

CONTENTS

CONTRIBUTORS TO VOLUME XIV	v
PREFACE	vii

The Electron as a Chemical Entity

C. G. B. GARRETT

I. Introduction	1
II. Theoretical Section	2
III. Experimental Section	12
References	34

Problems of Photoconductivity

P. GÖRLICH

I. Introductory Considerations on Photoconductivity	37
II. Photoconduction in the Base Lattice and Tail Absorption Regions	39
III. Theoretical Problems in Photoconductivity	40
IV. Dislocations	57
V. Negative Photoconduction	58
VI. Surface Conditions	60
VII. Ohmic and Unidirectional Contacts, <i>pn</i> -Junctions	64
VIII. Photoelectromagnetic Effects	67
IX. Application of Photoconductors	70
X. Conclusion	80
List of Symbols	80
References	81

Strong-Focusing Lenses

ALBERT SEPTIER

I. Theoretical Properties to First Order	86
II. Aberrations	140
III. Practical Realization of Lenses and Measurement of Fields	160
IV. Experimental Study of the Optical Properties	183
References	203

Hydrogen Thyratrons

SEYMOUR GOLDBERG AND JEROME ROTHSTEIN

I. Introduction	207
II. Progress in Hydrogen Thyratron Construction and Techniques	208

III. Operation of Hydrogen Thyratrons	219
IV. Conclusion	262
References	263

Cerenkov Radiation at Microwave Frequencies

HERBERT LASHINSKY

I. Introduction	265
II. General Theory of the Cerenkov Effect	268
III. Theory of the Cerenkov Effect at Microwave Frequencies	275
IV. Design of Cerenkov Microwave Devices	285
V. Conclusion	295
References	296

High-Power Axial-Beam Tubes

T. MORENO

I. Introduction	299
II. Problems Common to High-Power Klystrons and Traveling-Wave Tubes	300
III. Progress in High-Power Klystron Design	313
IV. Progress in High-Power Traveling-Wave Tube Design	321
References	329
AUTHOR INDEX	331
SUBJECT INDEX	336
