Preface to the Corrected and Enlarged Edition v
Preface to the First Edition vii
Preface to the Third Edition vii
Preface to the Fourth Edition vii
Editor's Foreword viii
Acknowledgment ix
The Order of Presentation of the Formulas xxiii
Use of the Tables xxvii
Index of Special Functions and Notations xxxix
Notations xliii
Note on the Bibliographic References xlv

0. Introduction 1
0.1 Finite Sums 1
0.11 Progressions 1
0.12 Sums of powers of natural numbers 1
0.13 Sums of reciprocals of natural numbers 2
0.14 Sums of products of reciprocals of natural numbers 3
0.15 Sums of the binomial coefficients 3
0.2 Numerical Series and Infinite Products 5
0.21 The convergence of numerical series 5
0.22 Convergence tests 5
0.23-0.24 Examples of numerical series 7
0.25 Infinite products 11
0.26 Examples of infinite products 12
0.3 Functional Series 12
0.30 Definitions and theorems 12
0.31 Power series 13
0.32 Fourier series 16
0.33 Asymptotic series 18
0.4 Certain Formulas from Differential Calculus 18
0.41 Differentiation of a definite integral with respect to a parameter 18
0.42 The *n*th derivative of a product 19
0.43 The *n*th derivative of a composite function 19
0.44 Integration by substitution 20

1. Elementary Functions 21
1.1 Power of Binomials 21
1.11 Power series 21
1.12 Series of rational fractions 22

1.2 The Exponential Function 22
1.21 Series representations 22
1.22 Functional relations 23
1.23 Series of exponentials 23
1.3-1.4 Trigonometric and Hyperbolic Functions 23
1.30 Introduction 23
1.31 The basic functional relations 24
1.32 The representation of powers of trigonometric and hyperbolic functions in terms of functions of multiples of the argument (angle) 25
1.33 The representation of trigonometric and hyperbolic functions of multiples of the argument (angle) in terms of powers of these functions 27
1.34 Certain sums of trigonometric and hyperbolic functions 29
1.35 Sums of powers of trigonometric functions of multiple angles 30
1.36 Sums of products of trigonometric functions of multiple angles 32
1.37 Sums of tangents of multiple angles 32
1.38 Sums leading to hyperbolic tangents and cotangents 32
1.39 The representation of cosines and sines of multiples of the angle as finite products 33
1.41 The expansion of trigonometric and hyperbolic functions in power series 34
1.42 Expansion in series of simple fractions 36
1.43 Representation in the form of an infinite product 37
1.44-1.45 Trigonometric (Fourier) series 38
1.46 Series of products of exponential and trigonometric functions 42
1.47 Series of hyperbolic functions 42
1.48 Lobachevskiy's "Angle of parallelism" $\Pi(x)$ 43
1.49 The hyperbolic amplitude (the Gudermannian) gd x 43
1.5 The Logarithm 44
1.51 Series representation 44
1.52 Series of logarithms 46
1.6 The Inverse Trigonometric and Hyperbolic Functions 47
1.61 The domain of definition 47
1.62-1.63 Functional relations 47
1.64 Series representations 51

2. Indefinite Integrals of Elementary Functions 53

2.0 Introduction 53
2.00 General remarks 53
2.01 The basic integrals 54
2.02 General formulas 55
2.1 Rational Functions 56
2.10 General integration rules 56
2.11-2.13 Forms containing the binomial $a + bx^k$ 58
2.14 Forms containing the binomial $1 \pm x^n$ 63
2.15 Forms containing pairs of binomials: $a + bx$ and $\alpha + \beta x$ 66
2.16 Forms containing the trinomial $a + bx^k + cx^{2k}$ 67
2.17 Forms containing the quadratic trinomial $a + bx + cx^2$ and powers of x 68
2.18 Forms containing the quadratic trinomial $a + bx + cx^2$ and the binomial $\alpha + \beta x$ 70
2.2 Algebraic Functions 70
2.20 Introduction 70
2.21 Forms containing the binomial $a + bx^k$ and $\sqrt{x}$ 71
2.22-2.23 Forms containing $\sqrt[s]{(a + bx)^k}$ 72
2.24 Forms containing $\sqrt{a + bx}$ and the binomial $\alpha + \beta x$ 75

