<i>PREFACE</i>		xi
Introduction		1
I.1	Definitions and Examples	1
Chapter 1	THE DIFFUSION EQUATION	7
1.1	Derivation	7
1.2	Problems	9
1.3	Simple Solutions	10
1.4	Problems	12
1.5	Series Solutions	13
1.6	Problems	16
1.7	Nonhomogeneous End Conditions	17
1.8	Problems	18
1.9	The Maximum Principle	19
1.10	Problems	20
Chapter 2	LAPLACE TRANSFORM METHODS	23
2.1	Introductory Example	24
2.2	Problems	25
2.3	A Finite Interval Problem	27
2.4	Problems	29
2.5	Delta Function	30
2.6	Problems	33
2.7	Supplementary Problems	34

Chapter 3	THE WAVE EQUATION	35
3.1	Derivation	35
3.2	Problems	36
3.3	An Infinite-Interval Problem	38
3.4	Problems	42
3.5	Series Solutions	45
3.6	Problems	46
3.7	A Problem with Radial Symmetry	48
3.8	Problems	49
3.9	Transforms	50
3.10	Problems	51
3.11	Uniqueness	52
3.12	Supplementary Problems	53
Chapter 4	THE POTENTIAL EQUATION	55
4.1	Laplace's and Poisson's Equations	55
4.2	Problems	58
4.3	Simple Properties of Harmonic Functions	59
4.4	Some Special Solutions—Series	62
4.5	Problems	64
4.6	Discontinuous Boundary Data	66
4.7	Complex Variables and Conformal Mapping	68
4.8	Problems	72
Chapter 5	CLASSIFICATION OF SECOND-ORDER EQUATIONS	75
5.1	Cauchy Data on y -Axis	75
5.2	Cauchy Data on Arbitrary Curve	77
5.3	Problems	78
5.4	Case I: $B^2 - AC > 0$	79
5.5	Case II: $B^2 - AC = 0$	81
5.6	Case III: $B^2 - AC < 0$	82
5.7	Problems	83
5.8	Discontinuities; Signal Propagation	86
5.9	Problems	87
5.10	Some Remarks	89
Chapter 6	FIRST-ORDER EQUATIONS	91
6.1	Linear Equation Examples	91
6.2	Problems	94
6.3	Quasi-Linear Case	95
6.4	Problems	97

	6.5 Further Properties of Characteristics	99
	6.6 Problems	101
	6.7 More Variables	101

Chapter 7 **EXTENSIONS** 103

	7.1 More Variables	103
	7.2 Problems	107
	7.3 Series and Transforms	112
	7.4 Problems	115
	7.5 Legendre Functions	116
	7.6 Problems	121
	7.7 Spherical Harmonics	121
	7.8 Problems	125

Chapter 8 **PERTURBATIONS** 127

	8.1 A Nonlinear Problem	127
	8.2 Problems	130
	8.3 Two Examples from Fluid Mechanics	130
	8.4 Boundary Perturbations	134
	8.5 Problems	135

Chapter 9 **GREEN'S FUNCTIONS** 139

	9.1 Some Consequences of the Divergence Theorem	139
	9.2 The Laplacian Operator	142
	9.3 Problems	144
	9.4 Potentials of Volume and Surface Distributions	147
	9.5 Problems	150
	9.6 Modified Laplacian	152
	9.7 Problems	154
	9.8 Wave Equation	156
	9.9 Problems	158

Chapter 10 **VARIATIONAL METHODS** 161

	10.1 A Minimization Problem	161
	10.2 Problems	164
	10.3 Natural Boundary Conditions	167
	10.4 Subsidiary Conditions	168
	10.5 Problems	172
	10.6 Approximate Methods	174
	10.7 Problems	178
	10.8 Finite-Element Method	180
	10.9 Supplementary Problems	183

Chapter 11	EIGENVALUE PROBLEMS	189
11.1	A Prototype Problem	189
11.2	Some Eigenvalue Properties	190
11.3	Problems	193
11.4	Perturbations	197
11.5	Approximations	199
11.6	Problems	201
Chapter 12	MORE ON FIRST-ORDER EQUATIONS	203
12.1	Envelopes	203
12.2	Characteristic Strips	205
12.3	Complete Integral	209
12.4	Problems	212
12.5	Legendre Transformation	214
12.6	Problems	215
12.7	Propagation of a Disturbance	217
12.8	Complete Integral and Eikonal Function	220
12.9	Hamilton–Jacobi Equation	222
12.10	Problems	224
Chapter 13	MORE ON CHARACTERISTICS	227
13.1	Discontinuities—A Preliminary Example	227
13.2	Weak Solutions	230
13.3	Burgers' Equation	233
13.4	Problems	236
13.5	A Compressible Flow Problem	239
13.6	A Numerical Approach	242
13.7	Problems	246
13.8	More Dependent Variables	250
13.9	More Independent Variables	253
13.10	Problems	255
Chapter 14	FINITE-DIFFERENCE EQUATIONS AND NUMERICAL METHODS	257
14.1	Accuracy and Stability; A Diffusion Equation Example	257
14.2	Error Analysis	259
14.3	Problems	262
14.4	More Dimensions, or Other Complications	264
14.5	Series Expansions	267
14.6	Problems	269
14.7	Wave Equation	270
14.8	A Nonlinear Equation	272

14.9 Problems	273
14.10 Boundary Value Problems	274
14.11 Problems	278
14.12 Series; Fast Fourier Transform	278
14.13 Problems	281
Chapter 15 SINGULAR PERTURBATION METHODS	285
15.1 A Boundary Layer Problem	285
15.2 A More General Procedure	287
15.3 Problems	289
15.4 A Transition Situation	292
15.5 Problems	295
15.6 Asymptotic Analysis of Wave Motion	297
15.7 Boundary Layer near a Caustic	300
15.8 Problems	303
15.9 Multiple Scaling	303
15.10 Problems	306
References	309
