Introduction . . . . .	7
<b>Table I. The distribution and density functions of <math>t</math>-distribution</b>	
$S_\nu(t) = \frac{1}{\sqrt{\pi\nu}} \frac{\Gamma\left(\frac{\nu+1}{2}\right)}{\Gamma\left(\frac{\nu}{2}\right)} \int_{-\infty}^t \left(1 + \frac{u^2}{\nu}\right)^{-\frac{\nu+1}{2}} du, \quad S'_\nu(t) = s_\nu(t)$	
$t = 0.00 (0.01) 3.00 (0.02) 4.50 (0.05) 6.50$ for $\nu = 1, 2, \dots, 12$	
$t = 0.00 (0.01) 2.50 (0.02) 3.50 (0.05) 6.50$ for $\nu = 13, 14, \dots, 24$	15
<b>Table II. <math>t</math>-distribution function for large values of the argument <math>S_\nu(t)</math></b>	
$t = 6.5 (1.0) 9.0$ for $\nu = 1, 2, \dots, 10$	69
<b>Table III. <math>t</math>-distribution function <math>S_\nu(t)</math></b>	
$t = 0.00 (0.01) 2.50 (0.02) 3.50 (0.05) 5.00$ for $\nu = 25, 26, \dots, 35$	73
<b>Table IV. The function <math>\psi_\xi(t) = S_\nu(t)</math>, <math>\xi = \frac{10^3}{\nu}</math>, <math>t = 0.00 (0.01) 2.50 (0.02)</math> for <math>\nu \geq 33.3</math></b>	89
<b>Table V. The polynomials <math>C_1(t), C_2(t), C_3(t), C_4(t), C_5(t)</math></b>	107
<b>Table VI. The coefficients <math>K_\nu = \frac{1}{\sqrt{\pi\nu}} \frac{\Gamma\left(\frac{\nu+1}{2}\right)}{\Gamma\left(\frac{\nu}{2}\right)}</math></b>	119
<b>Table VII. Percentiles of <math>t</math>-distribution <math>t_\alpha</math></b>	123
<b>Table VIII. Coefficients for quadratic interpolation by Bessel's method</b>	127
