CONTENTS

List of Contributors v

Foreword vii

Preface viii

The Potentialities of Photo-Electronic Imaging Devices for Astronomical Observations. By W. A. Baum 1

La Photographie Electronique. By A. Lallemand, M. Duchesne and G. Wlérick 5

Image Tube Research at Yerkes Observatory. By W. A. Hiltner and Peter Pesch 17

Astronomical Tests of Barrier-Membrane Image Converters. By J. S. Hall, W. K. Ford, jr., and W. A. Baum 21

An Image Intensifier with a Thin End-Window. By B. Zacharov and S. Dowden 31

Image Intensifier Developments in the RCA Electron Tube Division. By R. G. Stoudenheimer 41

The Transmission Secondary Emission Image Intensifier. By M. M. Wachtel, D. D. Doughty and A. E. Anderson 59

Field Emission in Image Tubes. By Sanford F. Essig 73

An Electron Image Multiplier. By J. D. McGee, E. A. Flinn and H. D. Evans . 87

The Channeled Image Intensifier. By J. Burns and M. J. Neumann 97

Le Gain Possible de Résolution dans l'Observation Astronomique par l'Emploi de la Camera Electronique de Lallemand. By J. Rösch 113

Image Tubes in Nuclear Physics. By P. E. Condon 123

Amplification of Transient Images in High-Gain Photocathode-Phosphor Image-Intensifier Systems. By Arthur Roberts 135

The Regenerative Image Intensifier and Its Application to the Luminescent Chamber. By Martin L. Perl and Lawrence W. Jones 153

The Low Light Level Performance of the Intensifier Orthicon. By G. A. Morton and J. E. Ruedy 183

Some Early Trials of Astronomical Photography by Television Methods. By R. K. H. Gebel and Lee Devol 195

The Tri-alkali Stabilized C.P.S. Emitron: A New Television Camera Tube of High Sensitivity. By D. J. Gibbons 203

Charge Integration Experiments with a C.P.S. Emitron. By R. P. Randall . . . 219

Experiments with a Simple Photo-Electronic Storage Tube. By W. Heimann . . 235

An Experimental Image Storage Tube for the Detection of Weak Optical Images of Low Contrast. By R. L. Beurle and N. A. Slark 247

An Infra-Red-Sensitive Television Camera Tube. By S. Taylor 263

On the Signal-to-Noise Ratio in Television Storage Tubes. By R. Theile 277

Signal-to-Noise Ratio of Image Devices. By E. F. De Haan 291

An Isophote Converter for Use with Signal-Generating Image Tubes. By Edwin W. Dennison 307

The Application of Image Storage Tubes to the Observation of Optical Diffraction Patterns. By F. Fowweather and J. Harbour 311
An Image Intensifier for the Electron Microscope. By M. E. Haine, A. E. Ennos and P. A. Einstein 317
Image Intensification Using a Flying-Spot X-Ray Tube. By C. A. Greatorex . . 327
An X-Ray Sensitive Photoconductive Pick-up Tube. By C. W. Smith 345
X-Ray Image Intensification Using Optical Television Methods. By G. A. Hay . . 363
X-Ray Image Intensifier Using Image Orthicon Tubes. By E. Garthwaite . . 379
Author Index 389
Subject Index 392
