International Cryogenic Materials Conference Board	xix

REVIEW

HOTOL - A Cryogenic Materials Challenge (invited)	1
S. Walmsley and J. Wilson	

COMPOSITE INSULATORS

The Permeability of Composite Materials to Hydrogen and Helium Gas	11
D. Evans and J. T. Morgan	
Gas Permeation and Performance of an FRP Cryostat	17
T. Okada, S. Nishijima, K. Fujioka, and Y. Kuraoka	
The Physical Properties of Carbon Fibre Reinforced PEEK Composites at Low Temperatures	25
D. Evans, J. T. Morgan, S. J. Robertson, and N. Zahlan	
Radiation Damage of Composite Materials at Cryogenic Temperatures	35
S. Nishijima, T. Okada, K. Miyata, H. Yamaoka	
Irradiation Effects on the Interlaminar Tear Strength of GFRP at Cryogenic Temperatures	43
T. Nishiura, K. Katagiri, S. Nishijima, T. Okada, and S. Nakahara	
Advanced Composite Insulations for Superconducting Magnets	51
W. J. Muster, J. Kübler, K. Nylund, and H. Benz	
Cryogenic Properties of Three-Dimensional, Glass-Fabric- Reinforced Plastic	59
S. Nishijima, Y.-A. Wang, T. Okada, T. Uemura, T. Hirokawa, and J. Yasuda	
NBS Boil-Off Calorimeter for Measuring Thermal Conductivity of Insulating Materials	67
W. P. Dubé, L. L. Sparks, and A. J. Slifka	
Thermally Stimulated Deformations in GFRP	75
S. Nishijima, T. Nishiura, T. Ikeda, T. Okada, and T. Hagihara	
Testing Methods and Fracture Energy of Composites at Room and Cryogenic Temperature	83
H. Lau, H. H. Abdelmohsen, and M. K. Abdelsalam	

Fracto-Emission from Composite Materials at Cryogenic Temperatures	91
S. Nakahara, T. Fujita, K. Sugihara, S. Owaki, K. Katagiri, T. Nishiura, and T. Okada	
Experimental and Theoretical Study of Fracture Energy and Crack Dynamics in G-10 at 77 K	99
J. P. Voccio, Y. Iwasa, I. L. Maksimov, and E. S. Bobrov	
Performance of Alumina/Epoxy Thermal Isolation Straps	107
R. D. Kriz and L. L. Sparks	
Effect of Interlaminar Failure on Dynamic Young's Modulus and Internal Friction in Composite Materials	115
T. Okada, S. Nishijima, K. Matsushita, and T. Okamoto	
ALLOY DEVELOPMENT	
Manufacture and Properties of Nitrogen-Containing Cr-Mn and Cr-Ni Austenitic Stainless Steels for Cryogenic Use	123
K. Suemune, T. Sakamoto, T. Ogawa, T. Okazaki, S. Maehara, H. Nakajima, and S. Shimamoto	
Effects of Niobium on Cryogenic Mechanical Properties of Aged Stainless Steels (invited)	131
M. Shimada and S. Tone	
Manganese-Modification of Gamma'-Strengthened Iron-Base Superalloys for Cryogenic Applications	141
K. Hiraga and K. Ishikawa	
Tensile, Fatigue, and Fracture Toughness Properties of a New Low Coefficient of Expansion Cryogenic Structural Alloy, Incoloy 9XA	149
J. L. Martin, R. G. Ballinger, M. M. Morra, M. O. Hoenig, and M. M. Steeves	
Incoloy 9XA, A New Low Coefficient of Thermal Expansion Sheathing Alloy for Use in ICCS Magnets	157
M. M. Morra, R. G. Ballinger, J. L. Martin, M. O. Hoenig, and M. M. Steeves	
Design of 316LN-Type Alloys	165
N. J. Simon and R. P. Reed	
Tensile Properties of New Cryogenic Steels as Conduit Materials of Forced Flow Superconductors at 4 K (invited)	173
H. Nakajima, K. Yoshida, M. Oshikiri, Y. Takahashi, K. Koizumi, S. Shimamoto, M. Shimada, S. Tone, S. Sakamoto, K. Suemune, and K. Nohara	
Mechanical Properties and Inverse Ductility Behavior of Austenitic Cryogenic Fe-Mn-Al-X Steels	183
Y. G. Kim, C. Y. Lim, B. W. Ohr, J. K. Han, and C. Park	
Effect of Chemical Composition on the 4 K Mechanical Properties of 316LN-Type Alloys	191
P. T. Purtscher, R. P. Walsh, and R. P. Reed	

