . . . .	490
X. Paramagnetic Resonance. . . . .	500
XI. Adiabatic Demagnetization. . . . .	505
XII. Some Remarks on Antiferromagnetism. . . . .	514
References . . . . .	516
Author Index. . . . .	519
Subject Index. . . . .	528
