

CONTENTS

PREFACE	vii
---------------	-----

The Status of Practical Fourier Phase Retrieval

R. H. T. BATES and D. MNYAMA

I. Introduction	1
II. Theoretical Background	5
III. Phase Problems	14
IV. Iterative Phase Refinement	21
V. Canterbury Algorithm	40
References	60

Lie Algebraic Theory of Charged-Particle Optics and Electron Microscopes

ALEX J. DRAGT and ETIENNE FOREST

I. Introduction	65
II. Lie Algebraic Tools	68
III. Simple Applications	70
IV. Lagrangians and Hamiltonians	75
V. Lie Calculus	81
VI. Paraxial Map for Solenoidal Lens	86
VII. Second- and Third-Order Effects for Solenoidal Lens	88
VIII. Spherical Aberration for a Simple Imaging System	92
IX. Correction of Spherical Aberration	96
X. Concluding Discussion	105
Appendix	115
References and Footnotes	117

The Universal Imaging Algebra

CHARLES R. GIARDINA

I. Introduction	121
II. Mathematical Morphology	127
III. Arithmetic Operations	144
IV. Topological Operations	150
V. Gray-Valued Mathematical Morphology	167
VI. The Universal Imaging Algebra	175
References	181

**Cathode Ray Tubes for Industrial and Military
Applications**

ANDRÉ MARTIN

I. Introduction	183
II. Electron Guns	186
III. Electrostatic Deflection and Deflection Amplification	209
IV. Electromagnetic Deflection	222
V. Phosphors and Screens	254
VI. Measurement Techniques	276
VII. Contrast Enhancement Techniques	288
VIII. Characteristics Achieved with Present CRTs	299
IX. Conclusion	322
References	323

Open-Circuit Voltage Decay in Solar Cells

V. K. TEWARY and S. C. JAIN

I. Introduction	329
II. Basic Formulation	333
III. OCVD in Base-Dominated Devices	346
IV. Effect of Emitter on OCVD	370
V. Quasi-Static Emitter Approximation and Its Applications in Solving Coupled Diffusion Equations for OCVD	383
VI. High Injection Effects on FCVD	395
Appendix: List of Symbols and Notations	411
References	413
INDEX	415
