

## CONTENTS

Preface	v
On the self-similar sets with frames A. Kaneyama	1
Connections of periodic orbits in the parameter space of the Lozi family K. Shibayama	10
On the ergodic decomposition of hyperbolic measures M. Tsujii	26
Classification of nilmanifolds $M^n$ ( $n \leq 6$ ) admitting Anosov diffeomorphisms K. Ito	31
A difference set of a Cantor set A. Sannami	50
On infinitesimal stability of endomorphisms H. Ikeda	59
A class of continua which admit no expansive homeomorphisms H. Kato & K. Kawamura	85
The visibility axiom on a manifold whose geodesic flow is of Anosov type T. Ukai	91
Application of the differential equation of Riccati type to Riemannian geometry N. Innnami	105
Spectrum of Perron-Frobenius operator M. Hirata & Y. Takahashi	113
Perron Frobenius operator and central limit theorem H. Ishitani	122
A diffeomorphism of an irrational rotation $C^*$ -algebra by a non-generic rotation K. Kodaka	140
A counter example of strong Baum-Connes conjecture for foliated manifolds H. Takai	149

On Kneser type theorem for functional differential equations with the phase space $\mathfrak{C}_Y$ in Banach spaces <i>J. S. Shih</i>	155
Wellposedness and resolvent operators of linear Volterra integro-differential equations in a Banach space <i>K. Tsuruta</i>	171
Multi-ergodic aspects of Hamiltonian dynamics <i>Y. Aizawa &amp; Y. Kikuchi</i>	182
Homoclinic linkage in the double scroll circuit and the cusp-constrained circuit <i>R. Tokunaga, T. Matsumoto, T. Ida &amp; K. Miya</i>	192
Dynamical system theory and analysis of economic fluctuations <i>T. Owase</i>	210
Optimal growth theory and dynamical systems <i>K. Nishimura</i>	225