MECHANICAL PROPERTY TEST VARIABLES

Tensile Strain-Rate Effects in Liquid Helium	199
R. P. Reed and R. P. Walsh	
Effects of Specimen Geometry on Temperature and Discontinuous Deformation during Tensile Tests at Liquid Helium Temperature	209
T. Ogata, K. Ishikawa, O. Umezawa, and T. Yuri	
Computer Simulation of Serration near Liquid Helium Temperatures . . .	217
K. Shibata, H. Sakamoto, K. Fujita, and T. Fujita	
Mechanical Tests of Large Specimens at 4 K: Facilities and Results	225
K. Yoshida, H. Nakajima, M. Oshikiri, R. L. Tobler, S. Shimamoto, R. Miura, and J. Ishizaka	
Loading Rate Effects on Discontinuous Deformation in Load-Control Tensile Tests	233
T. Ogata, K. Ishikawa, R. P. Reed, and R. P. Walsh	
Round Robin Tensile and Fracture Test Results for an Fe-22Mn-13Cr-5Ni Austenitic Stainless Steel at 4 K	241
H. Nakajima, K. Yoshida, S. Shimamoto, R. L. Tobler, P. T. Purtscher, and R. P. Reed	
Size, Side-Grooving, and Fatigue Precracking Effects on J-Integral Test Results for SUS 304 Stainless Steel at 4 K . . .	251
M. Shimada, R. L. Tobler, T. Shoji, and H. Takahashi	
Effects of Specimen Size, Side-Grooving, and Precracking Temperature on J-Integral Test Results for AISI 316LN at 4 K	259
T. Ogata, K. Ishikawa, T. Yuri, R. L. Tobler, P. T. Purtscher, R. P. Reed, T. Shoji, K. Nakano, and H. Takahashi	
Thermal Effects and Low-Temperature Frictional Pair Characteristics	267
I. L. Maksimov	
The Instability of Plastic Flow at Low Temperatures - An Explanation from a New Point of View	275
B. Obst and W. Bauriedl	

MECHANICAL AND PHYSICAL PROPERTIES

Exoelectron Emission from Stainless Steel during Deformation between 30 and 300 K	283
S. Owaki, K. Katagiri, T. Okada, S. Nakahara, and K. Sugihara	
Tensile Behavior of Superplastic Al-Cu-Li-Zr Alloy 2090 at Cryogenic Temperatures	291
J. Glazer, J. W. Morris, Jr., and T. G. Nieh	
Effects of Grain Size and Cold Rolling on Cryogenic Properties of Copper	299
R. P. Reed, R. P. Walsh, and F. R. Fickett	

