

# Contents

<b>chapter 1</b>	<b>Interpolation</b>	<b>1</b>
1.1	Introduction	1
1.2	Difference Notation	2
1.3	Newton's Forward-Difference Formula	4
1.4	Newton's Backward-Difference Formula	7
1.5	Central-Difference Formulas	10
1.6	Lagrangian Interpolation	14
1.7	Inverse Interpolation	19
1.8	The Error in Polynomial Approximation	20
<b>chapter 2</b>	<b>Numerical Differentiation and Integration</b>	<b>22</b>
2.1	Introduction	22
2.2	Numerical Differentiation	22
2.3	Numerical Integration	25
2.4	Integration Formulas by the Method of Undetermined Coefficients	29
2.5	Error Estimates	30
<b>chapter 3</b>	<b>Roots of Equations</b>	<b>34</b>
3.1	Introduction	34
3.2	General Iterative Methods	34
3.3	Method of False Position ( <i>Regula Falsi</i> )	36
3.4	Newton-Raphson Method	39
3.5	Simultaneous Equations	41

3.6	Application to Polynomial Equations	42
3.7	Character of the Roots of a Polynomial Equation	47
<b>chapter 4</b>	<b>Simultaneous Linear Equations and Matrices</b>	<b>52</b>
4.1	Linear Equations, Vectors, and Matrices	52
4.2	Matrix Multiplication	57
4.3	Transpose, Inverse, and Adjoint Matrices	61
4.4	Solution of Linear Equations	64
4.5	Gaussian Elimination	67
4.6	Gauss-Jordan Elimination	71
4.7	The Crout Method of Elimination	73
4.8	Gauss-Seidel Iteration	79
4.9	Characteristic Numbers and Vectors of a Matrix	80
4.10	The Cayley-Hamilton Theorem	83
4.11	Properties of the Characteristic Numbers and Vectors of a Matrix	86
4.12	The Calculation of the Characteristic Numbers and Vectors of a Matrix	92
4.13	The Power Method	93
4.14	Deflation	103
4.15	Real Symmetric Matrices	107
4.16	Real Nonsymmetric Matrices	110
<b>chapter 5</b>	<b>Solution of Ordinary Differential Equations</b>	<b>112</b>
5.1	Introduction	112
5.2	First-Order Equations. Existence Theorem	114
5.3	Linear Differential Equations with Constant Coefficients	120
5.4	General Linear Differential Equations	125
5.5	Integrating Factors and the Adjoint Equation	127
5.6	Linear Differential Equations. Green's Function	131
5.7	Numerical Solutions	137
5.8	Starting the Solution	140
5.9	Milne's Method	145
5.10	Adams' Method	147
5.11	Runge-Kutta Method	149
5.12	Systems of Equations; Equations of Higher Order	151

<b>Contents</b>	<b>xiii</b>
<b>chapter 6 Fourier Series</b>	<b>155</b>
6.1 Introduction	155
6.2 Calculation of the Coefficients	156
6.3 Examples of Fourier Series	157
6.4 Half-Range Series	161
6.5 Change of Interval	162
6.6 Application of Fourier Series to Solution of Ordinary Differential Equations	162
6.7 Solution of the Heat Equation by Means of Fourier Series	165
6.8 Double Fourier Series	168
6.9 Application of Double Fourier Series to a Rectangular Plate Problem	169
6.10 The Two-Dimensional Heat Conduction Problem	171
<b>chapter 7 Numerical Solution of Partial Differential Equations</b>	<b>173</b>
7.1 Introduction	173
7.2 Hyperbolic Equations	175
7.3 Parabolic Equations	180
7.4 Elliptic Equations	186
