<i>Acknowledgements</i>	page vi
<i>Preface</i>	vii
A. G. Sillitto's influence in mathematics reform in Scottish schools by <i>A. G. Robertson</i>	1
An introduction to trigonometry—a draft chapter by <i>A. G. Sillitto</i>	5
Idoneities by <i>D. G. Tahta</i>	25
Tessellations of polyominoes by <i>A. W. Bell</i>	43
Magnitudes, measurement and children by <i>W. M. Brookes</i>	55
'I thought you were going to tell us about automorphisms' by <i>A. P. K. Caldwell</i>	73
The concept of function in the teaching of elementary mathematics by <i>Lucienne Félix</i>	79
Directed numbers by <i>Beryl Fletcher</i>	101
Bound vectors and free vectors by <i>T. J. Fletcher</i>	125
The human element in mathematics by <i>C. Gattegno</i>	131
Analytical methods in transformation geometry by <i>G. Giles</i>	139
A group calculus for geometry by <i>A. G. Howson</i>	167
Angles, circles and Morley's theorem by <i>R. C. Lyness</i>	177
A mathematical activity—enlargements by <i>T. D. Morris</i>	189
The significance of concrete materials in the teaching of mathematics by <i>W. Servais</i>	203
An exploration in reflection geometry by <i>W. O. Storer</i>	209
Any must go by <i>E. B. C. Thornton</i>	219
Drawings and representation by <i>D. H. Wheeler</i>	229
<i>Index</i>	243
