

## CONTENTS

CONTRIBUTORS TO VOLUME XI . . . . .	v
PREFACE . . . . .	vii

### Recent Advances in Photoemission

P. GÖRLICH

I. Introduction . . . . .	1
II. Photoemission in the I-V and II-V Compounds . . . . .	3
III. Photoemission of Alkali-Oxide and Alkaline-Earth-Oxide Layers . . . . .	15
IV. Photoemission of the I-III, I-IV, and I-VI Layers and of the Model Semiconductors . . . . .	19
V. Emission of Photoelectrons from Metals into Semiconductors . . . . .	22
VI. Photoemission from Metals and Semiconductors in the Vacuum Ultraviolet . . . . .	23
VII. Behavior of Compound Photocathodes in the Glow Discharge . . . . .	24
VIII. Surface and Volume Photoeffect . . . . .	25
IX. Theoretical Suggestions . . . . .	27
X. Conclusion . . . . .	28
References . . . . .	28

### Parity Nonconservation in Weak Interactions

R. M. STERNHEIMER

I. Introduction . . . . .	31
II. The Proposals of Lee and Yang for Experiments on Parity Nonconservation in Weak Interactions . . . . .	33
III. The Experiments of Wu <i>et al.</i> on the $\beta$ -Decay of Oriented $\text{Co}^{60}$ Nuclei. Experiments on $\text{Co}^{60}$ . . . . .	38
IV. The Experiment of Friedman and Telegdi on the Positron Asymmetry in the $\pi^+-\mu^+-e^+$ Decay . . . . .	42
V. The Two-Component Theory of the Neutrino . . . . .	43
VI. The Experiment of Garwin, Lederman, and Weinrich on the $\pi-\mu-e$ Decay . . . . .	49
VII. Circular Polarization of the Bremsstrahlung Emitted by Longitudinally Polarized Electrons . . . . .	52
VIII. Determination of the Longitudinal Polarization of $\beta$ -Rays by the Method of Scattering on Polarized Electrons (Møller Scattering) . . . . .	57
IX. Determination of the Polarization of Electrons from $\beta$ -Decay by Mott Scattering of the Electrons on Nuclei . . . . .	67
X. Experiments on the Longitudinal Polarization of Positrons from $\beta$ -Decay. $\beta$ - $\gamma$ Circular Polarization Correlation Experiments . . . . .	76
Acknowledgments . . . . .	83
References . . . . .	83

**Quantum Efficiency of Detectors for Visible and Infrared Radiation**

R. CLARK JONES

I. Introduction and Summary . . . . .	88
II. Responsive Quantum Efficiency . . . . .	92
III. Detective Quantum Efficiency . . . . .	94
IV. Detectivity and Contrast Detectivity . . . . .	107
V. Photoemissive Tubes . . . . .	113
VI. Photoconductive Cells . . . . .	121
VII. Television Camera Tubes . . . . .	128
VIII. Photographic Negatives . . . . .	140
IX. Human Vision . . . . .	154
X. Other Detectors . . . . .	170
References . . . . .	178

**Automatic Data Processing in the Physical Sciences**

G. E. BARLOW, J. A. OVENSTONE, AND F. F. THONEMANN

I. Introduction . . . . .	185
II. Automatic Data Processing and the Experiment . . . . .	186
III. An Example of a Data-Processing System . . . . .	189
IV. The Acquisition, Storage, and Conversion of Data . . . . .	192
V. The Calculation and Display Stage . . . . .	208
VI. Examples of Automatic Systems . . . . .	214
VII. Conclusion . . . . .	220
Acknowledgment . . . . .	221
References . . . . .	221

**Operational Amplifiers**

R. L. KONIGSBERG

I. Introduction . . . . .	225
II. The Basic Parallel Feedback-Operational Amplifier Network . . . . .	227
III. The Laplace Transform and Transfer Function Concept . . . . .	231
IV. The Analysis of the Parallel Feedback-Operational Amplifier Network . . . . .	237
V. Illustrations of Operations . . . . .	244
VI. Applications of Operational Amplifiers in Computing and Measuring Systems . . . . .	252
VII. Discussion of Errors . . . . .	258
VIII. Developments in Operational Amplifier Design . . . . .	270
Acknowledgments . . . . .	283
References . . . . .	283

**Radio Telemetry**

HENRY B. RIBLET

I. Introduction . . . . .	288
II. General System Considerations . . . . .	288
III. Frequency-Division Systems . . . . .	308
IV. Time-Division Systems . . . . .	316

V. Ground Receiving Equipment . . . . .	327
VI. Data Processing and Analysis . . . . .	343
VII. Test Equipment . . . . .	346
VIII. Conclusions . . . . .	349
References . . . . .	352

**Electron Diffraction Structure Analysis and the  
Investigation of Semiconducting Materials**

Z. G. PINSKER

Translated by Lewis B. Leder

I. Introduction . . . . .	355
II. State of the Electron-Diffraction Method of Investigating Solids at the Present Time. . . . .	357
III. Investigations of the Structure of Semiconducting Phases . . . . .	380
Acknowledgment . . . . .	410
References . . . . .	411

**Secondary Electron Emission from Solids**

O. HACHENBERG AND W. BRAUER

I. Introduction . . . . .	413
II. Qualitative Connection of the Different Elementary Processes . . . . .	414
III. Experimental Results . . . . .	416
IV. Theory of Secondary Emission . . . . .	455
References . . . . .	498
AUTHOR INDEX . . . . .	501
SUBJECT INDEX . . . . .	511