2.25 Forms containing $\sqrt{a + bx + cx^2}$ 80
2.26 Forms containing $\sqrt{a + bx + cx^2}$ and integral powers of x 81
2.27 Forms containing $\sqrt{a + cx^2}$ and integral powers of x 86
2.28 Forms containing $\sqrt{a + bx + cx^2}$ and first- and second-degree polynomials 89
2.29 Integrals that can be reduced to elliptic or pseudo-elliptic integrals 90
2.3 The Exponential Function 92
2.31 Forms containing e^{ax} 92
2.32 The exponential combined with rational functions of x 92
2.4 Hyperbolic Functions 93
2.41-2.43 Powers of sh x, ch x, th x and cth x 93
2.44-2.45 Rational functions of hyperbolic functions 107
2.46 Algebraic functions of hyperbolic functions 113
2.47 Combinations of hyperbolic functions and powers 119
2.48 Combinations of hyperbolic functions, exponentials, and powers 128
2.5-2.6 Trigonometric Functions 129
2.50 Introduction 129
2.51-2.52 Powers of trigonometric functions 130
2.53-2.54 Sines and cosines of multiple angles and of linear and more complicated functions of the argument 139
2.55-2.56 Rational functions of the sine and cosine 147
2.57 Forms containing $\sqrt{a \pm b \sin x}$, or $\sqrt{a \pm b \cos x}$ and forms reducible to such expressions 153
2.58-2.62 Integrals reducible to elliptic and pseudo-elliptic integrals 157
2.63-2.65 Products of trigonometric functions and powers 182
2.66 Combinations of trigonometric functions and exponentials 194
2.67 Combinations of trigonometric and hyperbolic functions 198
2.7 Logarithms and Inverse-Hyperbolic Functions 203
2.71 The logarithm 203
2.72-2.73 Combinations of logarithms and algebraic functions 203
2.74 Inverse hyperbolic functions 206
2.8 Inverse Trigonometric Functions 207
2.81 Arcsines and arccosines 207
2.82 The arcsecant, the arccosecant, the arctangent, and the arccotangent 207
2.83 Combinations of arcsine or arccosine and algebraic functions 208
2.84 Combinations of the arcsecant and arccosecant with powers of x 209
2.85 Combinations of the arctangent and arccotangent with algebraic functions 209

3.-4. Definite Integrals of Elementary Functions 211

3.0 Introduction 211
3.01 Theorems of a general nature 211
3.02 Change of variable in a definite integral 212
3.03 General formulas 213
3.04 Improper integrals 215
3.05 The principal values of improper integrals 216
3.1-3.2 Power and Algebraic Functions 217
3.11 Rational functions 217
3.12 Products of rational functions and expressions that can be reduced to square roots of first- and second-degree polynomials 219
3.13-3.17 Expressions that can be reduced to square roots of third- and fourth-degree polynomials and their products with rational functions 219
3.18 Expressions that can be reduced to fourth roots of second-degree polynomials and their products with rational functions 282

