LIST OF CONTRIBUTORS	ix
PREFACE	xiii
Introduction and a few questions	1
P. C. Sabatier	
Tomographic inverse problems	
Attenuation correction in emission tomography	21
F. Natterer	
Imaging inhomogeneous media by diffraction tomography techniques. Critical examination and prospects	35
D. Lesselier, B. Duchêne and W. Tabbara	
Electromagnetic probing from boreholes. Comparison of exact and approximate methods	51
W. Tabbara, D. Lesselier, H. Galan-Malaga	
On the effect of finite thickness on scattering from small 3-D structures	61
M. T. Lightbody and M. A. Fiddy	
Electromagnetic inverse scattering problems	
Numerical and approximate methods for 1-D electromagnetic inverse scattering	71
D. B. Ge	
Inverse scattering problem with linearly superposed reflection coefficients	79
A. K. Jordan and S. Lakshmanasamy	
Asymptotic techniques in inverse scattering high-frequency profile reconstruction	89
H. Douglas Ladouceur and F. L. Hutson	
Inverse scattering problems of quantum mechanics	
The quantum inverse problem for a special class of nonspherical potentials	99
H. Funke and B. N. Zakhariev	
Inversion of elastic $^{12}\text{C}+^{12}\text{C}$ phases with the modified Newton method	117
K.-E. May and W. Scheid	
Some non-linear, ill-posed problems in nuclear physics from a practitioner's point of view	129
H. J. Krappe, H. Massmann and H. H. Rossner	
Quantum inverse three-body scattering problem	141
B. N. Zakhariev	
Characterization of the scattering data in multidimensional inverse scattering problem	153
A. G. Ramm	
The Faddeev-Lippmann-Schwinger equation in multidimensional quantum inverse scattering	169
R. B. Lavine and A. I. Nachman	
The inverse problem in the coupling constant	175
K. Chadan	

Miscellaneous inverse problems

Computer aided inversion of ray amplitudes and travel times by a linearized iterative method	179
M. Shahriar, F. Hron and G. L. Cumming	
Inverse problems for the surface elastic waves in a layered half-space	191
G. M. Henkin and V. M. Markushevich	
Graphical solutions and representations for the biomagnetic inverse problem	205
A. A. Ioannides	
Homogenized parameters defined by an inverse problem in remote sensing	217
M. Raffy	
Inverse problems in confocal scanning microscopy	225
M. Bertero, P. Boccacci, P. Brianzi and E. R. Pike	

Mathematical analyses related to applied inverse problems

Nonlinear Abel integral equations: applications, analysis, numerical methods	243
R. Gorenflo	
A note on stopping rules for iterative regularization methods and filtered SVD	261
M. Defrise and C. de Mol	
Impulse response of weighted series expansions	269
F. Gori, R. Grella, L. Nicolo'-Amati and C. Padovani	
A convolution method for superresolution	281
P. de Santis, F. Gori, G. Guattari and C. Palma	

Special problems

Detection of abrupt changes in sound signals with the help of wavelet transforms	289
A. Grossmann, M. Holschneider, R. Kronland-Martinet and J. Morlet	
Differential equations in the spectral parameter: the higher order case	307
F. A. Grünbaum	
Ambiguous potential, and inverse problem, for the one-dimensional Schrödinger equation	323
A. Degasperis	

Inverse method and applications to nonlinear evolution equations

Multidimensional spectral transform	359
M. Boiti	
Two dimensional solvable extension of the dispersive long wave equation	369
J. J-P. Léon	
The Shine-Gordon equation	377
F. Pempinelli	
Integrable 2+1 dimensional equations, their recursion operators and bi-Hamiltonian structures as reduction of multidimensional systems	389
P. M. Santini	
Inverse scattering transform on the half-line – the nonlinear analogue of the sine transform	409
A. S. Fokas	
Boundary value problems for integrable systems and a new class of inverse problems	423
D. J. Kaup	
Solution of nonlinear equations by $\bar{\delta}$ analysis: the KdV hierarchy	429
M. Jaulent and M. Manna	
Darboux and Bäcklund transformations for the Schrödinger equation	445
D. Levi	

Loop algebras as symmetry algebras of nonlinear partial differential equations integrable by inverse scattering techniques P. Winternitz	457
Equations of nonlinear Schrödinger type in 1+1 and 2+1 dimensions, obtained from integrable PDEs F. Calogero and A. Maccari	463
Exact 1+1 dimensional solutions of discrete Boltzmann models with three and four different densities H. Cornille	481
Multisolitons and symmetric functions F. J. Lambert	509
 Numerical analysis of inverse and ill-posed problems	
A geometrical approach for the a priori study of non-linear inverse problems G. Chavent	509
A substitution method applied to the identification of the leading coefficient appearing in linear equations of elliptic type G. Crosta	523
Shape interfaces in an inverse problem related to the wave equation G. Canadas, F. Chapel, M. Cuer, J. P. Zolesio	533
Optimality in the regularization of ill-posed inverse problems A. R. Davies and M. F. Hassan	553
 Contents of Proceedings of RCP-264 meetings 1981–1982–1983–1984–1985	 563
 SUBJECT INDEX	 571
