

TABLE OF CONTENTS

0. Mathematical signs and symbols

0.1.	Mathematical signs	15
0.2.	Symbols used in the theory of sets.	17
0.3.	Symbols of logic.	17

1. Arithmetic

1.1.	Set theory	18
1.1.1.	Fundamental notions	18
1.1.2.	Set operations.	19
1.1.3.	Mappings, cardinality	20
1.2.	Real numbers.	20
1.2.1.	General	20
1.2.2.	Irrational numbers	21
1.2.3.	Binomial coefficients, binomial theorem	22
1.3.	Imaginary or complex numbers	25
1.3.1.	Imaginary numbers	25
1.3.2.	Complex numbers in arithmetical form	26
1.3.3.	Complex numbers in a goniometric form	28
1.3.4.	Complex numbers in exponential form	30
1.3.5.	Natural logarithms of complex and negative numbers .	32
1.3.6.	Graphical methods.	33
1.4.	Proportions.	37
1.5.	Logarithms.	39
1.5.1.	General	39
1.5.2.	Rules for calculating with logarithms	41
1.5.3.	The use of logarithm tables for finding common logarithms	41
1.6.	Combinatoric analysis	43
1.6.1.	Permutations	43
1.6.2.	Variations	45
1.6.3.	Combinations	45
1.7.	Per cent calculation, interest calculation	46
1.7.1.	Per cent (per mille) calculation	46
1.7.2.	Interest calculation	47

1.8.	Sequences and series	48
1.8.1.	General	48
1.8.2.	Arithmetic sequences and series	50
1.8.3.	Geometric sequences and series	52
1.8.4.	Compound interest calculation	53
1.8.5.	Annuities.	55
1.9.	Determinants	57
1.9.1.	General	57
1.9.2.	Theorems on determinants	59
1.9.3.	Applications of determinants	64
1.10.	Matrices	66
1.10.1.	General	66
1.10.2.	Theorems on matrices	70
1.10.3.	Applications	77

2. Equations, functions, vectors

2.1.	Equations	79
2.1.1.	General	79
2.1.2.	Algebraic equations in one variable	81
2.1.2.1.	Linear equations	81
2.1.2.2.	Quadratic equations	82
2.1.2.3.	Cubic equations	84
2.1.2.4.	Definitive equation of the n th degree	87
2.1.3.	Transcendental equations.	88
2.1.3.1.	Exponential equations	88
2.1.3.2.	Logarithmic equations	89
2.1.4.	Approximation methods for determining the roots of an equation	90
2.1.4.1.	Regula falsi.	90
2.1.4.2.	Newton's method of approximation	91
2.1.4.3.	Iterative methods	92
2.1.4.4.	Graphical solution of equations	93
2.1.5.	Systems of equations.	93
2.1.5.1.	Linear equations in two variables	94
2.1.5.2.	Linear equations in three variables	96
2.1.5.3.	Gaussian algorithm	98
2.1.5.4.	Quadratic equations in two variables.	99
2.1.5.5.	Graphical solution of systems of equations in two variables	101
2.2.	Inequalities.	102

2.3.	Functions	103
2.3.1.	General	103
2.3.2.	Further methods of analytic representation	108
2.3.3.	Graphical representation of functions	112
2.4.	Vector calculus	117
2.4.1.	General	117
2.4.2.	Multiplication of vectors	121
2.4.3.	Geometrical applications of vector calculus	125
2.5.	Reflection in a circle, inversion	130

3. Geometry

3.1.	General	134
3.2.	Planimetry	140
3.2.1.	Triangle ABC	140
3.2.2.	Quadrilaterals.	146
3.2.3.	Polygons (n -sided polygons).	149
3.2.4.	Circle	154
3.3.	Stereometry	156
3.3.1.	General theorems	156
3.3.2.	Solids bounded by plane surfaces	157
3.3.3.	Solids bounded by curved surfaces.	162
3.4.	Goniometry, plane trigonometry, hyperbolic functions	169
3.4.1.	Goniometry	169
3.4.2.	Trigonometric formulas for oblique-angled triangles .	184
3.4.3.	Goniometric equations	189
3.4.4.	Inverse trigonometric functions	193
3.4.5.	Hyperbolic functions.	196
3.4.6.	Inverse hyperbolic functions	201
3.5.	Spherical trigonometry	204
3.5.1.	General	204
3.5.2.	Right spherical triangle	204
3.5.3.	Oblique spherical triangle.	205
3.5.4.	Mathematical geography	211

4. Analytical geometry

4.1.	Analytical geometry of the plane	214
4.1.1.	The various systems of coordinates	214
4.1.2.	Points and line segments	215

4.1.3.	Straight line	217
4.1.4.	Circle	221
4.1.5.	Parabola	225
4.1.6.	Ellipse	232
4.1.7.	Hyperbola	241
4.1.8.	The general equation of the second degree in x and y .	251
4.2.	Analytical geometry of space	257
4.2.1.	The various systems of coordinate.	257
4.2.2.	Points and line segments in space	259
4.2.3.	Planes in space	261
4.2.4.	Straight lines in space	265
4.2.5.	Surfaces of the second order	270
4.2.6.	The general equation of the second degree in x , y and z	277