3.19-3.23 Combinations of powers of x and powers of binomials of the form $(\alpha + \beta x)$ 284
3.24-3.27 Powers of x, of binomials of the form $\alpha + \beta x^p$, and of polynomials in x 292
3.3-3.4 Exponential Functions 304
3.31 Exponential functions 304
3.32-3.34 Exponentials of more complicated arguments 306
3.35 Combinations of exponentials and rational functions 310
3.36-3.37 Combinations of exponentials and algebraic functions 315
3.38-3.39 Combinations of exponentials and arbitrary powers 317
3.41-3.44 Combinations of rational functions of powers and exponentials 325
3.45 Combinations of powers and algebraic functions of exponentials 335
3.46-3.48 Combinations of exponentials of more complicated arguments and powers 337
3.5 Hyperbolic Functions 344
3.51 Hyperbolic functions 344
3.52-3.53 Combinations of hyperbolic functions and algebraic functions 347
3.54 Combinations of hyperbolic functions and exponentials 356
3.55-3.56 Combinations of hyperbolic functions, exponentials, and powers 360
3.6-4.1 Trigonometric Functions 365
3.61 Rational functions of sines and cosines and trigonometric functions of multiple angles 365
3.62 Powers of trigonometric functions 369
3.63 Powers of trigonometric functions and trigonometric functions of linear functions 372
3.64-3.66 Powers and rational functions of trigonometric functions 377
3.67 Square roots of expressions containing trigonometric functions 386
3.68 Various forms of powers of trigonometric functions 389
3.69-3.71 Trigonometric functions of more complicated arguments 395
3.72-3.74 Combinations of trigonometric and rational functions 405
3.75 Combinations of trigonometric and algebraic functions 418
3.76-3.77 Combinations of trigonometric functions and powers 420
3.78-3.81 Rational functions of x and of trigonometric functions 432
3.82-3.83 Powers of trigonometric functions combined with other powers 446
3.84 Integrals containing the expressions $\sqrt{1 - k^2 \sin^2 x}$, $\sqrt{1 - k^2 \cos^2 x}$, and similar expressions 460
3.85-3.88 Trigonometric functions of more complicated arguments combined with powers 464
3.89-3.91 Trigonometric functions and exponentials 476
3.92 Trigonometric functions of more complicated arguments combined with exponentials 484
3.93 Trigonometric and exponential functions of trigonometric functions 486
3.94-3.97 Combinations involving trigonometric functions, exponentials, and powers 489
3.98-3.99 Combinations of trigonometric and hyperbolic functions 503
4.11-4.12 Combinations involving trigonometric and hyperbolic functions and powers 511
4.13 Combinations of trigonometric and hyperbolic functions and exponentials 519
4.14 Combinations of trigonometric and hyperbolic functions, exponentials, and powers 521
4.2-4.4 Logarithmic Functions 523
4.21 Logarithmic functions 523
4.22 Logarithms of more complicated arguments 525
4.23 Combinations of logarithms and rational functions 532
4.24 Combinations of logarithms and algebraic functions 535
4.25 Combinations of logarithms and powers 537

4.26-4.27 Combinations involving powers of the logarithm and other powers 539
4.28 Combinations of rational functions of ln x and powers 552
4.29-4.32 Combinations of logarithmic functions of more complicated arguments and powers 555
4.33-4.34 Combinations of logarithms and exponentials 573
4.35-4.36 Combinations of logarithms, exponentials, and powers 575
4.37 Combinations of logarithms and hyperbolic functions 580
4.38-4.41 Logarithms and trigonometric functions 583
4.42-4.43 Combinations of logarithms, trigonometric functions, and powers 598
4.44 Combinations of logarithms, trigonometric functions, and exponentials 605
4.5 Inverse Trigonometric Functions 605
4.51 Inverse trigonometric functions 605
4.52 Combinations of arcsines, arccosines, and powers 606
4.53-4.54 Combinations of arctangents, arccotangents, and powers 607
4.55 Combinations of inverse trigonometric functions and exponentials 611
4.56 A combination of the arctangent and an inverse hyperbolic function 612
4.57 Combinations of inverse and direct trigonometric functions 612
4.58 A combination involving an inverse and a direct trigonometric function and a power 614
4.59 Combinations of inverse trigonometric functions and logarithms 614
4.6 Multiple Integrals 614
4.60 Change of variables in multiple integrals 614
4.61 Change of the order of integration and change of variables 615
4.62 Double and triple integrals with constant limits 618
4.63-4.64 Multiple integrals 620

5. Indefinite Integrals of Special Functions 626

5.1 Elliptic Integrals and Functions 626
5.11 Complete elliptic integrals 626
5.12 Elliptic integrals 627
5.13 Jacobian elliptic functions 629
5.14 Weierstrass elliptic functions 631
5.2 The Exponential-Integral Function 632
5.21 The exponential-integral function 632
5.22 Combinations of the exponential-integral function and powers 632
5.23 Combinations of the exponential-integral and the exponential 632
5.3 The Sine-Integral and the Cosine-Integral 632
5.4 The Probability Integral and Fresnel Integrals 633
5.5 Bessel Functions 633

6.-7. Definite Integrals of Special Functions 635

6.1 Elliptic Integrals and Functions 635
6.11 Forms containing $F(x, k)$ 635
6.12 Forms containing $E(x, k)$ 636
6.13 Integration of elliptic integrals with respect to the modulus 636
6.14-6.15 Complete elliptic integrals 637
6.16 The theta function 638
6.2-6.3 The Exponential-Integral Function and Functions Generated by It 639
6.21 The logarithm-integral 639
6.22-6.23 The exponential-integral function 641
6.24-6.26 The sine- and cosine-integral functions 643
6.27 The hyperbolic-sine- and cosine-integral functions 647

