Image Representation with Gabor Wavelets and Its Applications

RAFAEL NAVARRO, ANTONIO TABERNEO, AND GABRIEL CRISTÓBAL

I. Introduction	2
II. Joint Space-Frequency Representations and Wavelets	8
III. Gabor Schemes of Representation	19
IV. Vision Modeling	37
V. Image Coding, Enhancement, and Reconstruction	50
VI. Image Analysis and Machine Vision	61
VII. Conclusion	75
References	79

Models and Algorithms for Edge-Preserving Image Reconstruction

L. BEDINI, I. GERACE, E. SALERNO, AND A. TONAZZINI

I. Introduction	86
II. Inverse Problem, Image Reconstruction, and Regularization	94
III. Bayesian Approach	98
IV. Image Models and Markov Random Fields	104
V. Algorithms	118
VI. Constraining an Implicit Line Process	129
VII. Determining the Free Parameters	141
VIII. Some Applications	153
IX. Conclusions	181
References	184

Successive Approximation Wavelet Vector Quantization for Image and Video Coding

E. A. B. DA SILVA AND D. G. SAMPSON

I.	Introduction	191
II.	Wavelets	195
III.	Successive Approximation Quantization	205
IV.	Successive Approximation Wavelet Lattice Vector Quantization	221
V.	Application to Image and Video Coding	226
VI.	Conclusions	252
	References	253

Quantum Theory of the Optics of Charged Particles

R. JAGANNATHAN AND S. A. KHAN

I.	Introduction	257
II.	Scalar Theory of Charged-Particle Wave Optics	259
III.	Spinor Theory of Charged-Particle Wave Optics	322
IV.	Concluding Remarks	336
	References	356

Ultrahigh-Order Canonical Aberration Calculation and Integration Transformation in Rotationally Symmetric Magnetic and Electrostatic Lenses

JIYE XIMEN

I.	Introduction	360
II.	Power-Series Expansions for Hamiltonian Functions and Eikonals in Magnetic Lenses	361
III.	Generalized Integration Transformation on Eikonals Independent of $(r \times p)$ in Magnetic Lenses	369
IV.	Canonical Aberrations up to the Ninth-Order Approximation in Magnetic Lenses	381
V.	Generalized Integration Transformation on Eikonals Associated with $(r \times p)$ in Magnetic Lenses	389
VI.	Eikonal Integration Transformation in Glaser's Bell-Shaped Magnetic Field	393
VII.	Generalized Integration Transformation on Eikonals in Electrostatic Lenses	396

CONTENTS

vii

VIII. Conclusion	403
References	407

**Erratum and Addendum for Physical Information and the
Derivation of Electron Physics**
