

CONTENTS

CONTRIBUTORS TO VOLUME 60	vii
FOREWORD	ix

Internal Conversion-Electron Spectroscopy

O. DRAGOUN

I. Introduction and Historical Remarks.	1
II. Theory of Internal Conversion	3
III. Experimental Methods	22
IV. Treatment of Experimental Data	43
V. Comparison of Theory with Experiment	60
VI. Role of Internal Conversion in Nuclear Spectroscopy	61
VII. Environmental Effects on Internal Conversion	71
VIII. Summary and Outlook	82
References	84

Diffraction of Neutral Atoms and Molecules from Crystalline Surfaces

G. BOATO AND P. CANTINI

I. Introduction	95
II. General Outline	98
III. Quantum Theory of Atom-Surface Scattering	111
IV. Structural Information from Elastic Diffraction	129
V. Information on the Surface Potential Well	138
VI. Information on Surface Lattice Dynamics	146
VII. Conclusions.	155
References	156

Digital Image Processing

B. R. HUNT

I. Introduction	161
II. Image Restoration (Deblurring)	163
III. Image Data Compression	192
IV. Reconstruction from Projections	207
V. Steps toward Image Analysis/Computer Vision	215
References	219

Recent Trends in Photomultipliers for Nuclear Physics

J. P. BOUTOT, J. NUSSLI, AND D. VALLAT

I. Introduction	223
II. State of the Art of Photomultiplier Technology	224
III. Present Situation on Main Photomultiplier Characteristics	262
IV. Conclusion	299
References	300

Thermal and Electrothermal Instabilities in Semiconductors

M. P. SHAW AND N. YILDIRIM

I. Introduction	307
II. The Thermistor	310
III. Thermally Induced Negative Differential Conductance.	321
IV. Thin Chalcogenide Films	332
V. Vanadium Dioxide	358
VI. Second Breakdown in Transistors	364
VII. Summary	369
Appendix	369
References	382
 AUTHOR INDEX	 387
SUBJECT INDEX	403
