CONTRIBUTORS . . . . .	vii
PREFACE . . . . .	ix

### **The Optics of Round and Multipole Electrostatic Lenses**

L. A. BARANOVA AND S. YA. YAVOR

I. Introduction . . . . .	3
II. Equations of Motion of Charged Particles and Methods for Field Distribution Calculation . . . . .	9
III. The Basic Concepts of Paraxial Optics . . . . .	20
IV. Aberrations of Electrostatic Lenses. . . . .	36
V. Phase-Space Approach to Particle Beams . . . . .	51
VI. Current Density Distribution and Frequency-Contrast Characteristics. . . . .	69
VII. Round Lenses . . . . .	78
VIII. Quadrupole Lenses . . . . .	115
IX. Two-Dimensional (Cylindrical) Lenses. . . . .	148
X. Transaxial Lenses . . . . .	159
XI. Crossed Lenses . . . . .	174
XII. New Types of Lenses. Aberration Correctors . . . . .	187
XIII. Conclusion . . . . .	200
References . . . . .	201

### **Electron Microscopy of Fast Processes**

O. BOSTANJOGLO

I. Introduction . . . . .	209
II. Interactions of Electrons with Matter . . . . .	211
III. Modes of Electron Microscopy . . . . .	216
IV. Time Resolved Electron Microscopy . . . . .	223
V. Application of Real-Time Electron Microscopy to Fast Laser-Induced Processes . . . . .	260
VI. Space-Time Resolution of Real-Time Microscopy . . . . .	273
VII. Summary . . . . .	276
Acknowledgment . . . . .	276
References . . . . .	276

**High Resolution Transmission Electron Microscopy and Geology**  
MARCELLO MELLINI

I. Introduction . . . . .	282
II. Technical and Experimental Aspects . . . . .	284
III. Structure and Microstructure of Minerals . . . . .	292
IV. Structural Control Over Microstructure . . . . .	297
V. Mineral Reactions. . . . .	305
VI. Extraterrestrial Mineralogy . . . . .	317
VII. Conclusions . . . . .	323
References . . . . .	324

**On Generalized Information Measures and Their Applications**  
INDER JEET TANEJA

I. Introduction . . . . .	328
II. Shannon's Entropy and Its Generalizations . . . . .	329
III. Generalized Distance Measures . . . . .	352
IV. Generalized Measures of Directed Divergence . . . . .	353
V. Generalized Divergence Measures . . . . .	359
VI. Generalized Entropies for Multivariate Probability Distributions. . . . .	368
VII. Applications to Statistical Pattern Recognition . . . . .	386
Entropy Graph . . . . .	410
References . . . . .	411
 INDEX . . . . .	 415