Effects of Grain Morphology and Grain Size on the Mechanical Properties of High-Manganese Austenitic Steel for Cryogenic Use (invited)	309
D. Wang and L. Li	
Research on High-Pressure Vessels of Inconel 718 for Containing Liquid Oxygen	317
X. Cheng, Y.-Y. Li, and Z.-C. Feng	
Effect of Hydrogen on 21-7-9 Austenitic Steel at Low Temperature (invited)	325
L.-M. Ma, Y.-Y. Li, and G.-J. Liang	
Inclusions and Fracture Toughness in Stainless Steel Welds at 4 K	335
C. N. McCowan and T. A. Siewert	
High-Energy-Beam Welding of Type 316LN Stainless Steel for Cryogenic Applications	343
T. A. Siewert, D. Gorni, and G. Kohn	
Strength, Fatigue, and Toughness Properties of an Fe-18Cr-16Ni-6Mn-2Mo Fully Austenitic SMA Weld at 4 K	351
R. L. Tobler, R. E. Trevisan, T. A. Siewert, H. I. McHenry, P. T. Purtscher, C. N. McCowan, and T. Matsumoto	
Mechanical Properties of Welded Joints in Mn-Cr and Ni-Cr Stainless Steels at 4 K	359
N. Yamagami, Y. Kohsaka, and C. Ouchi	
Fracture Toughness Tests on 304 Stainless Steel in High Magnetic Fields at Cryogenic Temperatures	367
E. Fukushima, S. Kobatake, M. Tanaka, and H. Ogiwara	
Influence of Post-Anneal Cooling Treatments on Suppression of Cryogenic Intergranular Fracture in Experimental Ni-Free High-Mn Austenitic Steels	371
M. J. Strum and J. W. Morris, Jr.	
Fracture Behavior of 316LN Alloy in Uniaxial Tension at Cryogenic Temperatures	379
P. T. Purtscher, R. P. Walsh, and R. P. Reed	
Acoustic Emission and Its Applications to Fracture Studies of Austenitic Stainless Steels at 4 K	387
H. Takahashi, T. Shoji, and R. L. Tobler	
Tensile and Fatigue-Creep Properties of a Copper-Stainless Steel Laminate	397
L. L. Scull and R. P. Reed	
Electromagnetic Impact Fracture of Ti-6Al-4V Alloy and 25Mn-5Cr-1Ni Steel at Cryogenic Temperature	405
Y. Nakasone, H. Fujita, K. Hiraga, and K. Ishikawa	
Low Temperature Mechanical Property Measurements of Silica Aerogel Foam	413
L. L. Scull and J. M. Arvidson	
Cryogenic Flexure Material Fatigue Test Facility	419
M. T. Stier, R. A. Rockwell, and M. H. Krim	

Low Temperature Magnetic Properties of Gamma'-Strengthened Iron-Base Alloys	427
K. Hiraga	
Development and Application of High Strength, High Conductivity CuNb in Situ Composite Wire and Strip	435
C. V. Renaud, E. Gregory, and J. Wong	
Effects of Oxidation and Roughness on Cu Contact Resistance from 4 K to 290 K	443
M. J. Nilles and S. W. Van Sciver	
A15 CONDUCTORS	
Fabrication of Nb ₃ Al Based Superconductors by Continuous Quenching Techniques (invited)	451
K. Togano and K. Tachikawa	
Nb ₃ Al Superconductors Produced by Laser Alloying, Melt Spinning and Infiltration	461
H. C. Freyhardt, W. Schaper, J. Tebbe, I. Zimmermann, and M. Kehlenbeck	
Critical Current Measurement and Coil Tests for Nb ₃ Al Superconducting Tapes Fabricated by Continuous Laser and Electron Beam Irradiation	469
H. Kumakura, K. Togano, Y. Iijima, and K. Tachikawa	
Superconducting Properties of Nb ₃ Ge Tapes Prepared Continuously by Chemical Vapor Deposition	477
Y. Nakagawa, M. Umeda, and Y. Kimura	
Industrial Powder Metallurgy Processing for Production of High Field Nb ₃ Sn	485
A. Hecker, E. Gregory, J. Wong, S. Pourrahimi, C. L. H. Thieme, and S. Foner	
Development of ECN-Type Niobium-Tin Wire Towards Smaller Filament Size	493
E. M. Hornsveld, J. D. Elen, C. A. M. van Beijnen, and P. Hoogendam	
Development of Internal Tin Nb ₃ Sn Conductors for High Field Magnet Use	499
D. W. Hazelton and G. M. Ozeryansky	
Aluminium Stabilized Nb ₃ Sn Superconductors	507
M. Thöner, H. Krauth, J. Rudolph, and A. Szulczyk	
Status of the Superconductor Development Program at Teledyne Wah Chang Albany	515
D. Smathers, P. O'Larey, M. Siddall, and W. McDonald	
Interfilamentary Field Enhancement below H _{c1} in MF Conductors	523
A. J. Markworth, P. M. Hui, D. Stroud, and E. W. Collings	
Influencing Factors on Strain Effects in the Practical Nb ₃ Sn Wires	531
K. Katagiri, K. Saito, T. Okada, A. Nagata, and K. Noto	

