FOREWORD	vii

Electrons as a Hydrodynamical Fluid

RICHARD G. FOWLER

List of Symbols	1
I. Electrons as Mechanical Entities	2
II. Fluid Dynamics of Electrons and Plasmas	8
III. Electrical Behavior of the Driver	28
IV. A Survey of Various Experimental Plasmadynamical Situations	43
V. Summary	55
References	55

Plasma Oscillations

K. G. EMELEUS

I. Introduction	59
II. Outline of Basic Theory	63
III. Injected Electron Oscillations	69
IV. Stimulated Ion Waves	73
V. Spontaneous Electron Oscillations	74
VI. Spontaneous Ion Oscillations	84
VII. Note on Effects of Magnetic Fields	87
VIII. Radiation from Oscillating Plasmas	88
IX. Sheath Oscillations	89
X. Waves of Stratification (Stimulated Ionization Waves)	89
XI. Moving Striations (Self-Excited Ionization Waves)	91
XII. Use of Probes	93
References	95

Flame Plasmas

A. VON ENGEL AND J. R. COZENS

I. Introduction	99
II. General Observations and Earlier Researches	100
III. Combustion Reactions in Flames	108
IV. Ionization in Flames	113
V. Physical Properties of Flame Plasmas	125
VI. Electrical Measurements	134
VII. Charge Balance in Flames	138
VIII. Special Types of Flame Plasmas (Atomic Flames and Discharge Plasmas)	142
IX. Conclusions	143
References	144

Solar Radio Astronomy

A. BOISCHOT AND J. F. DENISSE

I. Introduction	147
II. Emission and Propagation of Radio Waves	151
III. The Quiet Sun	156
IV. Radio Waves from Solar Activity	160
V. Solar Radio Astronomy and Geophysics	190
VI. Conclusion	194
References	195

Tropospheric Propagation

P. L. RICE AND J. W. HERBSTREIT

I. Introduction	199
II. System Loss and Transmission Loss	202
III. Model Atmospheres	208
IV. Propagation through Stratified Atmospheres	217
V. Propagation through Turbulent Atmospheres	220
VI. Atmospheric Absorption and Reradiation	226
VII. Reflection, Diffraction, and Scattering by Smooth Surfaces and by Uniformly Rough Surfaces	232
VIII. Propagation over Irregular Terrain	239
IX. Phase Interference Fading and Long-Term Power Fading	245
X. Service Probability	252
XI. Synopsis	256
References	256

Electronics and the Blind

PETER G. SHRAGER AND CHARLES SÜSSKIND

I. General Considerations	261
II. Guidance Devices	262
III. Methods of Sensory Stimulation	281
IV. Industrial Aids for the Blind	290
V. Reading Machines	291
VI. Artificial Vision by Direct Stimulation of the Brain	292
VII. Some Engineering Contributions to Diagnosis of Visual Disease	297
References	298
AUTHOR INDEX	303
SUBJECT INDEX	312
CUMULATIVE AUTHOR INDEX, VOLUMES 1-20	317
CUMULATIVE SUBJECT INDEX, VOLUMES 1-20	325
