| CONTRIBUTORS TO VOLUME 25 | v |
| FOREWORD | vii |

Linear Ion Accelerators

EDWARD L. HUBBARD

| | |
|--|----|
| I. Introduction | 2 |
| II. Accelerating Structures | 6 |
| III. Longitudinal Motion | 27 |
| IV. Transverse Motion | 38 |
| V. RF Cavity Design Parameters | 52 |
| VI. Sources of RF Power | 56 |
| VII. Field Distribution in Long Linac Cavities | 64 |
| VIII. Injection | 70 |
| IX. Applications of Linacs | 76 |
| X. Superconducting Linacs | 85 |
| List of Symbols | 87 |
| References | 89 |

The Hall Effect and Its Applications

S. STRICKER

| | |
|--|-----|
| I. Theory of Hall Effects | 98 |
| II. Relations between Galvanomagnetic and Thermomagnetic Effects | 103 |
| III. Hall Effect Devices: Definitions and General Properties | 105 |
| IV. Application of Hall Effect Devices | 118 |
| V. Description of Devices | 120 |
| VI. Error Sources in Hall Effect Devices | 137 |
| VII. Conclusions | 141 |
| References | 142 |

Recent Theoretical Advances in the Terrestrial Propagation of VLF Electromagnetic Waves

JAMES R. WAIT

| | |
|---|-----|
| I. Introduction | 145 |
| II. Propagation along a Spherical Surface | 146 |
| III. Introduction of the Sky Waves | 151 |
| IV. Accounting for the Multiple Reflections | 153 |

| | |
|---|-----|
| V. The Flat Earth Limit | 156 |
| VI. Earth-Detached Modes | 158 |
| VII. Some Concrete Results | 158 |
| VIII. The Planar Analog | 168 |
| IX. Extension to an Inhomogeneous Ionosphere | 180 |
| X. Extension to Anisotropic Ionosphere | 184 |
| XI. Comparison with Some Experimental Data | 188 |
| XII. Propagation in the Earth-Ionosphere Waveguide with Slowly Varying Changes in Height | 194 |
| XIII. Mode Conversion Effects | 196 |
| XIV. Mode Conversion in Cascaded Transition Sections | 201 |
| XV. Concluding Remarks | 203 |
| Appendix A: Approximation of the Spherical Wave Functions | 203 |
| Appendix B: Scattering Coefficients $\hat{S}_{n,m}$ for an Abrupt Day-Night Transition | 204 |
| References | 207 |

Thermionic Cathodes

P. ZALM

| | |
|--|-----|
| I. Introduction | 211 |
| II. Barium Oxide as a Semiconductor | 215 |
| III. The Oxide-Coated Cathode | 245 |
| IV. Adsorption and Semiconducting Properties | 255 |
| References | 272 |

Resolution in Electron Microscopy

E. ZEITLER

| | |
|--|-----|
| I. Introduction | 277 |
| II. Contrast Transfer | 279 |
| III. Diffraction Theory of Electron-Optical Images | 281 |
| IV. Conclusions from the Theory | 285 |
| V. Resolution in Lattice Images | 289 |
| VI. Images of Thin Films | 295 |
| VII. Visibility of Atoms | 302 |
| VIII. Resolution and the Third Dimension of the Object | 309 |
| IX. Resolution of the Photographic Recorder | 313 |
| X. Resolution and Vision | 321 |
| XI. Conclusion | 329 |
| References | 330 |
| AUTHOR INDEX | 333 |
| SUBJECT INDEX | 341 |
