|---|------------|
| PREFACE   | v          |
| <b>I. Introduction</b>  | <b>1</b>   |
| <b>II. Definitions, Notation and Methods of Analysis</b>                | <b>3</b>   |
| A. Equations of Motion  | 3          |
| B. Cardinal Elements  | 11         |
| C. Aberration Coefficients: Round Lenses                                | 22         |
| D. Aberration Coefficients: Quadrupoles                                 | 35         |
| E. Fifth Order Aberrations  | 65         |
| <b>III. Quadrupole Potential Functions</b>                              | <b>71</b>  |
| A. Calculation by Analogue and Numerical Methods                        | 71         |
| B. Curve-fitting and Models   | 76         |
| <b>IV. Quadrupole Systems: their Suitability for Specific Purposes</b>  | <b>87</b>  |
| A. Quadrupole Multiplets as Corrector Units                             | 87         |
| B. Quadrupole Multiplets as Objective Lenses or<br>Probe-forming Lenses | 91         |
| C. Quadrupoles as Projector Lenses                                      | 94         |
| D. Formation of a Line Image and Pseudo-stigmatic<br>Imagery            | 95         |
| E. Octopoles Alone  | 96         |
| F. Chromatic Correction   | 100        |
| <b>V. Quadrupole Data</b>   | <b>107</b> |
| A. The Single Quadrupole  | 107        |
| B. The Quadrupole Doublet   | 240        |
| C. The Quadrupole Triplet   | 290        |
| D. The Quadrupole Quadruplet  | 292        |
| E. Other Systems  | 331        |
| F. Octopoles  | 346        |

|               |  |     |
|---------------|--|-----|
| APPENDIX I:   | Notation and Nomenclature  | 355 |
| APPENDIX II.  | The Shadow Projection Method of Measuring<br>Aberration Coefficients | 359 |
|               | References   | 363 |
| AUTHOR INDEX  |  | 373 |
| SUBJECT INDEX |  | 377 |
