

CONTENTS

| | |
|---------------------------------|-----|
| CONTRIBUTORS TO VOLUME 66 | vii |
| PREFACE | ix |

Applied Problems of Digital Optics

L. P. YAROSLAVSKII

| | |
|---|-----|
| I. Introduction | 1 |
| II. Adaptive Correction of Distortions in Imaging and Holographic Systems | 5 |
| III. Preparation of Pictures | 45 |
| IV. Automatic Localization of Objects in Pictures | 68 |
| V. Synthesis of Holograms | 92 |
| References | 136 |

Two-Dimensional Digital Filters and Data Compression

V. CAPPELLINI

| | |
|--|-----|
| I. Introduction | 141 |
| II. Two-Dimensional Digital Filters | 142 |
| III. Local Space Operators | 152 |
| IV. Data Compression | 158 |
| V. Joint Use of Two-Dimensional Digital Filters and Data Compression | 173 |
| VI. Applications | 176 |
| References | 199 |

Statistical Aspects of Image Handling in Low-Dose Electron Microscopy of Biological Material

CORNELIS H. SLUMP and HEDZER A. FERWERDA

| | |
|---|-----|
| I. Introduction | 202 |
| II. Object Wave Reconstruction | 213 |
| III. Wave-Function Reconstruction of Weak Scatterers | 230 |
| IV. Parameter Estimation | 254 |
| V. Statistical Hypothesis Testing | 277 |
| Appendix A: The Statistical Properties of the Fourier Transform of the Low-Dose Image | 297 |

| | |
|---|-----|
| Appendix B: The Statistical Properties of an Auxiliary Variable | 299 |
| Appendix C: The Cramér–Rao Bound | 305 |
| References | 306 |

Digital Processing of Remotely Sensed Data

A. D. KULKARNI

| | |
|--|-----|
| I. Introduction | 310 |
| II. Preprocessing Techniques | 319 |
| III. Enhancement Techniques | 326 |
| IV. Geometric Correction and Registration Techniques | 343 |
| V. Classification Techniques | 355 |
| VI. System Design Considerations | 365 |
| VII. Conclusion | 367 |
| References | 367 |
| INDEX | 369 |
