CONTENTS OF VOLUME B	xxiii

Electronography

A Lallemand Electronic Camera Focused by a Superconducting Magnetic Coil. By J. P. PICAT, A. CHEVILLOT, M. COMBES, P. FELENBOK AND B. FORT	1
Development of a New Kind of Lallemand Camera. By J. BAUDRAND, M. COMBES, P. FELENBOK, B. FORT AND J. P. PICAT	7
Extended Field Spectracon. By J. D. MCGEE, H. BACIK, C. I. COLEMAN AND B. L. MORGAN	13
Sources of Spurious Background in the Spectracon. By M. OLIVER.	27
Electronographic Image Tube Development at the Royal Greenwich Observatory. By D. McMULLAN, J. R. POWELL AND N. A. CURTIS	37
Linearity and Optimum Working Density of Optical and Nuclear Emulsions. By M. COHEN AND E. KAHAN	53
Properties of Commercial Electron-sensitive Plates for Astronomical Electronography. By P. GRIBOVAL, D. GRIBOVAL, M. MARIN AND J. MARTINEZ	67

Image Tubes (Including Channel Multiplier Arrays)

The Proximity Focused Diode Image Intensifier. By J. GOODSON, A. J. WOOLGAR, J. HIGGINS AND R. F. THUMWOOD	83
A Magnetically Focused Image Intensifier Employing Evaporated Field Electrodes. By C. B. JOHNSON	93
Further Research on the Imperial College Cascade Image Intensifier. By F. C. DELORI, R. W. AIREY AND J. D. MCGEE	99
A Flat Channel System for Imaging Purposes. By V. JAREŠ AND M. DVOŘÁK	117
A High-gain Channel Electron Multiplier (CEM) Array and Some of Its Operational Characteristics. By W. BAUMGARTNER AND U. ZIMMERMAN	125
Some Aspects of the Design and Performance of a Small High-Contrast Channel Image Intensifier. By D. L. EMBERSON AND R. T. HOLMSHAW	133

Characteristics and Performance of a Microchannel Image Intensifier Designed for Recording Fast Luminous Events. By J. GRAF, M. FOUASSIER, R. POLAERT AND G. SAVIN	145
Channel Electron Multiplier Plates in X-Ray Image Intensification. By I. C. P. MILLAR, D. WASHINGTON AND D. L. LAMPORT	153
Reduction of the Relative Variance of the Single-Electron Response at the Output of a Microchannel Plate. By V. CHALMETON AND G. ESCHARD	167
Ion Feedback Noise in Channel Multipliers. By W. M. SACKINGER AND G. A. GISLASON	175
An Analysis of the Direct Current Operation of Channel Electron Multipliers. By K. OBA AND H. MAEDA	183

Signal Generating Tubes

A Supersensitive Camera Tube Incorporating a Silicon Electron-Multiplication Target. By S. MIYASHIRO AND S. SHIROUZU	207
TV Camera Tubes with Large Silicon Diode Array Targets Operating in the Electron Bombarded Mode. By V. J. SANTILLI AND G. B. CONGER III	219
Uniform Layer Hetero-junction Targets for Television Camera Tubes. By J. A. HALL	229
A Magnetically Focused SEC Camera Tube. By K. SATO AND M. TAKAHASHI	241
A Proximity Focused Ultraviolet-sensitive SEC Camera Tube. By P. R. COLLINGS, L. G. HEALY, A. B. LAPONSKY AND R. A. SHAFFER.	253
Pick-up Storage Tube having an Electronic Shutter, Automatic Exposure Control, Wobbling Correction, and Slow Scanning. By T. HIRUMA, Y. SUZUKI AND K. KURASAWA	263
Infrared Pick-up Tube with Electronic Scanning and Uncooled Target. By D. R. CHARLES AND F. LE CARVENNEC	279
Thermal Imaging with Pyroelectric Television Tubes. By E. H. PUTLEY, R. WATTON, W. M. WREATHALL AND S. D. SAVAGE	285
Characteristics of a New Camera Tube with a CdSe Photoconductive Target. By K. SHIMIZU, O. YOSHIDA, S. AIHARA AND Y. KIUCHI	293
Possibilities of Eliminating the Circular, Spurious Signals in Vidicons Caused by Secondary Emission. By V. JAREŠ	307
Imaging, Beam-acceptance and Beam-discharge Lag in Camera Tubes. By J. HASKER	317
Beam-current-induced Dark Current in Plumbicons. By TH. G. SCHUT.	319

