### **Discrete Fast Fourier Transform Algorithms: A Tutorial Survey**

M. AN, I. GERTNER, M. ROFHEART, AND R. TOLIMIERI

I. Introduction . . . . .	2
II. Tensor Product Formulation of Cooley–Tukey Algorithms. . . . .	4
III. Multidimensional Algorithms . . . . .	16
IV. Line Algorithm . . . . .	26
V. Parallel Implementation of the Line Algorithm . . . . .	38
VI. The Fourier Transform in X-ray Crystallography . . . . .	40
VII. Symmetric Fourier Transforms. . . . .	51
References . . . . .	65

### **Number Theoretic Techniques in Digital Signal Processing**

GRAHAM A. JULLIEN

I. Introduction . . . . .	70
II. Discrete Fourier Transforms. . . . .	75
III. Fast Fourier Transform (FFT) Algorithms . . . . .	77
IV. Finite Algebras . . . . .	80
V. Number Theoretic Transforms . . . . .	84
VI. Residue Number Systems . . . . .	121
VII. Implementation of NTTs using the RNS . . . . .	131
VIII. VLSI Implementations of Finite Algebraic Systems . . . . .	140
IX. Conclusions . . . . .	159
Acknowledgments. . . . .	160
References . . . . .	160

### **Information Energy and Its Applications**

L. PARDO AND I. J. TANEJA

I. Introduction . . . . .	166
II. Information Energy and Information Energy Gain for Discrete Random Variables . . . . .	167

III. Information Energy and Information Energy Gain for Continuous Random Variables . . . . .	176
IV. Statistical Aspects of Information Energy . . . . .	188
V. Information Energy and Fuzzy Sets Theory . . . . .	224
VI. Weighted Information Energy. . . . .	234
Acknowledgments. . . . .	238
References . . . . .	239

### **Recent Developments in Image Algebra**

G. X. RITTER

I. Introduction . . . . .	243
II. Image Algebra . . . . .	246
III. A Medley of Consequences . . . . .	273
Acknowledgments. . . . .	305
References . . . . .	305

### **Image Filtering and Analysis through the Wigner Distribution**

GABRIEL CRISTOBAL, CONSUELO GONZALO, AND JULIAN BESCOS

I. Introduction . . . . .	309
II. The Wigner Distribution . . . . .	313
III. Wigner Distribution Representation of Images . . . . .	326
IV. Image Filtering through the Wigner Distribution . . . . .	344
V. Image Analysis through the Wigner Distribution . . . . .	359
VI. Applications of the Space (Time)-Frequency Representations. . . . .	372
VII. Conclusions . . . . .	387
Acknowledgments . . . . .	388
References . . . . .	388
INDEX. . . . .	399