5. Differential calculus

5.1.	Limits	279
5.2.	Difference quotient, differential quotient, differential. .	281
5.3.	Rules for differentiation	283
5.4.	Derivatives of the elementary functions	289
5.5.	Differentiation of a vector function	292
5.6.	Graphical differentiation	293
5.7.	Extrema of functions (maxima and minima)	293
5.8.	Mean-value theorems	299
5.9.	Indeterminate expressions	300

6. Differential geometry

6.1.	Plane curves	303
6.1.1.	Main elements of plane curves.	303
6.1.2.	A few important plane curves.	311
6.2.	Space curves	320
6.3.	Curved surfaces	328

7. Integral calculus

7.1.	Definition of the indefinite integral	330
7.2.	Basic integrals	330
7.3.	Rules of integration	331

7.4.	A few special integrals	341
7.4.1.	Integrals of rational functions.	341
7.4.2.	Integrals of irrational functions	344
7.4.3.	Integrals of trigonometric functions	346
7.4.4.	Integrals of the hyperbolic functions.	351
7.4.5.	Integrals of exponential functions	355
7.4.6.	Integrals of the logarithmic functions	356
7.4.7.	Integrals of the inverse trigonometric functions (arc functions)	357
7.4.8.	Integrals of the inverse hyperbolic functions (area functions)	358
7.5.	Definite integral.	358
7.5.1.	General	358
7.5.2.	Mean-value theorems for integral calculus	359
7.5.3.	Geometrical interpretation of the definite integral . . .	360
7.5.4.	Methods of approximation for definite integrals	361
7.5.5.	Graphical integration	363
7.5.6.	Improper integrals.	364
7.5.7.	A few definite integrals.	365
7.5.8.	Applications of the definite integral	368
7.6.	Line integral	377
7.6.1.	Line integrals in the plane	377
7.6.2.	Line integrals in space	378
7.6.3.	Line integral of a vector	379
7.7.	Multiple integrals	380
7.7.1.	Double integrals.	380
7.7.2.	Triple integrals	386

8. Differential equations

8.1.	General	389
8.2.	Ordinary differential equations of the first order. . . .	393
8.2.1.	Separation of variables.	393
8.2.2.	Homogeneous differential equations of the first order .	394
8.2.3.	Inhomogeneous differential equations of the first order.	394
8.2.4.	Total (exact) differential equations of the first order. .	397
8.2.5.	Integrating factors	398
8.2.6.	Bernoulli differential equation	400
8.2.7.	Clairaut differential equation	400
8.2.8.	Riccati differential equation	401

8.3.	Ordinary differential equations of the second order	402
8.3.1.	Special cases	402
8.3.2.	Linear homogeneous differential equation of the second order with constant coefficients	405
8.3.3.	Linear homogeneous differential equation of the second order with variable coefficients	407
8.3.4.	Euler differential equation	408
8.3.5.	Linear inhomogeneous differential equation of the second order with constant coefficients.	411
8.3.6.	Linear inhomogeneous differential equation of the second order with variable coefficients	415
8.4.	Ordinary differential equations of the third order	418
8.4.1.	Linear homogeneous differential equation of the third order with constant coefficients	418
8.4.2.	Linear inhomogeneous differential equation of the third order with constant coefficients	419
8.5.	Integration of differential equations by power series	419
8.6.	Partial differential equations	421
8.6.1.	Simple partial differential equations	421
8.6.2.	Linear partial differential equation of the first order for $z = f(x, y)$	422

9. Infinite series, Fourier series, Fourier integral, Laplace transforms

9.1.	Infinite series	425
9.1.1.	General	425
9.1.2.	Convergence criteria	425
9.1.3.	Some infinite convergent series	427
9.1.4.	Power series	429
9.1.5.	Approximation formulas	435
9.2.	General statements on Fourier series, Fourier integrals, and Laplace transforms	436
9.3.	Fourier series	439
9.4.	Fourier integral, example of calculation	450
9.5.	Laplace transforms	451
9.6.	Employment of Laplace transforms; solution of differential equations	455
9.7.	Table of correspondences of some rational Laplace integrals	460

**10. Theory of probability; statistics; error calculation;
mathematical analysis of observations**

10.1. Theory of probability	463
10.2. Statistics	468
10.3. Error calculations	473
10.4. Calculus of observations	474

11. Linear Optimization

11.1. General	481
11.2. Graphical procedure	483
11.3. Simplex procedure (simplex algorithm)	485
11.4. Simplex table	491

12. Algebra of logic (Boolean algebra)

12.1. General	493
12.2. Arithmetical laws, arithmetical rules	495
12.3. Further possibilities of interconnecting two input variables (lexigraphic order)	496
12.4. Normal forms	498
12.5. Karnaugh tables	500
Appendix: The dual system (dyadic system)	503
The Roman decimal system	503
Greek alphabet	503
Frequently used numbers and their common log- arithms	504
Index	509
