

# CONTENTS

Symbols and Abbreviations . . . . .	xv
Chapter 1	
<b>Symmetry . . . . .</b>	<b>1</b>
1-1. Introduction . . . . .	1
1-2. Definition of Symmetry . . . . .	1
1-3. Symmetry in Science . . . . .	1
1-4. Symmetry in Structural Chemistry . . . . .	2
A. Point Symmetry Elements . . . . .	2
B. Point Groups . . . . .	12
C. Rules for Classification of Molecules into Point Groups . . . . .	14
D. The Character Table . . . . .	18
E. Space Symmetry . . . . .	24
Problems . . . . .	31
References . . . . .	32
Bibliography . . . . .	32
Chapter 2	
<b>Derivation of Selection Rules . . . . .</b>	<b>33</b>
2-1. Selection Rules for Isolated Molecules . . . . .	33
A. The $T_d$ Point Group . . . . .	33
B. Linear Molecules . . . . .	50
C. Selection Rules for $A_3$ to $A_8$ Molecules . . . . .	58
D. Forbidden Vibrations for Several Point Groups . . . . .	58
2-2. Selection Rules for Systems Involving Translations . . . . .	58
A. The Method of Bhagavantam and Venkatarayudu . . . . .	58
B. The Halford–Hornig Site Group Method . . . . .	70
C. Comparison of the BV and HH Methods . . . . .	75
D. Unambiguous Choice of Site Symmetry in the Bravais Unit Cell . . . . .	75
2-3. Examples of the Halford–Hornig Site Group Method . . . . .	77

Problems . . . . .	106
References . . . . .	108
Recent Correlation Bibliography . . . . .	109

### Chapter 3

<b>Potential Force Fields . . . . .</b>	<b>111</b>
3-1. Introduction . . . . .	111
3-2. Of What Value to Chemistry Is the Solution of Force Field Problems? . . . . .	115
3-3. General Procedure in Determining Frequencies from Force Constants and Vice Versa . . . . .	117
References . . . . .	132

### Chapter 4

<b>The Normal Coordinate Treatment for Molecules with <math>C_{2v}</math>, <math>C_{3v}</math>, and <math>O_h</math> Symmetry . . . . .</b>	<b>135</b>
4-1. Procedure Necessary in the NCT Method . . . . .	135
4-2. Normal Coordinate Treatment of $H_2O$ ( $C_{2v}$ Symmetry) . . . . .	138
4-3. Normal Coordinate Treatment of $NH_3$ ( $C_{3v}$ Symmetry) . . . . .	150
4-4. Normal Coordinate Treatment of $UF_6$ ( $O_h$ Symmetry) . . . . .	156
4-5. Some Results of NCT of Molecules . . . . .	165
4-6. The Product Rule . . . . .	167
4-7. The Sum Rule . . . . .	173
4-8. Summary . . . . .	178
Problems . . . . .	178
References . . . . .	179

### Chapter 5

<b>Applications of Group Theory for the Determination of Molecular Structure . . . . .</b>	<b>181</b>
5-1. Introduction . . . . .	181
5-2. Procedure Used in Determining the Structure of a Molecule . . . . .	182
5-3. Examples Illustrating the Use of Group Theory in Determining Molecular Structure . . . . .	182
5-4. Practice Problem . . . . .	194
Problems . . . . .	197
References . . . . .	199

Appendix 1	
<b>Character Tables . . . . .</b>	<b>201</b>
Appendix 2	
<b>Description of Symbolism Used in the International Tables for X-Ray Crystallography . . . . .</b>	<b>223</b>
Appendix 3	
<b>Site Symmetries for the 230 Space Groups . . . . .</b>	<b>225</b>
Appendix 4	
<b>Correlation Tables . . . . .</b>	<b>235</b>
Appendix 5	
<b>Elementary Mathematics . . . . .</b>	<b>249</b>
Appendix 6	
<b>The <i>g</i> Elements . . . . .</b>	<b>259</b>
Appendix 7	
<b>General Method of Obtaining Molecular Symmetry Coordinates . .</b>	<b>265</b>
Appendix 8	
<b>Calculation of Thermodynamic Functions from Vibrational–Rotational Spectra . . . . .</b>	<b>271</b>
Appendix 9	
<b>Diagrams of Normal Vibrations for Common Point Groups . . . .</b>	<b>275</b>
Appendix 10	
<b>Derivation of the Characters Necessary for Selection Rules . . . .</b>	<b>279</b>
Appendix 11	
<b>Updated Bibliography . . . . .</b>	<b>285</b>
<b>Index . . . . .</b>	<b>287</b>
