

CONTENTS

Foreword	xvii
Best Paper Awards	xx
International Cryogenic Materials Conference Board	xxi

COMPOSITES

Stiffness and Internal Stresses of Woven-Fabric Composites at Low Temperatures	1
R. D. Kriz	
Dynamic Young's Modulus and Internal Friction in a Composite Material at Low Temperatures	9
T. Okada, S. Nishijima, K. Matsushita, T. Okamoto, H. Yamaoka, and K. Miyata	
Fatigue of Glass-Epoxy Composite at 77K and 300K: Observation and Prediction	17
M. H. AbdelMohsen, K. Han, and R. E. Rowlands	
Acoustic Emission from Composite Materials at Low Temperatures	25
S. Nishijima, T. Okada, and S. Namba	
Problems of Cryogenic Interlaminar Shear Strength Testing . .	33
H. Becker	
Mechanical Properties of Organic Insulators for Superconducting Magnets after Low Temperature Irradiation	41
S. Takamura and T. Kato	

POLYMERS

Epoxies for Low Temperature Application Impregnating Technology	51
H. Hacker, C. Albrecht, H. Laupenmühlen, H. Salzburger, and W. Ihlein	
Correlation of Dielectric and Mechanical Damping at Low Temperatures	61
G. Hartwig and G. Schwarz	
Optical Relaxation Processes in Polymers at Low Temperatures (Invited)	71
D. Haarer	
Low Temperature Fracture Strain at High Deformation Rates . .	83
G. Hartwig and K. Pöhlmann	
The Chemistry of Radiation Damage in Epoxide Resins	89
D. Evans and J. T. Morgan	
Tensile, Compressive, and Shear Properties of a 64-kg/m ³ Polyurethane Foam at Low Temperatures	97
J. M. Arvidson, L. L. Sparks, and C. Guobang	
The Low-Temperature Thermal Conductivity of Rubber	105
J. J. Freeman and D. Greig	

NONDESTRUCTIVE INSPECTION

Photomechanical Stress Analysis under Cryogenic Environments	111
E. A. Fuchs and R. E. Rowlands	
Nondestructive Evaluation of Thick Austenitic Stainless Steel Weldments by Shear Horizontal Acoustic Waves	119
R. E. Schramm, J. C. Moulder, and C. M. Fortunko	

AUSTENITIC STEELS

Low Temperature Strengthening of Austenitic Stainless Steels with Nitrogen and Carbon	127
R. P. Reed and N. J. Simon	

Nitrogen-Containing 25Cr-13Ni Stainless Steel as a Cryogenic Structural Material	137
T. Sakamoto, Y. Nakagawa, I. Yamauchi, T. Zaizen, H. Nakajima, and S. Shimamoto	
The Development of a Nitrogen-Strengthened High- Manganese Austenitic Stainless Steel for a Large Superconducting Magnet	145
S. Tone, M. Shimada, T. Horiuchi, Y. Kasamatsu H. Nakajima, and S. Shimamoto	
Mechanical Properties of High Yield Strength High Manganese Steels at Cryogenic Temperatures	153
K. Shibata, Y. Kobiki, Y. Kishimoto, and T. Fujita	
An Fe-Mn-Al Austenitic Steel for Cryogenic Uses	161
C.-H. Shih, Y.-S. Zhang, Y.-K. Xu, and Y.-Y. Li	
Development of a High-Strength High-Manganese Stainless Steel for Cryogenic Use	169
H. Masumoto, K. Suemune, H. Nakajima, and S. Shimamoto	
The Influence of Processing on the Cryogenic Mechanical Properties of High Strength High Manganese Stainless Steel	177
R. Ogawa and J. W. Morris, Jr.	
Effect of Strain Rate on Measured Mechanical Properties of Stainless Steel at 4 K	185
W. G. Dobson and D. L. Johnson	
Strengthening and Serrated Flow of High-Manganese Nonmagnetic Steel at Cryogenic Temperatures	193
K. Nohara, T. Kato, T. Sasaki, S. Suzuki, and A. Ejima	
Mechanical Properties of Cold-Rolled and Aged Fe-Ni-Cr-Ti Austenitic Alloys for Low Temperature Use	203
K. Hiraga, K. Ishikawa, K. Nagai, and T. Ogata	
A New Nickel-Free Cryogenic Steel, 06AlNbCuN, and Its Fracture-Safety Evaluation	211
K. S. Xue, Z. L. Rong, and D. X. Hong	

