

CONTENTS

| | |
|--------------------|-----|
| CONTRIBUTORS | vii |
| PREFACE | ix |

Recent Developments in Kalman Filtering with Applications in Navigation HANS-JURGEN HOTOP

| | |
|--|----|
| I. Introduction | 1 |
| II. The New Generation of Navigation Systems | 2 |
| III. Filter Theory | 16 |
| IV. New Kalman Filter Formulations | 25 |
| V. Review of the Backward Kalman Filter Theory | 49 |
| VI. Application of the Kalman Filter in Navigation | 53 |
| VII. Summary | 70 |
| Acknowledgments | 71 |
| References | 71 |

Recent Advances in 3D Display D. P. HUIJSMANS AND G. J. JENSE

| | |
|--|-----|
| I. Introduction | 78 |
| II. Representation Schemes | 95 |
| III. Voxel-Based Display Methods | 113 |
| IV. Spatial Selection and Division | 147 |
| V. Hardware Support | 159 |
| VI. Implementations | 177 |
| VII. Conclusion | 221 |
| Acknowledgments | 224 |
| Bibliography | 225 |

Applications of Group Theory to Electron Optics YU LI

| | |
|---|-----|
| I. Introduction | 231 |
| II. M function and Its Symmetry Group | 233 |
| III. Applications to Electrostatic Multipoles | 241 |

| | |
|---|-----|
| IV. Applications to Magnetostatic Multipoles | 245 |
| V. A General Method for Deriving Constraint Relations | 251 |
| Appendix | 256 |
| References | 257 |

Parallel Programming and Cray Computers

R. H. PERROTT

| | |
|--|-----|
| I. Introduction | 259 |
| II. Approaches to Parallel Programming | 261 |
| III. Implicit Parallelism | 263 |
| IV. Explicit Parallelism | 265 |
| V. Cray Computers | 271 |
| VI. Parallel Computing Forum | 297 |
| VII. Summary | 299 |
| Acknowledgments | 300 |
| Bibliography | 300 |
| INDEX | 303 |
