

CONTENTS

CONTRIBUTORS TO VOLUME 42	vii
FOREWORD	ix

Mass Spectroscopy

F. E. SAALFELD, J. J. DECORPO, AND J. R. WYATT

I. Introduction	2
II. Instrumental Design and Techniques	2
III. Surface Studies	5
IV. Ionization Processes	12
V. Ion-Molecule Studies	19
VI. High Temperature Studies	25
VII. Sampling of Reactive Species	28
References	35

Recent Advances in Silicon Solar Cells for Space Use

E. S. RITTNER

I. Introduction	41
II. Violet Cell	42
III. Nonreflective Cell	50
IV. Summary	53
References	54

Recent Applications of Electron Spectroscopy

D. BERÉNYI

I. Introduction	55
II. Instrumental Techniques	60
III. Observables in Electron Spectroscopy Measurements	70
IV. Main Fields of Application	80
V. Electron Spectroscopy in Solution of Practical Problems	101
VI. Conclusions and Perspectives	103
References	105

Laboratory Isotope Separators and Their Applications

S. B. KARMOHAPATRO

I. Introduction	113
II. Production and Formation of Intense Ion Beams.	118
III. Acceleration of Ions	135
IV. Mass Analyzers	137
V. Performance	146
VI. Collection	152

VII. Applications	157
VIII. Conclusions	168
References	169

Light-Emitting Devices, Part I: Methods

HERBERT F. MATARÉ

1. Introduction	179
2. Radiative and Nonradiative Recombination	185
3. Radiative Recombination and the Injection Process	189
References for Sections 1-3	195
4. Materials for Light Emitters.	195
References for Section 4	221
5. The Heterojunction	222
References for Section 5	242
Appendix to Section 5	243
References for Appendix	246
6. Methods of Junction Formation	246
References for Section 6	278
AUTHOR INDEX	281
SUBJECT INDEX	297