Development of the New Cryogenic Structural Material for Fusion Experimental Reactor	219
H. Nakajima, K. Yoshida, Y. Takahashi, E. Tada, M. Oshikiri, K. Koizumi, S. Shimamoto, R. Miura, M. Shimada, S. Tone, H. Masumoto, and T. Sakamoto	
The Influence of Prestrain and Transformation Mode on the Mechanical Properties of Nitrogen Stabilized Austenitic Steel	227
D. Pattanayak	
The Microstructure and Properties of a Cryogenic Steel Fe-12Cr-6Ni-9Mn-N	237
Y.-Y. Li, S. Chai, Y. Xu, B. Quian, C. Fan, X. Zhao, and G. Liang	
32Mn-7Cr Austenitic Steel for Cryogenic Applications	245
R. Miura, H. Nakajima, Y. Takahashi, and K. Yoshida	
Magneto-mechanical Effects in 304 Stainless Steels	253
B. Fultz, G. M. Chang, R. Kopa, and J. W. Morris, Jr.	
The Temperature Dependence of the Tensile Yield Strength of Selected Austenitic Steels	263
R. P. Reed and J. M. Arvidson	
WELDING AND JOINING	
Progress in Cryostructural Materials and Their Welding in the USSR (Invited)	271
K. A. Yushchenko	
Low Temperature Strength and Toughness of Thermomechanically Treated and EB Welded Fe-13%Ni-3%Mo-Ti Alloys	283
K. Ishikawa, K. Hiraga, T. Ogata, and K. Nagai	
Welding Superalloy Sheet for Superconducting Cable Jackets	291
L. T. Summers, M. J. Strum, and J. W. Morris, Jr.	
The Mechanism of Embrittlement of the Heat-Affected Zone of Metastable Austenitic Steel Welded Joints	297
K. A. Yushchenko	
Fracture Toughness of 25Mn Austenitic Steel Weldments at 4 K	303
Y. W. Cheng, H. I. McHenry, P. N. Li, T. Inoue, and T. Ogawa	

Aging Response and Cryogenic Mechanical Properties of an In-Sn Eutectic Solder Alloy for Josephson Packaging	311
T. Caulfield, S. Purushothaman, and D. P. Waldman	

FATIGUE AND CREEP

Cryogenic Creep of Metals (Invited)	319
J. K. Tien and C. T. Yen	
Transitions in Fatigue Processes at Low Temperature	339
Y. Katz, A. Bussiba, and H. Mathias	
Cryogenic Fatigue Crack Growth Rate Properties of JBK-75 Base and Autogenous Gas Tungsten Arc Weld Metal	349
W. A. Logsdon, P. K. Liaw, and M. H. Attaar	

NONFERROUS ALLOYS

The Use of Inconel Alloy 706 as a Structural Material in the 300 MVA Superconducting Generator	359
G. D. Hooper, W. G. Moore, T. T. Shih, and W. A. Logsdon	
Low Temperature Mechanical Properties of CeO_2 -Alloyed Tetragonal Zirconia	367
T. K. Gupta and C. A. Andersson	
Heat Treatments and Low Temperature Fracture Toughness of a Ti-6Al-4V Alloy	375
K. Nagai, K. Hiraga, T. Ogata, and K. Ishikawa	

