CHAPTER 1 VECTORS IN CARTESIAN SPACE

<i>1-1 Vector Algebra in Three Dimensions</i>	3
Definitions and Scalar Product	3
Derivatives of Vectors	9
Vector Product	12
Angular Momentum	14
Moment of Force	14
Angular Velocity	15
Reciprocal Sets of Vectors	15
<i>1-2 Vectorial Mechanics</i>	21
Central Forces	21
The Inverse-square Law	21
The Two-body Problem	26
The Many-body Problem	29
<i>Conservation of Linear Momentum</i>	29
<i>Conservation of Angular Momentum</i>	30
<i>Conservation of Energy</i>	31
<i>Virial of Clausius</i>	32
<i>1-3 Differential Vector Operators</i>	34
The Gradient	34
The Divergence	36
The Curl	37

1-4 Dyadics	40
The Vector Product.....	41
The Gradient of a Vector Field.....	42
The Moment-of-Inertia Tensor.....	44
1-5 Vector Algebra in More than Three Dimensions	45
A Finite Number of Dimensions.....	45
An Infinite Number of Dimensions; The Generalization to Orthogonal Functions.....	46
1-6 Tensors of Higher Order	47
1-7 Summation Convention	49
Problems.....	51

CHAPTER 2
MATRIX
ALGEBRA

2-1 Determinants	55
Definition and a Method of Evaluating the n th-order Determinant.....	55
Some Elementary Properties of Determinants.....	58
Proof of the Orthogonality Relations.....	59
Operations on Determinants.....	60
Linear Independence and Simultaneous Equations.....	62
2-2 Sets of Orthogonal Functions and Fourier Series	66
2-3 Linear Transformations of Variables	69
Consecutive Transformations and Matrix Multiplication.....	70
Addition of Matrices.....	72
Multiplication by a Scalar.....	72
The Direct Product of Matrices.....	72
2-4 Summary of Some Elementary Properties of Matrices	75
2-5 Orthogonal Transformations	79
2-6 The Matrix as a Linear Operator	87
Linear Operators.....	87
Effect of Transformation of Coordinates upon Operators.....	91
2-7 Eigenvectors and Eigenvalues	94
Diagonalization.....	95
Commuting Matrices.....	100
Symmetric or Hermitian and Orthogonal or Unitary Matrices.....	102
2-8 Invariants	121

2-9	<i>Geometrical or Physical Interpretation of Eigenvectors and Eigenvalues</i> . . .	123
2-10	<i>Invariant Subspaces</i>	130
2-11	<i>Simultaneous Reduction of Two Quadratic Forms</i>	132
2-12	<i>Normal-mode Analysis</i>	136
2-13	<i>An Application in Quantum Chemistry</i>	144
2-14	<i>Tensors</i>	147
	Contravariant and Covariant Vectors	147
	Tensors of Order Two	148
	Tensorial Character of Some Differential Vector Operators	149
	The Kronecker Delta; Isotropic Tensors	150
	Problems	177

CHAPTER 3
GROUP
THEORY

3-1	<i>Definition of a Group</i>	187
3-2	<i>Even and Odd Functions</i>	188
3-3	<i>Brief Introduction to Some Special Groups</i>	196
	The Point Groups $\{C_i\}$ and $\{C_2\}$	196
	The Point Groups $\{C_3\}$, $\{C_{3v}\}$, $\{C_{3h}\}$, $\{D_{3h}\}$, and $\{D_3\}$	197
	Permutation Groups; The Symmetric and Alternating Groups	201
	Space Groups	203
	Other Groups	203
3-4	<i>Conjugate Classes</i>	204
3-5	<i>Subgroups</i>	207
	Cosets	207
	Conjugate Subgroups	208
	Normal Subgroups and Factor Groups	208
	Cyclic Subgroups and Generators	209
3-6	<i>Direct Products</i>	213
	First Type of Direct Product (Subgroup Type)	213
	Second Type of Direct Product	214
3-7	<i>Some Properties of Irreducible Representations</i>	215
	The Orthogonality Relations and Related Properties	215
	$\{C_{3v}\}$ as an Example	220

More about the Orthogonality of the Characters and Matrix Elements of Irreducible Representations.....	229
3-8 Some Further Properties of Basis Functions and Representations.....	231
Definition of the Operator O_R	231
The Regular Representation.....	232
Projection Operators.....	234
3-9 Groups $\{C_n\}$ of Rotations of Finite Order about a Fixed Axis in Three Dimensions.....	250
3-10 Double Groups.....	254
3-11 Rotation about More than One Axis.....	257
3-12 Space Groups.....	259
The Point Groups.....	260
The Translation Groups.....	261
Glide Planes and Screw Axes.....	263
The Number of Space Groups.....	264
Problems.....	279

**SOLUTIONS
AND
ANSWERS
TO
PROBLEMS**

Chapter 1.....	285
Chapter 2.....	290
Chapter 3.....	311

APPENDIXES

Appendix A Volume, Surface, and Line Integrals.....	329
Appendix B The Sturm-Liouville Problem.....	333
Appendix C Lagrange's Multipliers.....	341
Index of Examples.....	347
Author and Subject Index.....	349