6.28-6.31 The probability integral 648
6.32 Fresnel integrals 653
6.4 The Gamma Function and Functions Generated by It 655
6.41 The gamma function 655
6.42 Combinations of the gamma function, the exponential, and powers 656
6.43 Combinations of the gamma function and trigonometric functions 660
6.44 The logarithm of the gamma function 661
6.45 The incomplete gamma function 662
6.46-6.47 The function $\psi(x)$ 664
6.5-6.7 Bessel Functions 665
6.51 Bessel functions 665
6.52 Bessel functions combined with x and x^2 672
6.53-6.54 Combinations of Bessel functions and rational functions 677
6.55 Combinations of Bessel functions and algebraic functions 681
6.56-6.58 Combinations of Bessel functions and powers 683
6.59 Combinations of powers and Bessel functions of more complicated arguments 700
6.61 Combinations of Bessel functions and exponentials 707
6.62-6.63 Combinations of Bessel functions, exponentials, and powers 711
6.64 Combinations of Bessel functions of more complicated arguments, exponentials, and powers 720
6.65 Combinations of Bessel and exponential functions of more complicated arguments and powers 723
6.66 Combinations of Bessel, hyperbolic, and exponential functions 726
6.67-6.68 Combinations of Bessel and trigonometric functions 730
6.69-6.74 Combinations of Bessel and trigonometric functions and powers 743
6.75 Combinations of Bessel, trigonometric, and exponential functions and powers 762
6.76 Combinations of Bessel, trigonometric, and hyperbolic functions 767
6.77 Combinations of Bessel functions and the logarithm, or arctangent 767
6.78 Combinations of Bessel and other special functions 768
6.79 Integration of Bessel functions with respect to the order 770
6.8 Functions Generated by Bessel Functions 775
6.81 Struve functions 775
6.82 Combinations of Struve functions, exponentials, and powers 777
6.83 Combinations of Struve and trigonometric functions 778
6.84-6.85 Combinations of Struve and Bessel functions 779
6.86 Lommel functions 784
6.87 Thomson functions 787
6.9 Mathieu Functions 788
6.91 Mathieu functions 788
6.92 Combinations of Mathieu, hyperbolic, and trigonometric functions 789
6.93 Combinations of Mathieu and Bessel functions 793
7.1-7.2 Associated Legendre Functions 794
7.11 Associated Legendre functions 794
7.12-7.13 Combinations of associated Legendre functions and powers 795
7.14 Combinations of associated Legendre functions, exponentials, and powers 803
7.15 Combinations of associated Legendre and hyperbolic functions 806
7.16 Combinations of associated Legendre functions, powers, and trigonometric functions 806
7.17 A combination of an associated Legendre function and the probability integral 810
7.18 Combinations of associated Legendre and Bessel functions 810
7.19 Combinations of associated Legendre functions and functions generated by Bessel functions 817

