

## TABLE DES MATIERES

### (CONTENTS)

CONTRIBUTORS vii

PREFACE ix

PREFACE i

Some Combinatorial Problems Studied Experimentally on Computing Machines 1

S.M. Ulam

Experiments on Optimal Coefficients 11

Seymour Haber

La Méthode des "Bons Treillis" pour le Calcul des Intégrales

Multiples 39

S.K. Zaremba

English Summary: The Method of

"Good Lattices" for the Numerical

Computation of Multiple Integrals 117

Recherche et Utilisation des "Bons Treillis".

Programmation et Résultats Numériques 121

Dominique Maisonneuve

English Summary: Search for, and Applications

of, "Good Lattices," Programming and

Numerical Results 201

Methods for Estimating Discrepancy 203

H. Niederreiter

A Distribution Problem in Finite Sets 237

H. Niederreiter

## CONTENTS

The Structure of Linear Congruential Sequences	249
George Marsaglia	
Statistical Interdependence of Pseudo-Random Numbers Generated by the Linear Congruential Method	287
U. Dieter	
Computational Investigations of Low-Discrepancy Point Sets . . .	319
Tony T. Warnock	
Estimating the Accuracy of Quasi-Monte Carlo Integration	345
John H. Halton	
Lattice Structure and Reduced Bases of Random Vectors Generated by Linear Recurrences	361
W. A. Beyer	
A Transformation of Equidistributed Sequences	371
E. Hlawka and R. Muck	
On the Second Round of the Maximal Order Program	389
Hans Zassenhaus	
Modulo Optimization Problems and Integer Linear Programming . .	433
Gordon H. Bradley	
Equivalent Forms of Zero-One Programs	453
Peter L. Hammer and Ivo G. Rosenberg	
Incidence Matrices of Boolean Functions and Zero-One Programming	465
Abraham Berman	
Number Theoretic Foundations of Finite Precision Arithmetic . .	479
D. W. Matula
