

## **CONTENTS**

<b>Editor's foreword</b>	7
<b>Preface</b>	9
Chapter 1	
<b>The Method of Lyapunov Functions</b>	13
1. Estimate of the variation of the solutions . . . . .	14
2. Definition of stability. Derivation of equations for disturbed motion . . . . .	19
3. Lyapunov functions . . . . .	20
4. The stability theorems of Lyapunov . . . . .	23
5. The asymptotic stability theorem . . . . .	26
6. Instability theorems . . . . .	29
7. Examples . . . . .	32
8. Linear systems . . . . .	34
9. Construction of Lyapunov functions in the form of quadratic forms for linear systems of differential equations . . . . .	38
10. Estimates of the solutions of linear systems . . . . .	41
11. Stability theorems according to the first approximation . . . . .	43
12. Stability on the whole . . . . .	48
13. Aizerman's problem . . . . .	50
14. Examples . . . . .	53
Chapter 2	
<b>Stability of Control Systems with Variable Structure</b>	62
1. Preliminary remarks. Statement of the problem . . . . .	62
2. Stabilization of a second order system . . . . .	68

3. Stabilization of a third order system. Conditions for the existence of the sliding mode . . . . .	74
4. Stabilization of a third order system. The stability of the system . . . . .	77
5. Stabilization of an $n$ -th order system . . . . .	85
6. Stability of a system incorporating a limiter in the critical case of a single zero root . . . . .	89
7. Non-linear systems with variable structure. Control of the coordinate $x$ . . . . .	94
8. Non-linear systems with variable structure. Control with respect to the $x$ -coordinate and its derivatives . . . . .	103
9. Investigation of a third order system with a discontinuous switching surface . . . . .	108
10. A system operating under forced sliding conditions . . . . .	122
11. An example of third order focussing under forced sliding . . . . .	131

### Chapter 3

#### **Stability of the Solutions of Differential Equations in Banach Space 139**

1. Banach space . . . . .	139
2. Differential equations in Banach space . . . . .	145
3. Examples of differential equations in Banach spaces . . . . .	154
4. Problem of perturbation build-up over a finite interval of time . . . . .	159
5. Problem of perturbation build-up over an infinite interval of time. Stability theorems for the zero solution of a homogeneous linear equation . . . . .	162
6. Theorems about the stability of solutions of non-linear equations . . . . .	179
7. Stability with respect to impulse perturbations . . . . .	191
8. Problem of realising a motion along a specified trajectory . . . . .	197

#### **References . . . . . 211**

#### **Additional Bibliography . . . . . 221**
