

Contents

LIST OF CONTRIBUTORS	xi
FOREWORD	xiii
PREFACE	xv

Image Transmission Techniques

WILLIAM K. PRATT

1.1 Image Transmission System Characterization	2
1.2 Image Quality Measures	9
1.3 Image Coding Techniques	13
1.4 Summary	18
References	19

Image Coding Applications of Vision Models

DAVID J. SAKRISON

2.1 Rate Distortion Theory: Optimum Possible Performance	23
2.2 Properties of the Human Visual System	35
2.3 Simulation of Implementable Coding Methods	48
2.4 Simulation of Optimum Encoding Methods	59
2.5 Conclusions	67
References	70

Predictive Image Coding

HANS GEORG MUSMANN

3.1 Basic Principles	74
3.2 History	76
3.3 Differential Pulse-Code Modulation	81
3.4 Extended Differential Pulse-Code Modulation	90

3.5	Information-Preserving Predictive Coding	97
3.6	Predictive Coding of Color Signals	100
3.7	Influence of Transmission Errors	104
3.8	Summary	107
	References	110

Transform Image Coding

ANDREW G. TESCHER

4.1	Basic Transform Coding Techniques	114
4.2	Transform Coding Adaptivity Concepts	126
4.3	Implementation of Adaptive Transform Coding Systems	137
4.4	Conclusions	152
	References	154

Hybrid Transform/Predictive Image Coding

JOHN A. ROESE

5.1	Intraframe Hybrid Image Coding	159
5.2	Interframe Hybrid Image Coding	174
5.3	Summary	185
	References	187

Frame Replenishment Coding of Television

BARRY G. HASKELL

6.1	History	190
6.2	Efficient Predictive Coding	194
6.3	Segmenting the Picture into Moving and Nonmoving Areas	198
6.4	Temporal Filtering	201
6.5	Adaptive Moving-Area Resolution	202
6.6	Movement Compensation	206
6.7	Color Coding	210
6.8	Error Control	213
6.9	Conclusion	214
	References	215

Binary Image Compression**RONALD B. ARPS**

7.1	Historical Trends and Comments	222
7.2	Source Characterization	224
7.3	Raster Algorithms	236
7.4	Area Algorithms	266
7.5	Concluding Comments	271
	References	275

SUBJECT INDEX	277
