

CONTENTS

CONTRIBUTORS VOLUME 71	vii
PREFACE	ix

Scanning Electron Acoustic Microscopy

LUDWIG JOSEF BALK

I. Introduction	1
II. Signal Generation and Contrast Mechanisms	4
III. Instrumentation	26
IV. Applications	39
V. Conclusions	69
Acknowledgments	70
References	71

Recent Progress in Particle Accelerators

F. T. COLE and F. E. MILLS

I. Introduction	75
II. Inventions and Developments	79
III. Beam Environment	87
IV. Statistical Methods and Quality Control	90
V. Superconducting Technology	92
VI. New Kinds of Accelerators	98
VII. Epilogue	105
References	105

Foundations of Environmental Scanning Electron Microscopy

G. D. DANILATOS

I. Introduction	110
II. State of Gas in the ESEM	115
III. Outline of General Interactions in the ESEM	134
IV. Electron Beam Profiles	138
V. The Electron Beam and Gas System	178
VI. Detection	193
VII. Contrast and Resolution	217
VIII. Beam Radiation Effects	223

IX. Operation and Applications	238
Acknowledgments	248
References	248

Optical and Acoustic Device Applications of Ferroelastic Crystals

STEVEN W. MEEKS and B. A. AULD

I. Introduction	251
II. Periodic Domain Walls and Ferroelastic Bubbles in NPP	256
III. Interaction of Optical and Acoustic Waves with Ferroelastic Domain Walls	292
IV. Optical and Acoustic Devices Using NPP Periodic Domain Wall Gratings	327
V. Conclusions and Future Directions	350
References	354

Applications of Scanning Electron Microscopy in Archaeology

SANDRA L. OLSON

I. Introduction	357
II. Preparation Methods for Archaeological Specimens	359
III. Applications of SEM to Archaeological Materials	361
IV. Conclusions	375
References	375

INDEX	381