THERMOPHYSICAL PROPERTIES OF MATERIALS

Physical Properties: Knowing, Guessing and Measuring (Invited)	383
G. K. White	
Low Temperature Thermal Conduction in Solids (Invited)	395
P. G. Klemens	
Metals and Alloys: Expansion and Contraction (Invited)	407
G. K. White	

Metallic Glasses (Invited)	417
D. Greig	
An Apparatus to Determine the Heat Capacity and Thermal Conductivity of a Material from 1 to 300 K in Magnetic Fields up to 9 T	425
J. A. Barclay, W. F. Stewart, W. C. Overton, Jr., R. Chesebrough, M. McCray, and D. McMillan	
Ceramic Composites for Enthalpy Stabilization of Superconducting Wire	433
W. N. Lawless, C. F. Clark, and T. K. Gupta	
 ELECTROMAGNETIC PROPERTIES OF MATERIALS	
Electrical Resistivity of Metals and Alloys at Cryogenic Temperatures: A Review (Invited)	441
J. Bass	
The Effect of Mill Temper on the Mechanical and Magnetoresistive Properties of Oxygen-Free Copper in Liquid Helium	453
F. R. Fickett	
Degradation of Copper Stabilizer in a Superconducting Wire Induced by Cyclic Stressing at Cryogenic Temperature	461
K. Katagiri, K. Koyanagi, M. Fukumoto, T. Nishiura, T. Okada, and M. Nagata	
Magnetic Properties and Ferromagnetic Shielding of Ni-Fe-Mo Alloys at Cryogenic Temperatures	469
Y. Suzuki, E. Horikoshi, and K. Niwa	
Magnetic Susceptibility and Strain-Induced Martensite Formation at 4 K in Type 304 Stainless Steel	475
R. B. Goldfarb, R. P. Reed, J. W. Ekin, and J. M. Arvidson	
Peculiarities of the Low-Temperature Electrical and Magnetic Properties in Fe-Cr-Ni-Mn Alloys	483
V. I. Pecherskaya, D. N. Bolshutkin, V. A. Desnenko, V. Ya. Ilichev, and K. A. Yushchenko	
Effect of the Structure of Fe-Cr-Ni Alloys Strained at Low Temperatures on Their Electrical Resistivity	489
M. M. Chernik, V. Ya. Ilichev, and L. V. Skibina	

MATERIALS FOR SUPERCONDUCTING ELECTRONICS
(Joint Symposium with IEEE)

Materials for Superconducting Electronics (Invited)	495
M. R. Beasley	
Tunneling and Surface Properties of Oxidized Metal Overlayers on Nb (Invited)	509
M. Gurvitch and J. Kwo	
Barrier/Electrode Interface Structure and I-V Charac- teristics of NbN Josephson Junctions (Invited)	535
M. Igarashi, M. Hikita, and K. Takei	
All Refractory, High T _C Josephson Device Technology (Invited)	547
E. J. Cukauskas, M. Nisenoff, H. Kroger, D. W. Jillie, and L. R. Smith	
Preparation of High T _C Nb-(Ge,Si) Thin Films at Low Substrate Temperature (Invited)	559
N. Terada, Y. Hoshi, M. Naoe, and S. Yamanaka	
Superconducting NbN Film Treatments	571
V. M. Pan, A. G. Popov, M. V. Belous, and S. A. Koziychuk	
Dependence of T _C Phase Composition for Superconducting Nb-Ge Films Prepared by DC-Magnetron Sputtering	579
B.-C. Yang and C.-G. Wang	
Oxidation Mechanism of the Surface of Al ₁₅ Superconductors	589
H. Ihara, Y. Kimura, H. Okumura, K. Senzaki, and S. Gonda	
Tunneling Studies of VN Thin Films	601
P. M. Tedrow and R. Meservey	
Fabrication of High T _C NbN Films by Ion Beam Deposition Technique	607
Y. Hoshi, N. Terada, M. Naoe, and S. Yamanaka	
Homoepitaxial Growth of Nb ₃ Ge on Nb ₃ Ge	615
H. Yamamoto and M. Tanaka	
Preparation of NbC _x N _{1-x} Thin Films by High Rate Reactive Sputtering	623
H. Yamamoto, K. Ishii, and M. Tanaka	

