

## CONTENTS

CONTRIBUTORS . . . . .	vii
PREFACE . . . . .	ix

### **CAD in Electromagnetism** **1** OSZKAR BIRO AND K. R. RICHTER

I. Introduction . . . . .	1
II. Static Fields . . . . .	4
III. Eddy Current Fields . . . . .	20
IV. Waveguides and Cavities. . . . .	38
V. Galerkin's Method . . . . .	43
VI. Application of the Finite Element Method . . . . .	63
Acknowledgments. . . . .	95
References . . . . .	95

### **Speech Coding** **97** VLADIMIR CUPERMAN

I. Introduction . . . . .	97
II. Signal Processing in Speech Coding . . . . .	110
III. Speech Coding Systems. . . . .	147
IV. Future Research Directions . . . . .	188
Acknowledgments. . . . .	189
References . . . . .	189

### **Bandgap Narrowing and Its Effects on the Properties of Moderately and Heavily Doped Germanium and Silicon** **197** SURESH C. JAIN, R. P. MERTENS, AND R. J. VAN OVERSTRAETEN

I. Introduction . . . . .	197
II. Calculations of BGN in <i>n</i> -Type Silicon and <i>n</i> -Type Germanium . . . . .	203
III. Impurity Concentration Fluctuations and Band Tails . . . . .	232
IV. Effect of Bandgap Narrowing on Optical Properties. . . . .	244

V. Summary of Important Results . . . . .	268
Acknowledgments . . . . .	270
Appendix . . . . .	270
References . . . . .	272
<b>The Rectangular Patch Microstrip Radiator-Solution by     Singularity Adapted Moment Method</b> . . . . .	<b>277</b>
E. LEVINE, H. MATZNER, AND S. SHTRIKMAN	
I. Introduction . . . . .	277
II. The Spectral Domain Presentation . . . . .	279
III. The Moment-Method Formulation . . . . .	286
IV. Two-Dimensional Solution . . . . .	302
V. Conclusion . . . . .	317
Appendix A. Far fields in Two Polarizations . . . . .	317
Appendix B. Evaluation of Typical Matrix Elements . . . . .	319
References . . . . .	324
<b>Some Recent Advances in Multigrid Methods</b> . . . . .	<b>327</b>
JAN MANDEL	
I. Introduction . . . . .	328
II. The Fundamental Multigrid Algorithm . . . . .	329
III. Preconditioning by Multigrid . . . . .	347
IV. Methods Based on Space Decomposition . . . . .	349
V. Multigrid in Elasticity . . . . .	357
VI. Multigrid for Mixed Problems . . . . .	359
VII. Multigrid for High Order and Spectral Methods . . . . .	360
VIII. Eigenvalue Problems . . . . .	363
IX. Multigrid and Parallel Computing . . . . .	364
X. Some Other Multigrid Developments . . . . .	365
XI. Multigrid Software . . . . .	365
Appendix A. PLTMG . . . . .	365
Appendix B. MADPACK . . . . .	366
Appendix C. MUDPACK . . . . .	366
Appendix D. MGD1 . . . . .	367
Appendix E. MG00 . . . . .	368
Appendix F. AMG . . . . .	368
Appendix G. BOXMG . . . . .	368
References . . . . .	368
INDEX . . . . .	379
