FOREWORD . . . . .	vii

## The Contribution of Swarm Techniques to the Solution of Some Problems in Low Energy Electron Physics

R. W. CROMPTON

I. Introduction . . . . .	1
II. A Comparison of Beam and Swarm Experiments . . . . .	2
III. Analysis of the Results of Swarm Experiments . . . . .	5
IV. The Accuracy of Transport Coefficient Measurements . . . . .	7
V. Low Energy Collision Cross Section from Swarm Measurements . . . . .	9
VI. Conclusion . . . . .	17
References . . . . .	18

## Magnetic Coherence Resonances and Transitions at Zero Frequency

E. GENEUX, G. J. BÉNÉ, and J. PERRENOUD

I. Introduction . . . . .	19
II. Magnetic Coherence Resonances . . . . .	20
III. Transitions at Zero Frequency . . . . .	46
IV. Conclusions . . . . .	56
References . . . . .	56

## Mass Spectroscopy Using RF Quadrupole Fields

P. H. DAWSON and N. R. WHETTEN

I. Introduction . . . . .	60
II. Charged Particle Motion in Quadrupole Fields . . . . .	63
III. The Quadrupole Mass Filter . . . . .	81
IV. The Monopole Mass Spectrometer . . . . .	120
V. The Three-Dimensional Quadrupole Ion Trap . . . . .	143
VI. Nonlinear Resonances in Quadrupole Fields . . . . .	170
VII. Summary and Future Trends . . . . .	178
Appendix: Commercially Available Instruments . . . . .	181
References . . . . .	181

## Theory of the Generation of Harmonics and Combination Frequencies in a Plasma

MAHENDRA SINGH SODHA and PREDHIMAN KRISHAN KAW

I. Introduction . . . . .	188
II. Boltzmann Transfer Equation . . . . .	190

III. Harmonic and Combination Frequency Components in Current Density . . . . .	199
IV. Propagation of the Harmonic and Combination Frequency	
Electromagnetic Waves in a Plasma . . . . .	241
V. Conclusion . . . . .	270
Appendix A. Evaluation of the Components of Distribution Function for an Homogeneous Plasma . . . . .	271
Appendix B. Limitation of the Analysis in the Presence of a dc Field . . . . .	275
Appendix C. Components of the Distribution Function in an Homogeneous Magnetoplasma . . . . .	276
Appendix D. Components of the Distribution Function for an Inhomogeneous Plasma . . . . .	278
Appendix E. Components of the Collision Integrals for an Inhomogeneous Magnetoplasma . . . . .	284
Appendix F. Justification of Retaining Terms up to $f^2$ Only . . . . .	285
References . . . . .	291

**A Review of Reflex and Penning Discharges**

E. B. HOOPER, JR.

I. Introduction . . . . .	295
II. Cold Cathode Discharge . . . . .	298
III. Thermionic Cathode Discharge . . . . .	318
IV. Additional Discharges and Experiments of Interest . . . . .	325
V. Practical Applications of the Penning Discharge . . . . .	327
Appendix A. Important Instabilities in the Reflex Discharge . . . . .	328
Appendix B. Electric Fields Parallel to Magnetic Fields in Discharges . . . . .	331
References . . . . .	333
 AUTHOR INDEX . . . . .	 345
SUBJECT INDEX . . . . .	353
