

## TABLE OF CONTENTS

	Page
<b>CHAPTER 1. FIRST ORDER DIFFERENTIAL EQUATIONS</b>	
1.1. Introduction.....	1
1.2. First order linear differential equations.....	2
1.3. The Van Meegeren art forgeries.....	16
1.4. Separable equations.....	32
1.5. Population models.....	42
1.6. The spread of technological innovations.....	57
1.7. An atomic waste disposal problem.....	68
1.8. Exact differential equations; and why we cannot solve very many equations.....	79
1.9. The existence-uniqueness theorem; Picard iteration.....	92
1.10. Finding roots of equations by iteration.....	112
1.11. Newton's method.....	121
1.12. Difference equations, and how to compute the interest due on your student loans.....	127
1.13. Numerical approximations; Euler's method.....	133
1.13.1. Error analysis for Euler's method.....	140
1.14. The three term Taylor series method.....	150
1.15. An improved Euler method.....	154
1.16. The Runge-Kutta method.....	159
1.17. What to do in practice.....	164
<b>CHAPTER 2. SECOND ORDER LINEAR DIFFERENTIAL EQUATIONS</b>	
2.1. Algebraic properties of solutions.....	178
2.2. Linear equations with constant coefficients...	196
2.2.1. Complex roots.....	200
2.2.2. Equal roots; reduction of order.....	207
2.3. The nonhomogeneous equation.....	215

	Page
2.4. The method of variation of parameters.....	218
2.5. The method of judicious guessing.....	224
2.6. Mechanical vibrations.....	235
2.6.1. The Tacoma Bridge disaster.....	248
2.6.2. Electrical networks.....	252
2.7. A model for the detection of diabetes.....	257
2.8. Series solutions.....	270
2.8.1. Singular points; the method of Frobenius.....	288
2.9. The method of Laplace transforms.....	298
2.10. Some useful properties of Laplace transforms..	311
2.11. Differential equations with discontinuous right hand sides.....	317
2.12. The Dirac delta function.....	325
2.13. The convolution integral.....	337
2.14. A few words about higher order equations.....	344
 CHAPTER 3. SYSTEMS OF FIRST ORDER EQUATIONS	
3.1. Algebraic properties of solutions of linear systems.....	351
3.2. Vector spaces.....	364
3.3. Dimension of a vector space.....	373
3.4. Applications of linear algebra to differential equations.....	389
3.5. The theory of determinants.....	398
3.6. Solutions of simultaneous linear equations....	416
3.7. Linear transformations.....	428
3.8. The eigenvalue-eigenvector method of finding solutions.....	447
3.9. Complex roots.....	458
3.10. Equal roots.....	463

	Page
3.11. Fundamental matrix solutions; $e^{At}$ .....	476
3.12. The nonhomogeneous equation; variation of parameters.....	483
 CHAPTER 4. QUALITATIVE THEORY OF DIFFERENTIAL EQUATIONS	
4.1. Introduction.....	493
4.2. Stability of linear systems.....	502
4.3. The mathematical theory of war.....	513
4.4. Stability of equilibrium solutions.....	525
4.5. The phase-plane.....	537
4.6. Qualitative properties of orbits.....	544
4.7. Phase portraits of linear systems.....	552
4.8. Long time behavior of solutions; the Poincaré-Bendixson Theorem.....	567
4.9. Why the percentage of sharks caught in the Mediterranean Sea rose dramatically during World War I.....	583
4.10. The principle of competitive exclusion in population biology.....	596
4.11. The Threshold Theorem of epidemiology.....	609
4.12. A model for the spread of gonorrhoea.....	620
 CHAPTER 5. SEPARATION OF VARIABLES AND FOURIER SERIES	
5.1. Two point boundary value problems.....	638
5.2. Introduction to partial differential equations.....	645
5.3. The heat equation; separation of variables...	650
5.4. Fourier series.....	655
5.5. Even and odd functions.....	664
5.6. Return to the heat equation.....	671
5.7. The wave equation.....	678
5.8. Laplace's equation.....	684

	Page
APPENDICES	
A. Some simple facts concerning functions of several variables.....	692
B. Sequences and series.....	693
C. Introduction to APL.....	696
INDEX.....	712