7.21 Integration of associated Legendre functions with respect to the order 819
7.22 Combinations of Legendre polynomials, rational functions, and algebraic functions 820
7.23 Combinations of Legendre polynomials and powers 822
7.24 Combinations of Legendre polynomials and other elementary functions 823
7.25 Combinations of Legendre polynomials and Bessel functions 825
7.3-7.4 Orthogonal Polynomials 826
7.31 Combinations of Gegenbauer polynomials $C_n^\nu(x)$ and powers 826
7.32 Combinations of the polynomials $C_n^\nu(x)$ and some elementary functions 830
7.33 Combinations of the polynomials $C_n^\nu(x)$ and Bessel functions. Integration of Gegenbauer functions with respect to the index 831
7.34 Combinations of Chebyshev polynomials and powers 833
7.35 Combinations of Chebyshev polynomials and some elementary functions 835
7.36 Combinations of Chebyshev polynomials and Bessel functions 836
7.37-7.38 Hermite polynomials 836
7.39 Jacobi polynomials 841
7.41-7.42 Laguerre polynomials 843
7.5 Hypergeometric Functions 848
7.51 Combinations of hypergeometric functions and powers 848
7.52 Combinations of hypergeometric functions and exponentials 850
7.53 Hypergeometric and trigonometric functions 853
7.54 Combinations of hypergeometric and Bessel functions 853
7.6 Degenerate Hypergeometric Functions 857
7.61 Combinations of degenerate hypergeometric functions and powers 857
7.62-7.63 Combinations of degenerate hypergeometric functions and exponentials 859
7.64 Combinations of degenerate hypergeometric and trigonometric functions 869
7.65 Combinations of degenerate hypergeometric functions and Bessel functions 870
7.66 Combinations of degenerate hypergeometric functions, Bessel functions, and powers 871
7.67 Combinations of degenerate hypergeometric functions, Bessel functions, exponentials, and powers 876
7.68 Combinations of degenerate hypergeometric functions and other special functions 881
7.69 Integration of degenerate hypergeometric functions with respect to the index 884
7.7 Parabolic-Cylinder Functions 885
7.71 Parabolic-cylinder functions 885
7.72 Combinations of parabolic-cylinder functions, powers, and exponentials 885
7.73 Combinations of parabolic-cylinder and hyperbolic functions 887
7.74 Combinations of parabolic-cylinder and trigonometric functions 888
7.75 Combinations of parabolic-cylinder and Bessel functions 889
7.76 Combinations of parabolic-cylinder functions and degenerate hypergeometric functions 894
7.77 Integration of a parabolic-cylinder function with respect to the index 895
7.8 Meijer's and MacRobert's Functions (G and E) 896
7.81 Combinations of the functions G and E and the elementary functions 896
7.82 Combinations of the functions G and E and Bessel functions 900
7.83 Combinations of the functions G and E and other special functions 903

8.-9. Special Functions 904

8.1 Elliptic Integrals and Functions 904
8.11 Elliptic integrals 904
8.12 Functional relations between elliptic integrals 907

8.13 Elliptic functions 909
8.14 Jacobian elliptic functions 910
8.15 Properties of Jacobian elliptic functions and functional relationships between them 914
8.16 The Weierstrass function $\mathscr{P}(u)$ 917
8.17 The functions $\zeta(u)$ and $\sigma(u)$ 920
8.18-8.19 Theta functions 921
8.2 The Exponential-Integral Function and Functions Generated by It 925
8.21 The exponential-integral function **Ei** (x) 925
8.22 The hyperbolic-sine-integral **shi** x and the hyperbolic-cosine-integral **chi** x 928
8.23 The sine integral and the cosine integral: **si** (x) and **ci** (x) 928
8.24 The logarithm-integral **li** (x) 929
8.25 The probability integral and Fresnel integrals $\Phi(x)$, $S(x)$, and $C(x)$ 930
8.26 Lobachevskiy's function $L(x)$ 933
8.3 Euler's Integrals of the First and Second Kinds and Functions Generated by Them 933
8.31 The gamma function (Euler's integral of the second kind): $\Gamma(z)$ 933
8.32 Representation of the gamma function as series and products 935
8.33 Functional relations involving the gamma function 937
8.34 The logarithm of the gamma function 939
8.35 The incomplete gamma function 940
8.36 The psi function $\psi(x)$ 943
8.37 The function $\beta(x)$ 947
8.38 The beta function (Euler's integral of the first kind): $B(x, y)$ 948
8.4-8.5 Bessel Functions and Functions Associated with Them 951
8.40 Definitions 951
8.41 Integral representations of the functions $J_\nu(z)$ and $N_\nu(z)$ 952
8.42 Integral representations of the functions $H_\nu^{(1)}(z)$ and $H_\nu^{(2)}(z)$ 955
8.43 Integral representations of the functions $I_\nu(z)$ and $K_\nu(z)$ 958
8.44 Series representation 959
8.45 Asymptotic expansions of Bessel functions 961
8.46 Bessel functions of order equal to an integer plus one-half 965
8.47-8.48 Functional relations 967
8.49 Differential equations leading to Bessel functions 971
8.51-8.52 Series of Bessel functions 973
8.53 Expansion in products of Bessel functions 979
8.54 The zeros of Bessel functions 980
8.55 Struve functions 982
8.56 Thomson functions and their generalizations: $\mathbf{ber}_\nu(z)$, $\mathbf{bei}_\nu(z)$, $\mathbf{her}_\nu(z)$, $\mathbf{hei}_\nu(z)$, **ker** (z), **kei** (z) 983
8.57 Lommel functions 985
8.58 Anger and Weber functions $\mathbf{J}_\nu(z)$ and $\mathbf{E}_\nu(z)$ 988
8.59 Neumann's and Schläfli's polynomials: $O_n(z)$ and $S_n(z)$ 989
8.6 Mathieu Functions 991
8.60 Mathieu's equation 991
8.61 Periodic Mathieu functions 991
8.62 Recursion relations for the coefficients $A_{2r}^{(2n)}$, $A_{2r+1}^{(2n+1)}$, $B_{2r+1}^{(2n+1)}$, $B_{2r+2}^{(2n+2)}$ 992
8.63 Mathieu functions with a purely imaginary argument 992
8.64 Nonperiodic solutions of Mathieu's equation 993
8.65 Mathieu functions for negative q 993
8.66 Representation of Mathieu functions as series of Bessel functions 994
8.67 The general theory 997
8.7-8.8 Associated Legendre Functions 998