Strain Effect in Multifilamentary Nb ₃ Sn Superconducting Wires Reacted by a Two Stage Heat Treatment Process	539
K. Saito, K. Katagiri, T. Okada, A. Nagata, H. Kodaka, and Y. Yoshida	
Transverse Stress Effect on Multifilamentary Nb ₃ Sn Superconductor	547
J. W. Ekin	
The Effects of Various Conductor Components on Nb ₃ Sn Filament Prestrain in Cable-in-Conduit Conductors	553
J. R. Miller and L. T. Summers	
Calculation of Stress Tensors in Nb ₃ Sn Multifilamentary Wires	561
W. Goldacker and R. Flükiger	
Effect of Transverse Compression on I _c of Nb ₃ Sn Multifilamentary Wire	569
W. Specking, W. Goldacker, and R. Flükiger	
Fatigue and Strain Effects in NbTi, Nb ₃ Sn and V ₂ (Hf,Zr) Multifilamentary Superconductors	577
T. Kuroda, H. Wada, and K. Tachikawa	
High-Field Superconducting Properties of V ₃ Ga Tapes	585
K. Tachikawa, T. Takeuchi, Y. Iijima, K. Inoue, and K. Togano	

HIGH-CRITICAL-TEMPERATURE SUPERCONDUCTORS

Properties of High T _c Superconducting Oxides (invited)	593
K. Kitazawa	
Superconducting Properties and Structural Characterization of High T _c Oxides	603
A. R. Moodenbaugh, D. E. Cox, J. J. Hurst, T. Asano, R. L. Sabatini, and M. Suenaga	
Magnetization Studies of High T _c YBa ₂ Cu ₃ O ₇	607
A. K. Ghosh, M. Suenaga, T. Asano, A. R. Moodenbaugh, and R. L. Sabatini	
Superconducting Critical Currents in Y ₁ Ba ₂ Cu ₃ O ₇	613
D. K. Finnemore, J. E. Ostenson, L. Ji, R. W. McCallum, and J. R. Clem	
High Temperature Superconductivity in the Ba-Y-Cu Oxide System	617
K. Togano, H. Kumakura, K. Fukutomi, and K. Tachikawa	
Anomalous Behavior of Tunneling Contacts in Superconducting Perovskite Structures	625
J. Moreland, L. F. Goodrich, J. W. Ekin, T. E. Capobianco, and A. F. Clark	
Magnetic Studies of a 1-2-3 (Y,Gd)-Ba-Cu-Oxide Superconductor	633
E. W. Collings, P. J. Melling, S. L. Swartz, R. D. Smith, J. J. Rayment, M. J. Pechan, and M. Pardavi-Horvath	
Design of Cryostable Conductors for 80 K	639
E. W. Collings	

Powder Preparation and Thermal Properties of 1-2-3 Y Ba Cu Oxide Superconductor	647
P. J. Melling, S. L. Swartz, M. Pardavi-Horvath, and E. W. Collings	

CHEVREL PHASES

PbMo ₆ S ₈ Wires from Hip Prereacted Material	655
W. Goldacker, S. Miraglia, Y. Hariharan, T. Wolf, and R. Flükiger	
First Chevrel Phase SnMo ₆ S ₈ Wires Using Cold Powder Metallurgy Process Prepared from Tin-Doped "in Situ" Reacted Powders (invited)	663
M. Sergeant, M. Hirrien, O. Pena, J. Padiou, R. Chevrel, M. Couach, P. Genevey, and P. Dubots	
High Field Performance of PbMo ₆ S ₈ Superconductors (invited)	669
T. Yamashita, K. Hamasaki, K. Noto, K. Watanabe, and T. Komata	
Critical Current Density and Upper Critical Field of the PbMo ₆ S ₈ Chevrel Phase (invited)	679
B. Seeber, M. Decroux, and Ø. Fischer	
Controlled Microstructures in Superconducting Chevrel Phase Thin Films	689
M. J. Neal, T. P. Orlando, and J. M. Tarascon	