- Optical Writing and Erasing with Bistable-Phosphor Storage Tubes. By
B. KAZAN AND I. F. CHANG. 331

Photocathodes and Phosphors

- Multialkali Photocathodes. By B. R. C. GARFIELD 339

- Some Physico-chemical Aspects of the Synthesis of Antimonide Photo-
cathodes. By E. KANSKY 357

- Optical and Photoelectric Properties of Multialkali Photocathodes. By
E. L. HOENE 369

- A Method of Testing the Effectiveness of a Protective Coating Layer on
any Glass Surface against Alkali Vapours. By M. HIRASHIMA, T. SANO
AND M. ASANO 381

- Measurement of Electron Diffusion Length by Photo-luminescence in p-
Doped GaAs Substrates and p-Doped Epitaxially Grown GaAs Photo-
cathodes. By G. LENGYEL, S. NARDONE AND D. POMMERENIG 389

- Photoresponse Beyond the Absorption Edge in Silicon p-n Junctions.
By S. MARDIX AND G. SADASIV 409

- Etude d'un Spectrographe Fournissant les Distributions Angulaire et
Energetique des Photoélectrons. By F. PAUTY, H. DESBOIS AND
P. VERNIER 415

- Utilisation d'une Caméra Electronique Pour Etudier l'Evolution de Seuil
Photoélectrique de Couches Minces d'Or Deposées sous Ultra-vidé.
By L. MATHEY, J. M. PLOCIENNIK AND P. VERNIER 423

- Absolute Photoelectric Emission Statistics of Aluminium, Silver and
Potassium Chloride in the Ultra-soft X-Ray Region. By J. S. HUGHES,
W. L. WILCOCK AND D. G. SMITH 433

- Negative Electron Affinity Secondary Emitters and Cold Cathodes.
By B. F. WILLIAMS, R. U. MARTINELLI AND E. S. KOHN 447

- Electron Emission from Forward Biased p-n Junctions. By P. J. DEASLEY
AND K. R. FAULKNER 459

- Caesium Activated CsI Transmission-type Secondary Emission Dynode.
By M. HAGINO, S. YOSHIZAKI, M. KINOSHITA AND R. NISHIDA 469

- Modulation Transfer Function and Background of Various Image Intensi-
fier Output Screens. By K. FRANZ, G. KOCHMANN AND R. LAHMANN 483

- The Photoemitter-Membrane Light Modulator Image Transducer. By
L. E. SOMERS 493

Electron Optics

- Combined Electrostatic Focusing and Deflection. By W. M. VAN ALPHEN 511

- Combined Magnetic Deflection and Focusing in a Pick-up Tube with the
Scanning Focus Coil. By L. M. SWART AND H. J. VAN ROOY 527

Electron Beam Scanning. By N. C. BARFORD	535
Distortion of Electron Images Focused by Almost Uniform Electric and Magnetic Fields. By J. D. H. PILKINGTON AND K. F. HARTLEY	545
The Electronic Camera Used in a Reflection Mode. By J. P. PICAT, M. COMBES, P. FELENBOK AND B. FORT	557
Electron-optical Transfer Functions of Image Intensifiers. By H. MULDER	563
The Use of Meshes to Reduce the Effect of Errors in Certain Types of Electron Tube. By B. J. MAYO AND A. W. BENNETT	571
