

CONTENTS

CONTRIBUTORS TO VOLUME 56	ix
FOREWORD	xi

Recent Advances in High-Power Tunable Lasers (UV, Visible, and Near IR)

V. N. SMILEY

I. Introduction	2
II. Dye Laser Developments	3
III. Picosecond and Subpicosecond Tunable Sources	38
IV. Color Center Lasers	54
V. Nonlinear Coherent Sources	60
VI. Other High-Power Tunable Lasers	79
References	89

Radioastronomy on Millimeter Wavelengths

EMILE-JACQUES BLUM

I. Introduction	98
II. The Development of Millimeter Radioastronomy	99
III. Astrophysical Achievements and Prospects of Millimeter-Wave Astronomy	107
IV. Observing Conditions and Sites	114
V. Radiotelescope Fundamentals and the Millimeter Range	124
VI. Antennas	133
VII. Receivers	142
VIII. Evolution and Projects	152
References	159

Photovoltaic Effect

RICHARD H. BUBE AND ALAN L. FAHRENBRUCH

I. Introduction	163
II. An Overview of Photovoltaic Effects	166
III. Current Generation	189
IV. Junction Currents	193
V. Examples of Photovoltaic Materials Systems	200
References	211

Spin Polarization in Electron Scattering from Surfaces

D. T. PIERCE AND R. J. CELOTTA

I. Introduction	219
II. Spin-Dependent Parameters and Interactions	225
III. Experimental Apparatus	234
IV. Spin-Dependent Scattering Due to the Spin–Orbit Interaction	240
V. Spin-Dependent Scattering from Ferromagnetic Materials	261
VI. Outlook	281
References	284

Solid Surfaces Analysis

MICHAEL J. HIGATSBERGER

I. Introduction	291
II. Surface Analytical Techniques and Methods	294
References	356

The Inverse Discrete Radon Transform with Applications to Tomographic Imaging Using Projection Data

ALLEN G. LINDGREN AND PAUL A. RATTEY

I. Prologue	360
II. Introduction	360
III. The Continuous Radon Transform Pair	362
IV. Applications of the Radon Transform in Imaging	368
V. Historical Background and Review of Reconstruction Algorithms	372
VI. Properties of the Radon Transform	376
VII. Sampling the Radon Transform with Parallel-Beam Projections	380
VIII. Sampling the Radon Transform with Fan-Beam Projections	388
IX. The Inverse Discrete Radon Transform	394
X. Effects of Nonideal Sampling	401
XI. Conclusion	406
XII. Epilogue	407
References	408

Spectroscopy of Electrons from High-Energy Ion–Atom Collisions

D. BERÉNYI

I. Introduction	411
II. A Brief Survey of Instrumentation and Basic Concepts of Collision Mechanism	414
III. Projectiles of Intermediate Energy	417

CONTENTS

vii

IV. High-Energy Projectiles	432
V. Closing Remarks	437
References	438
AUTHOR INDEX	443
SUBJECT INDEX	461
