

CONTENTS

CONTRIBUTORS TO VOLUME 31	vii
FOREWORD	ix

Chemical Lasers

P. H. DAWSON AND G. H. KIMBELL

I. Introduction	1
II. General Conditions for Lasing Action	3
III. The Vibrational Transition	5
IV. The Pumping Reaction	9
V. Relaxation of the Excited State	16
VI. Characteristics Favorable to Chemical Laser Action.	26
VII. Some Laser Systems	29
VIII. Conclusion	35
References	36

Single Photon Detection and Timing: Experiments and Techniques

SHERMAN K. POULTNEY

I. Introduction	39
II. Single Photon Detection	42
III. Fast Timing with Single Photons	69
IV. Single Photon Detection with Moderate Timing Requirements.	105
Appendix: Summary of Photomultiplier Notation	114
References	114

Advances in Satellite Communications

P. L. BARGELLINI AND E. S. RITTNER

I. Introduction	119
II. The INTELSAT System	123
III. The Orbita System	127
IV. Systems Considerations	128
V. Spectrum and Orbit Utilization	130
VI. Modulation, Multiplexing, and Multiple Access	134
VII. Electron Devices	137
VIII. Materials Technology	155
IX. Future Trends	157
References.	158

Acoustoelectric Interactions in III-V Compound Semiconductors

W. J. FLEMING AND J. E. ROWE

I. Introduction	162
II. General Theory of Off-Axis Acoustoelectric Interactions	166
III. Exact Solution of the Acoustoelectric Interaction for Collinear Static Fields	176
IV. Solution of the Acoustoelectric Interaction for Arbitrarily Oriented Static Fields and On-Axis Acoustic-Wave Propagation	185
V. Solution of the Acoustoelectric Interaction for Arbitrarily Oriented Static Fields and Off-Axis Acoustic-Wave Propagation	206
VI. Solution of the Acoustoelectric Interaction for Electron-Hole Carrier Transport and Off-Axis Acoustic-Wave Propagation	234
VII. Summary	242
References	244

Current Saturation Mechanisms in Junction Field-Effect Transistors

EDWARD S. YANG

I. Introduction	247
II. Review of the Literature	249
III. Governing Equations	250
IV. Gradual Channel Approximation (GCA)	251
V. Saturation Models	253
VI. Numerical Calculation	257
VII. Current Saturation in MOSFETs	263
VIII. Conclusion	264
References	264

Electronic Engineering in River and Ocean Technology

RICHARD O. ROWLANDS

I. Introduction	267
II. Water Quality Measurement	268
III. Surface Waves	274
IV. Tides	276
V. Ocean Currents	277
VI. Navigation	280
VII. Sonar Application	283
VIII. Fishing	293
IX. Helium Speech Processing	295
X. Data Transmission	295
References	299
AUTHOR INDEX	301
SUBJECT INDEX	308
