

CONTENTS

FOREWORD	v
PREFACE	vii
I. INTRODUCTION	1
A. Definitions	1
B. Some Highlights in the Development of Optical Masers	1
C. The Optical Resonator	3
D. Radiation Characteristics of the Optical Maser	4
E. Nonlinear Optical Effects	5
II. THRESHOLD CONDITIONS FOR OSCILLATION	6
A. General Relations	6
B. Dielectric Loss in Ionic Crystals	15
III. SPECTRAL LINE SHAPE	17
A. The Folded Lorentz-Gaussian Distribution	17
B. Line Shape in Gases	18
C. Nature of Line Broadening in Solids	19
D. Saturation	21
IV. STEADY STATE THEORY OF THE OPTICAL MASER	24
A. Introduction	24
B. Wave Analysis	25
C. Mode Analysis	36
D. Oscillation in Imperfect Crystals	43
E. The Effect of Inhomogeneous Broadening	45
F. Mode Coupling	47
V. THEORY OF THE TRANSIENT BEHAVIOR OF OPTICAL MASERS	51
A. Relaxation Oscillations	51
B. The Q -Spoil Maser	56
C. Radiation Damping Effects	59
D. The Pulsed Traveling Wave Amplifier	60
VI. OPTICAL RESONATORS	63
A. Introduction	63
B. Fabry-Perot Resonator with Plane Parallel Reflectors	64
C. Resonators with Spherical Reflectors	70
D. Diffraction Loss	74
E. Optical Dielectric Waveguides	76
F. Various Configurations for Optical Resonators	79
G. Spatial Distribution of Output Radiation	83

VII. OPTICAL MASER SYSTEMS	86
A. Minimum Pumping Power—Requirements for Maser Media	86
B. Power Output and Optimum Output Coupling of Maser Oscillators	89
C. Quantum Mechanical Amplifiers	94
D. Optical Maser Oscillators	96
VIII. OPTICAL PUMPING	99
A. The Rate Equations	99
B. Optical Excitation	104
C. Optical Pumping Techniques	106
IX. IONIC CRYSTAL AND GLASS MASERS	111
A. Introduction and Survey	111
B. The Ruby Optical Maser	112
C. Optical Masers Using $4f$ Rare Earth Ions	120
D. The $\text{CaF}_2 : \text{U}^{3+}$ Optical Maser	128
E. Optical Maser Action in Metallo-Organic Compounds	131
F. Control of the Oscillation in Pulsed Masers	133
X. GASEOUS OPTICAL MASERS	136
A. Methods of Population Inversion	136
B. Survey of Gaseous Optical Masers	145
C. The He-Ne Maser	146
D. Gaseous Optical Masers (Other than He-Ne)	150
XI. SEMICONDUCTOR MASERS	155
A. Condition for Gain	155
B. Current Injection in p - n Diodes	157
C. Confinement of Radiation in p - n Junctions	160
D. The GaAs Diode Injection Maser	161
E. p - n Diode Masers (Other than GaAs)	167
XII. OUTPUT RADIATION CHARACTERISTICS OF OPTICAL MASERS	169
A. Introduction	169
B. Methods of Measuring the Characteristics of Maser Radiation	169
C. Spectral Width of an Oscillating Maser Mode	175
D. Coherence	176
E. Mode Studies in Gaseous Masers	182
F. Mode Studies in Solid State Masers	185
G. Oscillation in Imperfect Crystals	188
H. Relaxation Oscillation	191
I. Mode Selection and Control	195
XIII. MULTIPLE PHOTON PROCESSES	198
A. Introduction	198
B. Two Photon Absorption	199
C. Induced Raman Emission	200
D. Optical Harmonic Generation	206

CONTENTS

xi

XIV. APPLICATIONS OF OPTICAL MASERS	217
A. Introduction	217
B. Modulation Methods	218
C. Communication and Radar	219
D. The Optical Maser as a Pumping Source	220
E. Other Technological and Scientific Applications	226
APPENDIX I	230
APPENDIX II	250
APPENDIX III	252
APPENDIX IV	261
APPENDIX V	266
