Preface	vii	
CHAPTER 1: THE LAPLACE TRANSFORM		
1.1	Introduction	1
1.2	Functions of a Bounded Variation	2
1.3	The Stieltjes Integral	3
1.4	Improper Stieltjes Integral	4
1.5	The Laplace Transform	5
1.6	Existence and Convergence	6
1.7	Properties of the Laplace Transform	7
1.8	The Inversion of the Laplace Transform	11
1.9	The Convolution Theorem	16
1.10	Instability of the Inverse of the Laplace Transform	19
1.11	The Laplace Transform and Differential Equations	22
1.12	Transient Solutions	23
1.13	Generating Functions	23
	Problems	25
CHAPTER 2: ORDINARY DIFFERENTIAL EQUATIONS		
2.1	Introduction	28
2.2	Linear Differential Equations with Constant Coefficients	29
2.3	The Laplace Transform Solution	33
2.4	Systems of Linear Differential Equations	34
2.5	Mismatched Solutions	36
2.6	Behavior of the Higher Derivatives	39
2.7	An Example	40
	Problems	45

CHAPTER 3: DIFFERENTIAL-DIFFERENCE EQUATIONS

3.1	Introduction	49
3.2	Examples	51
3.3	Types of Differential-Difference Equations	54
3.4	Existence and Uniqueness	56
3.5	Exponential Solutions	59
3.6	Laplace Transform Solutions	62
3.7	Order of Growth of Solutions	68
3.8	The Characteristic Roots	72
3.9	Asymptotic Behavior of the Solution	76
3.10	The Shift Theorem	80
3.11	Equations of the Neutral and Advanced Types	82
3.12	Linear Systems of Differential-Difference Equations	85
3.13	A Limiting Case for Differential-Difference Equations	92
	Problems	95

CHAPTER 4: PARTIAL DIFFERENTIAL EQUATIONS

4.1	Introduction	98
4.2	The Hyperbolic Partial Differential Equation	99
4.3	The Parabolic Partial Differential Equation	104
4.4	The Elliptic Partial Differential Equation	109

CHAPTER 5: THE RENEWAL EQUATION

5.1	Introduction	114
5.2	The Formal Laplace Transform Solution	118
5.3	Exponential Bounds on $u(t)$	118
5.4	A Convolution Theorem	120
5.5	Use of the Contour Integral Representation	123
5.6	Some Important Results	124
5.7	Systems of Renewal Equations	129
5.8	Branching Processes	130
	Problems	132

CHAPTER 6: NUMERICAL INVERSION OF THE LAPLACE TRANSFORM

6.1	Introduction	135
6.2	The Complex Laplace Transform	136
6.3	Numerical Quadrature	138
6.4	The Legendre Polynomials	142
6.5	Numerical Inversion of the Laplace Transform	145
6.6	Explicit Inversion Formula	147
6.7	Instability of the Inverse of the Laplace Transform	149
6.8	Tychonov Regularization	150

6.9	Obtaining the Initial Approximation	151
6.10	Change of the Time Scale	152
	Problems	154
Subject Index		157
