

## CONTENTS

CONTRIBUTORS TO VOLUME 65 . . . . .	ix
PREFACE . . . . .	xi

### **Dyadic Green's Functions and Their Use in the Analysis of Microstrip Antennas** SÉRGIO BARROSO DE ASSIS FONSECA and ATTILIO JOSÉ GIAROLA

I. Summary . . . . .	2
II. Introduction . . . . .	3
III. Properties and Applications of Microstrip Antennas . . . . .	4
IV. Definition and Properties of Dyadic Functions and of Free-Space Dyadic Green's Functions. . . . .	7
V. Expansion of the Dyadic Green's Functions. Expressions of the Dyadic Green's Functions for Media with Plane Parallel and Cylindrical Layers. Calculation of the Asymptotic Expressions Using the Saddle Point Method . . . . .	11
VI. Analysis of the Effect of the Dielectric Substrate in the Radiation Pattern of Microstrip Disk Antennas. . . . .	32
VII. A Study of the Effects of a Dielectric Cover on the Radiation Characteristics of a Microstrip Ring Antenna. . . . .	42
VIII. Analysis of the Influence of the Dielectric Substrate on the Radiation Patterns of Microstrip Wraparound Antennas . . . . .	55
IX. Study of the Influence of Excitation of Surface Waves on the Radiation Efficiency of the Space Waves and the Directivity of a Microstrip Disk Antenna . . . . .	66
X. Conclusions . . . . .	88
References . . . . .	89

### **Ink-Jet Printing**

J. HEINZL and C. H. HERTZ

I. Introduction . . . . .	91
II. Drop-on-Demand Methods . . . . .	111
III. Methods Employing Continuous Jets . . . . .	132
IV. Methods Employing Mechanical Valves . . . . .	161
V. Conclusions . . . . .	163
References . . . . .	166

**Theory of Image Formation by Inelastically  
Scattered Electrons in the Electron Microscope**

H. KOHL and H. ROSE

I.	Introduction . . . . .	173
II.	The Mixed Dynamic Form Factor . . . . .	174
III.	Theory of Image Formation . . . . .	185
IV.	Numerical Results . . . . .	195
V.	Conclusion . . . . .	213
	Appendix . . . . .	214
	References . . . . .	224

**Dimensional Terms for Energy Transport by Radiation  
and for Electromagnetic Quantities—Comments on the SI System**

BERTHOLD W. SCHUMACHER

I.	Why Another Discussion of Dimensional Terms?. . . . .	229
II.	Dimensional Terms and Physical Concepts. . . . .	230
III.	Some Peculiar Aspects of the SI System . . . . .	235
IV.	Electric and Magnetic Quantities . . . . .	242
	Appendix I. Magnetic Field Quantities and Their Dimensions— Energy Densities and Forces in the Fields . . . . .	247
	Appendix II. Numbers for the Characterization of Particle Beams . . . . .	278
	Appendix III. Numerical Values for Energy Densities . . . . .	292

**Image Calculations in High-Resolution Electron Microscopy:  
Problems, Progress, and Prospects**

D. VAN DYCK

I.	Introduction . . . . .	296
II.	Principles of Image Formation . . . . .	297
III.	Present Status of Many-Beam Electron-Diffraction Calculations . . . . .	299
IV.	Systematic Approach to the Electron-Diffraction Problem. . . . .	308
V.	Study of Existing Many-Beam Diffraction Formulations . . . . .	316
VI.	A New Formulation: The Real-Space Method . . . . .	324
VII.	Recent Developments, Unsolved Problems, and Prospects for the Future . . . . .	337
	References . . . . .	353

**Theory of Surface Electronic Structure****E. WIMMER, H. KRAKAUER, and A. J. FREEMAN**

I. Introduction . . . . .	358
II. Theoretical Framework . . . . .	360
III. Approach and Methodology. . . . .	363
IV. Examples of Applications . . . . .	367
References . . . . .	429
INDEX . . . . .	435
