

TABLE OF CONTENTS

	Page
INTRODUCTION	1
CHAPTER 1. PATTERNS: FROM CHAOS TO ORDER	4
1.1. The search for regularity	4
1.2. Some regular structures	16
1.3. The mathematical study of regularity.	59
CHAPTER 2. A PATTERN FORMALISM.	63
2.1. The principle of atomism.	63
2.2. The combinatory principle	68
2.3. The principle of observability.	75
2.4. The principle of realism.	79
CHAPTER 3. ALGEBRA OF REGULAR STRUCTURES.	84
3.1. Generator coordinates	84
3.2. Configuration coordinates	97
3.3. Connectors.	105
3.4. Configuration homomorphisms	110
3.5. Configuration categories.	123
3.6. Set operations in $\mathcal{L}(\mathcal{R})$	128
3.7. Operations on images.	131
3.8. Homomorphisms for given global regularity	151
3.9. Representations by image isomorphisms	168
CHAPTER 4. SOME TOPOLOGY OF IMAGE ALGEBRAS.	185
4.1. A topology for configurations	185
4.2. A topology for images	187
4.3. Some examples	190
CHAPTER 5. METRIC PATTERN THEORY.	194
5.1. Regularity controlled probabilities	194
5.2. Conditioning by regularity.	199
5.3. Frozen patterns: finite G and n	210
5.4. Frozen patterns: infinite G and finite n . .	213
5.5. Quadratic energy function	230
5.6. Frozen patterns: infinite G and n	239
5.7. Asymptotically minimum energy	242
5.8. Asymptotics for large configurations.	248
5.9. Spectral density matrix for $\Sigma = \text{LINEAR}(\gamma)$. .	252
5.10. Factorization of the spectral density matrix. .	257
5.11. Representation of the random configurations . .	269
5.12. Spectral density matrix for $\Sigma = \text{LATTICE}(\gamma)$. .	271
5.13. Factorization of the spectral density matrix in two dimensions	276
5.14. Representations of the random configurations in the two dimensional case	285
5.15. Laws of large numbers in pattern theory	288
5.16. Random dynamics for configurations.	314

CHAPTER 6. PATTERNS OF SCIENTIFIC HYPOTHESES	318
6.1. Hypotheses as regular structures	318
6.2. Patterns of statistical hypotheses	323
6.3. Generators for statistical hypotheses	326
6.4. Examples of configurations	331
6.5. Hypotheses as images	339
6.6. Image algebras of hypotheses	347
6.7. Conclusions	351
CHAPTER 7. SYNTHESIS OF SOCIAL PATTERNS OF DOMINATION .	353
7.1. Patterns in mathematical sociology	353
7.2. Domination regularity	356
7.3. Configuration dynamics	365
7.4. System in equilibrium	381
7.5. Large configurations - simulation results . . .	391
7.6. Large configurations - analytical results . . .	402
7.7. Further problems and extensions	416
7.8. Appendix	418
CHAPTER 8. TAXONOMIC PATTERNS	423
8.1. A logic for taxonomic patterns	423
8.2. Logic of taxonomic affinity patterns	428
8.3. Synthesis of taxonomic affinity patterns	439
8.4. Analysis of affinity patterns	445
CHAPTER 9. PATTERNS IN MATHEMATICAL SEMANTICS	451
9.1. Introduction	451
9.2. Introducing mathematical semantics	452
9.3. Formalization through regular structures	459
9.4. Two special image algebras	480
9.5. The choice of language type for the study . . .	494
9.6. Semantic maps	499
9.7. Special semantic maps	510
9.8. Learning semantics	524
9.9. Abduction of semantic maps	538
OUTLOOK	539
APPENDIX	540
NOTES	543
BIBLIOGRAPHY	554
INDEX	560