8.70 Introduction 998
8.72 Asymptotic series for large values of $|\nu|$ 1002
8.73-8.74 Functional relations 1004
8.75 Special cases and particular values 1007
8.76 Derivatives with respect to the order 1009
8.77 Series representation 1009
8.78 The zeros of associated Legendre functions 1012
8.79 Series of associated Legendre functions 1013
8.81 Associated Legendre functions with integral indices 1014
8.82-8.83 Legendre functions 1016
8.84 Conical functions 1020
8.85 Toroidal functions 1022
8.9 Orthogonal Polynomials 1023
8.90 Introduction 1023
8.91 Legendre polynomials 1025
8.92 Series of Legendre polynomials 1027
8.93 Gegenbauer polynomials $C_n^{\lambda}(t)$ 1029
8.94 The Chebyshev polynomials $T_n(x)$ and $U_n(x)$ 1032
8.95 The Hermite polynomials $H_n(x)$ 1033
8.96 Jacobi's polynomials 1035
8.97 The Laguerre polynomials 1037
9.1 Hypergeometric Functions 1039
9.10 Definition 1039
9.11 Integral representations 1040
9.12 The representation of elementary functions in terms of a hypergeometric function 1040
9.13 Transformation formulas and the analytic continuation of functions defined by hypergeometric series 1042
9.14 A generalized hypergeometric series 1045
9.15 The hypergeometric differential equation 1045
9.16 Riemann's differential equation 1049
9.17 Representation of certain second-order differential equations by means of a Riemann scheme 1052
9.18 Hypergeometric functions of two variables 1053
9.19 A hypergeometric function of several variables 1057
9.2 A Degenerate Hypergeometric Function 1057
9.20 Introduction 1057
9.21 The functions $\Phi(\alpha, \gamma; z)$ and $\Psi(\alpha, \gamma; z)$ 1058
9.22-9.23 The Whittaker functions $M_{\lambda,\mu}(z)$ and $W_{\lambda,\mu}(z)$ 1059
9.24-9.25 Parabolic cylinder functions $D_p(z)$ 1064
9.26 Degenerate hypergeometric series of two variables 1067
9.3 Meijer's G-Function 1068
9.30 Definition 1068
9.31 Functional relations 1069
9.32 A differential equation for the G-function 1070
9.33 Series of G-functions 1070
9.34 Connections with other special functions 1070
9.4 MacRobert's E-Function 1071
9.41 Representation by means of multiple integrals 1071
9.42 Functional relations 1072
9.5 Riemann's Zeta Functions $\zeta(z, q)$, and $\zeta(z)$, and the Functions $\Phi(z, s, \nu)$ and $\xi(s)$ 1072
9.51 Definition and integral representations 1072