FLUX PINNING

A Model for the Resistive Critical Current Transition in Composite Superconductors (invited)	697
W. H. Warnes	
Comments on Summation of Elementary Pinning Forces (invited)	707
K. Yamafuji, T. Matsushita, T. Fujiyoshi, and K. Toko	
The Nature of Flux-Flow in NbTi Superconductors	717
D. P. Hampshire, J. V. A. Somerkoski, J. Cosier, and H. Jones	
Dependence of Flux Pinning on Defect Concentration and Magnetic Field in High Field Superconductors	725
H. Küpfer, R. Meier-Hirmer, and W. Schauer	
Enhancement of the Saturated Critical Current Density in NbTi Wires	733
H. Küpfer and T. Matsushita	

SUPERCONDUCTING FILMS AND JUNCTIONS

Sheet-Resistance Dependence of Electrical Properties of NbN Granular Thin Films	739
N. Yoshikawa, T. Akeyoshi, M. Kojima, and M. Sugahara	
Niobium Nitride Josephson Junctions with Silicon and Germanium Barriers	749
E. J. Cukauskas and W. L. Carter	

Noise Properties of Submicron Ta/PbBi Tunnel Junctions	757
E. K. Track, A. Worsham, G.-J. Cui, and D. E. Prober	
Thermal Stability of Nb/AlO _x /Nb Josephson Junctions	765
M. Hidaka, H. Tsuge, and Y. Wada	
Integration of Nb/AlO _x /Nb Junctions Planarized with Bias-Sputtered SiO ₂ Films	773
H. Hoko, T. Imamura, and S. Hasuo	
Thin Film RF-SQUID with Pulse Trimmed Microbridge Pair	781
Z. Yi and C. Heiden	
Flux Pinning in Amorphous MoSi Films for Abrikosov Vortex Memory . . .	789
S. Kubo, K. Miyahara, and M. Mukaida	
Annealing of Thin Plasma Cleaned Nb ₃ Ge Films	797
B. Häuser, Y. Kato, B. David, and H. Rogalla	
The Influence of Ion-Irradiation Induced Disorder and Post-Annealing on Thin Film Superconductive Compounds MoN, VN, and TiN	805
D. K. Christen, J. T. Ellis, S. T. Sekula, J. R. Thompson, J. D. Lewis, W. R. Anderson, and S. J. Pennycook	
Properties of Niobium-Titanium Nitride Superconducting Thin Films	813
A. Nigro, G. Nobile, V. Palmieri, and R. Vaglio	
The Effects of Substrate Material and Rapid Thermal Annealing on the Structure and Superconductive Properties of NbCN	821
W. L. Carter, E. J. Cukauskas, and S. B. Qadri	
Preparation of a Long Superconducting NbN Wire by RF Sputtering Method	829
H. Morita, K. Watanabe, K. Noto, and H. Fujimori	
The Influence of Liquid Metal Infiltration on the Superconducting Characteristics of Niobium Nitride	835
L. T. Summers, J. R. Miller, M. J. Strum, R. J. Weimer, and D. E. Kizer	

SUPERCONDUCTING FILAMENTS

Nb ₃ Sn Multifilamentary Wires with Composite Core Filaments	843
S. Gauss, W. Specking, F. Weiss, E. Seibt, J. Xu, and R. Flükiger	
Superconducting Properties of Powder-Metallurgically Produced Cu-Nb ₃ Sn Composite Wires	851
W. Schaper, J. Wecker, K. Heine, R. Bormann, and H. C. Freyhardt	
Critical Current Densities of Alloyed Multifilamentary Nb ₃ Sn Wires by the Internal Tin Process	859
M. Suenaga	
Stabilizer Design Considerations in Fine-Filament Cu/NbTi Composites (invited)	867
E. W. Collings	