Determination of Optimum Preparation Parameters for Thin High-T _c Nb ₃ Ge Films	631
B. David and H. Rogalla	

Local Investigation of Superconducting Transition of Nb ₃ Ge Films	639
B. Müller and C. Heiden	

MICROSTRUCTURE OF DEVELOPMENTAL SUPERCONDUCTORS

Flux Pinning in Ultrafine Filamentary Composites (Invited) . .	647
J. Bevk, W. A. Sunder, and F. Habbal	

Phase Relationships and Superconducting Properties of Ternary Systems Used in the Bronze Process (Invited)	659
R. Bormann	

The Relationship between the Martensitic Phase Transition and the Superconducting Properties of A15 Compounds (Invited)	671
D. O. Welch	

High Field NbN Superconductor on Carbon Fibers (Invited) . . .	683
M. Dietrich and C.-H. Dustmann	

Preparation of Superconducting Germanium Alloy Filament Using the Method of Glass-Coated Melt Spinning	699
T. Goto	

Superconducting Properties of V ₂ (Hf,Zr) Laves Phase Multifilamentary Wires	707
K. Inoue, T. Kuroda, and K. Tachikawa	

Superconducting Wires of Pb-Mo-S by Electro-Plating Technique	715
K. Hamasaki, T. Yamashita, T. Komata, K. Noto, and K. Watanabe	

FABRICATION AND OPTIMIZATION OF A15 SUPERCONDUCTORS

An Overview of Practical Superconductor Development in Japan (Invited)	721
Y. Furuto	

Superconducting Properties of Nb ₃ Sn Multifilamentary Wires Fabricated by Internal Tin Process	739
N. Higuchi, K. Tsuchiya, C. J. Klamut, and M. Suenaga	
Properties of (Nb-Ta) ₃ Sn-Filamentary Conductors	747
E. Springer, M. Wilhelm, H. J. Weisse, and G. Rupp	
Manufacture and Superconducting Properties of Bronze Processed Nb ₃ Sn Monofilamentary Wires with Be Additions	755
J. Z. Pan, B. Avitzur, Y. T. Chou, and M. Suenaga	
On the Nature of Coupling of <u>In Situ</u> Superconductors	763
V. M. Pan, V. S. Flis, V. I. Latisheva, M. G. Vasilenko, S. I. Mukhin, and P. A. Verkhovodov	
High-Field Current-Carrying Capacities of 'Titanium Bronze' Processed Multifilamentary Nb ₃ Sn Conductors with Pure and Alloys Cores	771
K. Kamata, N. Tada, K. Itoh, and K. Tachikawa	
The Effects of Indium Addition on the Properties of Internal Tin Diffusion Processed Nb ₃ Sn Wires	779
M. Imaizumi, M. Wakata, K. Yoshizaki, F. Fujiwara, and Y. Hashimoto	
Development of Nb ₃ Sn Cabled Conductor by External Diffusion Process and the Effect of Strain on the Critical Current	787
G. Pasztor and J. W. Ekin	
The Effect of Silicon Impurities on Superconducting Properties of V ₃ Ga-Cu Wire	797
E. D. Gibson, F. A. Schmidt, J. D. Verhoeven, D. K. Finnemore, and J. E. Ostenson	
Improved Performance Powder Metallurgy and In Situ Processed Multifilamentary Superconductors	805
S. Foner, S. Pourrahimi, C. L. H. Thieme, J. Otubo, H. Zhang, T. P. Orlando, A. Zieba, A. Zaleski, S. Sekine, E. J. McNiff, Jr., B. B. Schwartz, W. K. McDonald, R. Roberge, and H. LeHuy	
Optimization of High Current Density A-15 Superconductors Made by the ECN Powder Method	813
H. Veringa, E. M. Hornsveld, and P. Hoogendam	

