

CONTENTS

PREFACE	vii
---------------	-----

Distance Measuring Equipment and Its Evolving Role in Aviation

ROBERT J. KELLY and DANNY R. CUSICK

I. Introduction	1
II. General Background to Distance Measuring Equipment Applications	3
III. The DME/N System	118
IV. Systems Considerations for the New DME/P International Standard	171
List of Acronyms	236
References	237

Einstein–Podolsky–Rosen Paradox and Bell’s Inequalities

W. DE BAERE

I. Introduction	245
II. The Einstein–Podolsky–Rosen Argumentation	246
III. The Bell Inequalities	273
IV. Experimental Verification of Bell’s Inequalities	304
V. Interpretation of Bell’s Inequalities and of Experimental Results	315
VI. Conclusions	325
References	327

Theory of Electron Mirrors and Cathode Lenses

E. M. YAKUSHEV and L. M. SEKUNOVA

I. Introduction	337
II. Equations of Motion	338
III. Electron-Optical Properties of Axially Symmetric Electron Mirrors	350
IV. Mirror Electron Microscope	372
V. Cathode Lenses	397
VI. Conclusion	414
References	415
INDEX	417
