

# Contents

<u>Chapter I. Hankel Transforms.....</u>	1
1.1 General Formulas.....	5
1.2 Transforms of Order Zero.....	6
1.3 Transforms of Order Unity.....	28
Transforms of General Order	
1.4 Algebraic Functions and Powers with Arbitrary Index.....	33
1.5 Exponential and Logarithmic Functions.....	45
1.6 Trigonometric and Inverse Trigonometric Functions.....	49
1.7 Orthogonal Polynomials.....	64
1.8 Miscellaneous Functions.....	68
1.9 Legendre Functions.....	71
1.10 Bessel Functions of Argument $x$ .....	80
1.11 Bessel Functions of Other Arguments.....	96
1.12 Modified Bessel Functions of Argument $x$ .....	108
1.13 Modified Bessel Functions of Other Arguments.....	117
1.14 Functions Related to Bessel Functions.....	124
1.15 Parabolic Cylinder Functions.....	129
1.16 Whittaker Functions.....	136
1.17 Gauss' Hypergeometric Function.....	145

<u>Chapter II. Integral Transforms with Modified Bessel Functions</u>	
<u>as Kernel</u> .....	145
2.1 General Formulas.....	147
2.2 Transforms of Order Zero.....	148
Transforms of General Order	
2.3 Elementary Functions.....	156
2.4 Higher Transcendental Functions.....	167
 <u>Chapter III. Integral Transforms with Neumann Functions as Kernel</u> .....	
3.1 General Formulas.....	191
3.2 Transforms of Order Zero.....	192
Transforms of General Order	
3.3 Elementary Functions.....	193
3.4 Higher Transcendental Functions.....	196
 <u>Chapter IV. Integral Transforms with Struve Functions as Kernel</u> .....	
4.1 General Formulas.....	210
4.2 Transforms of Order Zero.....	221
4.3 Elementary Functions.....	222
4.4 Higher Transcendental Functions.....	226

Chapter V. Kontorovich-Lebedev Transforms..... 241

Chapter VI. Transforms with Lommel Functions as Kernel..... 262

Chapter VII. Divisor Transforms..... 267

Appendix. List of Notations and Definitions..... 277
