ACKNOWLEDGEMENTS	vii
1. Introduction	1
2. Theory	7
2-A. Field Ionization	7
2-B. Field Evaporation	18
2-B-1. Introduction	18
2-B-2. Quantitative description of field evaporation	19
2-B-3. Theoretical aspects of field evaporation	24
2-B-4. Influence of gas adsorbates	32
2-B-5. Characteristics of field evaporation	36
2-C. Post Ionization in Field Evaporation	41
2-D. Laser Pulse Evaporation	46
3. Instrumentation	51
3-A. Time-of-Flight Atom-Probe	51
3-B. Magnetic-Sector Atom-Probe	61
3-C. Imaging Atom-Probe	66
3-D. Other Types of Atom-Probes	69
3-E. Detection Efficiency	70
3-F. Data Processing Problems	76
4. Applications in Sciences	83
4-A. Field Calibration	83
4-B. Field Adsorption	87
4-B-1. History	87
4-B-2. Field adsorption of noble gases	88
4-B-3. Field adsorption of hydrogen	94
4-B-4. Field adsorption of other gases	99
4-B-5. Theoretical approach to field adsorption	99
4-C. Surface Segregation	107
4-C-1. Ni-Cu binary alloys	109
4-C-2. Pt-based binary alloys	125
4-D. Gas-Surface Reactions	127
4-D-1. Simple reactions	127
4-D-2. Kinetic studies	133
4-D-3. Study of field dissociation	140
4-D-4. Alloy surfaces	146
4-E. Study of Liquid Metal Ion Sources	150

5. Applications in Semiconductor Physics	165
5-A. Introduction	165
5-B. FIM Study of Semiconductors	165
5-C. Atom-Probe Study of Semiconductors	171
5-D. Atom-Probe Study of the III-V Compound Semiconductors	177
5-E. Semiconductor-Metal Interfaces	184
5-E-1. Ni/Si interface	185
5-E-2. Pd/Si interface	186
5-E-3. Al/GaAs interface	188
5-E-4. Pd/GaAs interface	191
5-E-5. Ti/Si and Ti/SiC interfaces	194
6. Applications in Metallurgy	197
6-A. Introduction	197
6-B. Analysis of Atom-Probe Data	199
6-C. Atom-Probe Studies of Precipitation	202
6-C-1. Ferrous alloys	203
6-C-2. Ni-based alloys	216
6-C-3. Al-based alloys	223
6-D. Interfacial Segregation Study	235
6-D-1. Introduction	235
6-D-2. FIM study of interfacial boundaries	236
6-D-3. Atom-probe study of interfacial segregation	239
6-E. Others	246
7. Other Applications	249
7-A. Study of Macro Molecules	249
7-A-1. Study of Polypyrrole	249
7-A-2. Study of Polystyrene	253
7-B. Scanning Tunneling Microscopy	256
7-B-1. History	256
7-B-2. Instrumentation	261
7-B-3. Resolution of STM	262
7-B-4. Applications of STM	263
7-B-5. Au(110) and (100) surfaces	264
7-B-6. Si(111) 7 × 7 and 2 × 1 surfaces	265
7-B-7. Pt(100) surface	268
7-B-8. Technological applications	270
7-B-9. Critical assessment of STM	272