9.52 Representation as a series or as an infinite product 1073
9.53 Functional relations 1073
9.54 Singular points and zeros 1074
9.55 The function $\Phi(z, s, \nu)$ 1075
9.56 The function $\xi(s)$ 1076
9.6 Bernoulli Numbers and Polynominals, Euler Numbers, the Functions $\nu(x)$, $\nu(x, \alpha)$, $\mu(x, \beta)$, $\mu(x, \beta, \alpha)$, $\lambda(x, y)$ 1076
9.61 Bernoulli numbers 1076
9.62 Bernoulli polynomials 1077
9.63 Euler numbers 1078
9.64 The functions $\nu(x)$, $\nu(x. \alpha)$, $\mu(x, \beta)$, $\mu(x, \beta, \alpha)$, $\lambda(x, y)$ 1079
9.7 Constants 1079
9.71 Bernoulli numbers 1079
9.72 Euler numbers 1080
9.73 Euler's and Catalan's constants 1080

10. Vector Field Theory 1081

10.1 Vectors, Vector Operators, and Integral Theorems 1081
10.11 Products of vectors 1081
10.12 Properties of scalar product 1081
10.13 Properties of vector product 1081
10.14 Differentiation of vectors 1082
10.21 Operators grad, div, and curl 1082
10.31 Properties of the operator ∇ 1083
10.41 Solenoidal fields 1084
10.51-10.61 Orthogonal curvilinear coordinates 1084
10.71-10.72 Vector integral theorems 1088
10.81 Integral rate of change theorems 1091

11. Algebraic Inequalities 1093

11.1-11.3 General Algebraic Inequalities 1093
11.11 Algebraic inequalities involving real numbers 1093
11.21 Algebraic inequalities involving complex numbers 1094
11.31 Inequalities for sets of complex numbers 1096

12. Integral Inequalities 1097

12.1-12.5 Properties of Integrals and Integral Inequalities 1097
12.11 Mean value theorems 1097
12.21 Differentiation of definite integral containing a parameter 1098
12.31 Integral inequalities 1099
12.41 Convexity and Jensen's inequality 1100
12.51 Fourier Series and related inequalities 1101

13. Matrices and Related Results 1103

13.1-13.4 Matrices and Quadratic Forms 1103
13.11-13.12 Special matrices 1103
13.21 Quadratic forms 1104
13.31 Differentiation of matrices 1106
13.41 The matrix exponential 1107

14. Determinants 1108

14.1-14.3 Properties of Determinants 1108
14.11 Expansion of second- and third-order determinants 1108
14.12 Basic properties 1108
14.13 Minors and cofactors of a determinant 1109
14.14 Principal minors 1109
14.15 Laplace expansion of a determinant 1109
14.16 Jacobi's theorem 1109
14.17 Hadamard's theorem 1110
14.18 Hadamard's inequality 1110
14.21 Cramer's rule 1110
14.31 Some special determinants 1111

15. Norms 1114

15.1-15.9 Vector Norms 1114
15.11 General properties 1114
15.21 Principal vector norms 1114
15.31 Matrix norms 1114
15.41 Principal natural norms 1115
15.51 Spectral radius of a square matrix 1115
15.61 Inequalities involving eigenvalues of matrices 1117
15.71 Inequalities for the characteristic polynomial 1117
15.81-15.82 Named theorems on eigenvalues 1119
15.91 Variational principles 1124

16. Ordinary Differential Equations 1126

16.1-16.9 Results Relating to the Solution of Ordinary Differential Equations 1126
16.11 First-order equations 1126
16.21 Fundamental inequalities and related results 1127
16.31 First-order systems 1128
16.41 Some special types of elementary differential equations 1130
16.51 Second-order equations 1131
16.61-16.62 Oscillation and nonoscillation theorems for second order equations 1134
16.71 Two related comparison theorems 1137
16.81-16.82 Nonoscillatory solutions 1138
16.91 Some growth estimates for solutions of second-order equations 1139
16.92 Boundedness theorems 1140

17. Fourier and Laplace Transforms 1142

17.1-17.3 Integral Transforms 1142
17.11 Laplace transform 1142
17.12 Basic properties of the Laplace transform 1142
17.13 Table of Laplace transform pairs 1143
17.21 Fourier transform 1146
17.22 Basic properties of the Fourier transform 1146
17.23 Table of Fourier transform pairs 1147
17.31 Fourier sine and cosine transforms 1148
17.32 Basic properties of the Fourier sine and cosine transforms 1149
17.33 Table of Fourier sine transforms 1150

17.34 Table of Fourier cosine transforms 1151
17.35 Relationships between transforms 1153