MECHANICAL BEHAVIOR OF SUPERCONDUCTORS

Strain Effects in Superconducting Compounds (Invited)	823
J. W. Ekin	
Acoustic Emission in Materials for Superconductor Applications, A Review (Invited)	837
G. Pasztor	
Long-Range Atomic Order, Crystallographical Changes and Strain Sensitivity of J_c in Wires Based on Nb_3Sn and Other A15 Type ^c Compounds	851
R. Flükiger, R. Isernhagen, W. Goldacker, and W. Specking	
Elastic Behavior of Polycrystalline Nb_3Sn , V_3Ga , and Nb_3Ge	859
J. F. Bussière, H. LeHuy, and B. Faucher	
Study of Strain Effects on Critical Current and Mechanical Property in "In Situ" Nb_3Sn Conductor	867
M. Fukumoto, T. Okada, K. Yasohama, and K. Yasukochi	
Effect of Internal Reinforcement on the Critical Current Density of Nb_3Sn Wires	875
R. Flükiger, E. Drost, and W. Specking	
Effects of Incoloy 903 and Tantalum Conduits on Critical Current in Nb_3Sn Cable-In-Conduit Conductors	883
M. M. Steeves, M. O. Hoenig, and C. J. Cyders	
Effects of Hot Isostatic Pressing on the Superconducting Properties of Nb_3Sn Multifilamentary Wires	891
T. Fukutsuka, T. Horiuchi, Y. Monju, I. Tatara, Y. Maeda, and M. Moritoki	

AC BEHAVIOR OF SUPERCONDUCTORS

Electromagnetic Theory for In Situ Superconductors (Invited)	899
W. J. Carr, Jr.	

Magnetic Impurity Scattering in In Situ Superconductors	909
D. K. Finnemore, H. C. Yang, V. G. Kogan, and S. L. Miller	
Smooth Transition of Nb ₃ Al Wire Fed by AC Current in High Magnetic Field	917
M. Asdente, M. C. Pascucci, and S. Zannella	
Hysteresis in a Fine Filament NbTi Composite	923
W. J. Carr, Jr. and G. R. Wagner	
AC Losses in Superconducting Mono and Multi- filamentary NbTi Wires Fed by AC Current at Different Frequency Values	931
M. Asdente, V. Ottoboni, G. Ripamonti, and S. Zannella	
AC Losses of 19-Strain Subcables for the ANL 3.3 MJ Coil	939
S. H. Kim, J. W. Dawson, D. G. McGhee, and S. S. Shen	
Current-Carrying Capacity and Energy Losses in Hydrostatically Extruded NbTi Wires	947
V. P. Buryak, N. I. Matrosov, T. M. Yerjemenko, O. N. Mironova, and B. I. Borodaj	

SUPERCONDUCTOR MEASUREMENTS AND STABILITY

Critical Current Measurements on a NbTi Superconducting Wire Standard Reference Material	953
L. F. Goodrich, D. F. Vecchia, E. S. Pittman, and A. F. Clark	
Pulsed Magnetic Field Testing of Multifilamentary Nb ₃ Sn Superconducting Wire	961
J. Glazer, D. R. Dietderich, and J. W. Morris, Jr.	
Influence of Stabilizing Copper on the Quench Characteristics of Nb ₃ Sn Wire	969
K. Tsuchiya and M. Suenaga	
Training Studies of Epoxy-Impregnated Superconductor Windings - Part III: Epoxies, Conductor Insulations and Copper Ratio	977
J. W. Ekin, E. S. Pittman, R. B. Goldfarb, M. J. Superczynski, and D. J. Waltman
