FOREWORD	ix

Intraband Magneto-Optical Studies of Semiconductors in the Far Infrared. I

BRUCE D. MCCOMBE AND ROBERT J. WAGNER

I. Introduction	1
II. Theoretical Background	2
III. Experimental Techniques	17
IV. Free Carrier Resonances	28
References	75

The Gyrator in Electronic Systems

K. M. ADAMS, E. F. A. DEPRETTERE, AND J. O. VOORMAN

I. Introduction	80
II. Reciprocity in Physical Systems	80
III. The Gyrator as Network Element	86
IV. Filters	94
V. Principles of Realization of the Gyrator	109
VI. Basic Electronic Design	128
VII. Basic Gyrator Measurements	145
VIII. Trends in Gyrator Design and Applications	170
IX. Conclusion	176
References	177

Image Sensors for Solid State Cameras

P. K. WEIMER

I. Introduction	182
II. Photoelements for Self-Scanned Sensors	183
III. Principles of Multiplexed Scanning in Image Sensors	187
IV. Early XY Image Sensors	193
V. Multiplexed Photodiode Arrays	198
VI. Principles of Scanning by Charge Transfer	202
VII. Charge-Transfer Sensors Employing Bucket Brigade Registers	208
VIII. Characteristics of Charge-Coupled Devices (CCD's)	213
IX. Experimental Charge-Coupled Image Sensors	225
X. Performance Limitations of Charge-Coupled Sensors	236
XI. Charge-Transfer Sensors as Analog Signal Processors	247
XII. Self-Scanned Sensors for Color Cameras	251

XIII. Peripheral Circuits for Solid State Sensors	253
XIV. Conclusions	257
References	259

Ion Implantation in Semiconductors

SUSUMU NAMBA AND KOHZOH MASUDA

I. Introduction	264
II. Concentration Profiles of Implanted Ions and Defects	271
III. Enhanced Diffusion	289
IV. Annealing and Electrical Properties	299
V. Measurement Technique	310
VI. Devices	325
References	328
