Algebraic Systems, Trellis Codes, and Rotational Invariance 1

HOWARD J. CHIZECK AND MITCHELL D. TROTT

I. Introduction	2
II. A Review of Modulation and Coding	4
III. Trellis Codes: Structure	18
IV. Designing Trellis Codes	28
V. Finite Group Homomorphisms	37
VI. Rotational Invariance	51
VII. Finding New Codes.	64
VIII. Open Questions	69
References	70

Topography of Solid Surfaces Modified by Fast Ion Bombardment 73

D. GHOSE AND S. B. KARMOHAPATRO

I. Introduction	73
II. Basic Ion Bombardment Processes	76
III. Ion-Induced Surface Modifications	82
IV. Summary	144
Acknowledgments.	146
References	146

Scanning Tunneling Microscopy: A Mature Surface-Science Technique 155

L. L. SOETHOUT, H. VAN KEMPEN, G. F. A. VAN DE WALLE

I. Introduction	156
II. Modes of Operation	157
III. Construction and Electronics	168
IV. Theory	188
V. Applications	203

VI. Related Scanning Techniques and Spin-off	246
Acknowledgments.	257
References	257
Phosphor Materials for Cathode-Ray Tubes	
TAKASHI HASE, TSUYOSHI KANO, EIICHIRO NAKAZAWA, AND HAJIME YAMAMOTO	
271	
I. Introduction	272
II. Luminescent Processes of Phosphors	273
III. Cathode-Ray Excitation Processes	289
VI. Phosphor Materials for Specific Applications	307
V. Methods Used for Synthesis of Phosphor Powders	325
IV. Screen Fabrication Techniques	332
VII. Special Phosphor Screens	337
VIII. Phosphor Aging.	349
IX. Contrast-Enhancing Techniques in Color Tubes	353
X. Conclusion	356
Acknowledgment	358
Appendix 1. Characteristics of Widely Used Phosphors for Main Categories of Cathode-Ray Tubes.	359
Appendix 2. Relative Spectral Distribution Curves of Cathodoluminescence Emission for the Phosphors Listed in Appendix I	361
References	365
INDEX.	373