AC Losses in a Ta Barrier Nb ₃ (SnIn) Strand in Demo Poloidal Coil	879
T. Ando, Y. Takahashi, M. Nishi, and S. Shimamoto	
Calculation of Strand Coupling Loss in Rectangular Cables	887
R. A. Hartmann, D. Dijkstra, F. P. H. van Beckum, and L. J. M. van de Klundert	
Reduction of Coupling in Fine Filamentary Cu-NbTi Composites by the Addition of Manganese to the Matrix	895
T. S. Kreilick, E. Gregory, J. Wong, R. M. Scanlan, A. K. Ghosh, W. B. Sampson, and E. W. Collings	
Coupling Losses in a Bronze Processed Multifilamentary Nb ₃ Sn Superconducting Composite with a Nb Barrier	901
K. Takahata, S. Nishijima, T. Okada, H. Yoshida, and H. Kodaka	
Analysis of AC-Loss Measurements on Superconductors Using Coil Configurations	909
A. J. M. Roovers, H. A. van den Brink, and L. J. M. van de Klundert	
SUPERCONDUCTING CONDUCTORS	
Comparative Study of Radiation Damage and Activation of Superconducting Magnet for Fusion Reactor	917
T. Okada and S. Nishijima	
31.1 T-Hybrid Magnet and Superconducting Materials Research at HFLSM, Tohoku University	925
K. Noto, K. Watanabe, N. Kobayashi, A. Hoshi, S. Miura, G. Kido, Y. Nakagawa, and Y. Muto	
Conductor Development for the Superconducting Super Collider (SSC) (invited)	933
E. Gregory	
Recent Production of Developmental SSC Wire	943
C. G. King, H. C. Kanithi, and B. A. Zeitlin	
Expectations and Limitations of J _c in Practical NbTi Conductors	951
H. Kanithi	
Microstructural Study of Multifilamentary Nb-46.5 wt.% Ti Superconducting Wires	959
R. Taillard, J. Foct, and H.-G.-Ky	
High-Titanium Nb-Ti Alloys - Initial Microstructural Studies	967
P. J. Lee, D. C. Larbalestier, and J. McKinnell	
Metallographic Preparation of Superconducting Alloys and Composites	975
P. E. Danielson and D. B. Smathers	
Recent Developments of Superconducting Wire in China (invited)	983
L. Zhou	
The Properties of Multifilamentary NbTi-25Ta/Cu Superconductors in High Magnetic Fields	995
N. W. X. Zhou, X. Wu, Y. Li, Y. Yie, and L. Zhou	

High Titanium Nb-Ti Alloys - Initial High Critical Current Density Properties	1001
J. McKinnell, P. J. Lee, R. Remsbottom, D. C. Larbalestier, P. M. O'Larey, and W. K. McDonald	
Current Transfer Effects and Their Influence on the Experimental Critical Current Density of Multifilamentary and Monofilamentary Nb-Ti Composites	1009
W. H. Warnes, L. D. Cooley, and D. C. Larbalestier	
Current-Ripple Effect on Superconductive DC Critical Current Measurements	1019
L. F. Goodrich, S. L. Bray, and A. F. Clark	
Calorimetric Studies of the Superconducting Transition as Function of Thermomechanical Processing in Fine-Filament Cu/NbTi Composites	1027
E. W. Collings, T. S. Kreilick, E. Gregory, P. J. Lee, and J. C. Ho	
Radiation-Induced Changes of Critical Fields in NbTi Superconductors	1033
H. W. Weber, W. Khier, M. Wacenovsky, and H. Hoch	
Training and Strain of Superconducting Composites	1041
I. L. Maksimov	
Normal Zone Propagation Velocities in Superconducting Wires Having a High-Resistivity Matrix	1049
H. H. J. ten Kate, H. Boschman, and L. J. M. van de Klundert	
Specific Butt Welds for Nb-Ti Multifilamentary Superconducting Composites	1057
F.-X. Qiu, S.-Y. Wang, and Y.-F. Bao
